

## Bituminous Rated Source Quality Catalog

**NOTE: Refresh the page to view the most current list.**

### Overview

The Bituminous Rated Source Quality Catalog (BRSQC) lists the Aggregate Quality Monitoring Program (AQMP) rated values for bituminous aggregates for Tex-410-A, “Abrasion of Coarse Aggregate Using the Los Angeles Abrasion Machine,” Tex 411 A, “Soundness of Aggregate by Use of Magnesium Sulfate,” Tex-461-A, “Degradation of Coarse Aggregate by Micro-Deval Abrasion,” and Tex-612-J, “Acid Insoluble Residue for Fine Aggregate.”

Tex-499-A, “Aggregate Quality Monitoring Program (AQMP),” provides the requirements and procedures for monitoring aggregate products that have demonstrated continuing quality and uniformity. The AQMP allows the districts to use aggregates from rated sources qualified through AQMP without project specific testing by the Construction Division, Materials and Pavements Section (CST/M&P).

The districts must perform job control tests to determine specification compliance for those aggregate requirements not covered by the AQMP.

Aggregate suppliers are added to AQMP based on test history of aggregate products used on TxDOT projects. The AQMP was created by TxDOT to improve efficiency of TxDOT operations. Participation is not at the option of the aggregate supplier.

The Department reserves the right to conduct random sampling of these materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, the project site, and the warehouse. CST/M&P reserves the right to test samples to verify compliance with Tex-499-A, “Aggregate Quality Monitoring Program (AQMP).”

Contact the Geotechnical, Soils, and Aggregates Branch at (512) 506-5907 for more information.

**Effective Dates**

Effective: 06/12/2014–01/15/2015

**Legend**

- SAC = Surface Aggregate Classification for Wet Weather Accident Reduction Program.
- RSLA = Rated Source Los Angeles Abrasion
- RSSM = Rated Source Soundness Magnesium
- RSMD = Rated Source Micro-Deval, use to compare with project sample results to detect changes in aggregate production and the need to submit project samples for soundness (Mg) verification
- HMAC = Hot Mix Asphaltic Concrete
- ST = Surface Treatment
- MS = Micro Surface
- RSAI = Rated Source Acid Insoluble
- CA = Coarse Aggregate
- Dry Unit Weight is measured in lb./ft.<sup>3</sup>
- ( ) = Rated Source Value Does Not Meet Standard Specification
- \* = Requires project testing for surface treatment aggregates.

## Producer Code Number

The producer code number for each aggregate source provides information as to the location.

- The first two digits of the producer code number identify the district in which the pit is located. Sources located outside Texas have '00' as the first two digits of the code.
- The middle three digits identify the county in which the source is located. A list of counties, in alphabetical order, can be found on the official Texas Travel Map. The counties are numbered beginning with Anderson County as '1' and ending with Zavala County as '254.'
- Out of state sources are denoted with the following middle three digits:
  - 401 – Mexico
  - 402 – Canada
  - 501 – Arkansas
  - 502 – Louisiana
  - 503 – New Mexico
  - 504 – Oklahoma
  - 505 – Kentucky
  - 506 – Missouri
  - 507 – Illinois
- The last two digits of the producer code is assigned sequentially and indicates the number of pits in that county that have been assigned a producer code number.

## Product Codes

082 - Microsurfacing

093 - HMAC

094 - Surface Treatment

095/096 - Lightweight

**Material Code**

The following material codes indicate the material type of the source (quarry):

**Coarse Aggregate**

010 - Siliceous Gravel	024 - Crushed Limestone and Siliceous Gravel
011 - Crushed Siliceous Gravel	025 - Partly Crushed Limestone and Siliceous Gravel
012 - Partly Crushed Siliceous Gravel	029 - Crushed Sandstone
013 - Siliceous & Limestone Gravel	032 - Crushed Rhyolite
014 - Crushed Siliceous and Limestone Gravel	033 - Crushed Rhyolite Gravel
015 - Partly Crushed Siliceous and Limestone Gravel	034 - Rhyolite Gravel
016 - Siliceous and Calcareous Gravel	037 - Crushed Shale
017 - Crushed Siliceous and Calcareous Gravel	040 - Quartzite
018 - Crushed Limestone	041 - Tuff
019 - Crushed Dolomite	048 - Lightweight Aggregate
020 - Limestone Gravel	049 - Crushed Limestone Rock Asphalt
021 - Crushed Limestone Gravel	050 - Crushed Trap Rock
022 - Partly Crushed Limestone Gravel	051 - Crushed Granite
023 - Limestone and Siliceous Gravel	

**Materials**

- Sandstone
