THICKENING ALLOWANCE

Pipes to allow for slippage of bottom flange thickening in variable depth section as shown.

GENERAL NOTES:
- Designed according to AASHTO LRFD Bridge Design Specifications.

PRELIMINARY SUBMITTED TO REVIEW

This document is released for informational purposes only and is to be used as a guide for project-specific design. Information and data can vary. Details are not complete and may change during construction.

Preliminary Design

Dimensions selected by Engineer.
- Adjust dimensions and section properties if Thickening Allowance is used.
- Contact TxDOT Bridge Division for preliminary pretension strand patterns.

HSTx12, HSTx14 & HSTx16

Type HSTx12, HSTx14 & HSTx16
(For spliced applications)

HSTx14

Type STx7, STx8 & STx9
(For spliced applications)

STx12

Type Tx84
(Pretensioned, for non-spliced applications)

STx8

Type Tx84
(Showing strand pattern)
