

Snowplowable Pavement Markers

Material Producer List

Construction Division – Materials & Pavements Section

Snowplowable Pavement Markers

The following snowplowable pavement markers have been tested and are pre-approved for use when DMS-4210, "Snowplowable Pavement Markers," is referenced. This Specification describes the procedure for approval.

Because of the high cost and low volume used, these markers may require sampling and testing before use. Tex-729-I, "Sampling Traffic Markers," describes the sampling procedure.

The Department reserves the right to conduct random sampling of pre-approved, certified materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, the project site, and the warehouse. The Materials and Pavements Section of the Construction Division reserves the right to test samples to verify compliance with DMS-4210.

For more information, contact the Construction Division's Coatings and Traffic Materials Branch at (512) 506-5870.

Manufacturer / Distributor	Brand Name / Model / No.
4-H Supply, Inc.	Nightline A250 with reflective insert
Ray-O-Lite / Hallen Products Limited	H960 with 190 reflective insert
