

## DISTRICT PROFILE

The Brownwood District plans, designs, builds, operates and maintains the state transportation system in its counties. The district primarily conducts asset preservation and safety projects that are vital in rural areas of the state. The Brownwood District experiences generally warm, dry weather, with extended drought conditions, along with occasional spells of icy, winter weather. The wide-ranging weather patterns create challenges for maintenance crews and designers to maintain district assets and assure the safety of the traveling public.
