Pros:
- Traffic exiting northbound Meadowbrook ramp could bypass Meadowbrook signal to Brentwood Stair Road
- Desirable ramp spacing between northbound Meadowbrook exit and frontage roads bypass met

Cons:
- Ramp spacing between frontage road bypass and Meadowbrook entrance is undesirable at 800' gore to gore
- 1300' Between Meadowbrook entrance and direct connector does not meet National Guidelines
- Traffic from the northbound I-820 on ramp from Meadowbrook Drive wanting to continue northbound on I-820 would have to weave over 1 lane in a distance of 500' (Approximately)
- Access from Normandy Road to frontage road to be removed
- Reduced shoulders (shoulders not wide enough for emergency use) on existing mainlanes to remain and the I-30 northbound direct connector exit ramp
