

### Popularity of Bicycle Route - Bicycle Accommodation Survey

During the fall of 2010, the Texas Transportation Institute (TTI) conducted a survey and focus groups of bicyclists in the Austin District of the Texas Department of Transportation (TxDOT) in order to receive feedback on their level of satisfaction about bicycle accommodations on state routes. Of the 1,005 respondents, 850 live in Travis County. Participants were asked if they bicycle on state-maintained roadways. Those who bicycle on state roads were asked to use Google Maps to select the three most typical routes used most. This route data was transferred to ArcGIS and is summarized in this map.
