

Snowplowable Pavement Markers

Material Producer List

Materials and Tests Division – Coatings and Traffic Materials Section

Snowplowable Pavement Markers

The following snowplowable pavement markers have been tested and are pre-approved for use when DMS-4210, "Snowplowable Pavement Markers," is referenced. This Specification describes the procedure for approval.

Because of the high cost and low volume used, these markers may require sampling and testing before use. Tex-729-I, "Sampling Traffic Markers," describes the sampling procedure.

The Department reserves the right to conduct random sampling of pre-approved, certified materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, the project site, and the warehouse. The **Materials and Tests Division (MTD)** reserves the right to test samples to verify compliance with DMS-4210.

For more information, contact the **MTD's Coatings and Traffic Materials Section** at (512) 506-5870.

Producer	Model No.
Ray-O-Lite	H1010LP or H1010HP with 2004 lens insert
	SL300 with 2004 lens insert
Ennis-Flint, Inc.	C-40
3M Company	190 reflective insert
