

Concrete Rated Source Quality Catalog

NOTE: Refresh the page to view the most current list.

Overview

The Concrete Rated Source Quality Catalog (CRSQC) lists the Aggregate Quality Monitoring Program (AQMP) rated values for concrete aggregates for Tex-410-A, “Abrasion of Coarse Aggregate Using the Los Angeles Abrasion Machine,” Tex-411-A, “Soundness of Aggregate by Use of Sodium or Magnesium Sulfate”, Tex-461-A, “Degradation of Coarse Aggregate by Micro-Deval Abrasion,” and Tex-612-J, “Acid Insoluble Residue for and Fine Aggregate.”

Tex-499-A, “Aggregate Quality Monitoring Program (AQMP),” provides the requirements and procedures for monitoring aggregate products that have demonstrated continuing quality and uniformity. The AQMP allows the districts to use aggregates from rated sources qualified through AQMP without project specific testing by the Construction Division, Materials and Pavements Section (CST/M&P).

The districts must perform job control tests to determine specification compliance for those aggregate requirements not covered by the AQMP.

Aggregate suppliers are added to AQMP based on test history of aggregate products used on TxDOT projects. The AQMP was created by TxDOT to improve efficiency of TxDOT operations. Participation is not at the option of the aggregate supplier.

The Department reserves the right to conduct random sampling of these materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, project site, and quarry. CST/M&P reserves the right to test samples to verify compliance with test method Tex-499-A, “Aggregate Quality Monitoring Program (AQMP).”

Contact the Geotechnical, Soils, and Aggregates Branch at (512) 506-5907 for more information.

Effective Date

Effective: 9/9/2014–01/15/2015

Legend*Coarse Aggregate (CA)*

- RSLA = Rated Source Los Angeles Abrasion for specification compliance.
- RSSM = Rated Source Soundness Magnesium for specification compliance.
- RSMD = Rated Source Micro-Deval. Micro-Deval performed on aggregates delivered to a project can be compared to the listed rated value to indicate the need to sample project stockpiles for additional soundness and Los Angeles Abrasion testing.
- RSAI = Rated Source Acid Insoluble
- *CoTE = Coefficient of Thermal Expansion. Only applicable for CRC Pavement. Final approval of the CTE mix design will be done by the CST/M&P, Rigid Pavement and Concrete Materials Branch.
- () = Rated Source Value Does Not Meet Standard Specification

Fine Aggregate (FA)

- RSAI = Rated Source Acid Insoluble
- () = Rated Source Value Does Not Meet Standard Specification

Producer Code Number

The producer code number for each aggregate source provides information as to the location.

- The first two digits of the producer code number identify the district in which the pit is located. Sources located outside Texas have '00' as the first two digits of the code.

- The middle three digits identify the county in which the source is located. A list of counties, in alphabetical order, can be found on the official Texas Travel Map. The counties are numbered beginning with Anderson County as ‘1’ and ending with Zavala County as ‘254.’
- Out of state sources are denoted with the following middle three digits:
 - 401 – Mexico
 - 402 – Canada
 - 501 – Arkansas
 - 502 – Louisiana
 - 503 – New Mexico
 - 504 – Oklahoma
 - 505 – Kentucky
 - 506 – Missouri
 - 507 - Illinois
- The last two digits of the producer code is assigned sequentially and indicates the number of pits in that county that have been assigned a producer code number.

Product Code

- The following concrete aggregate code numbers indicate material usage:

084 - Concrete Fine Aggregate subject to direct traffic

085 - Concrete Fine Aggregate for structures (cannot be used as 084)

086 - Concrete Coarse Aggregate

Material Code

The following material codes indicate the material type of the source (quarry):

Coarse Aggregate

- | | |
|---|---|
| 010 - Siliceous Gravel | 023 - Limestone and Siliceous Gravel |
| 011 - Crushed Siliceous Gravel | 024 - Crushed Limestone and Siliceous Gravel |
| 012 - Partly Crushed Siliceous Gravel | 025 - Partly Crushed Limestone and Siliceous Gravel |
| 013 - Siliceous & Limestone Gravel | 029 - Crushed Sandstone |
| 014 - Crushed Siliceous and Limestone Gravel | 032 - Crushed Rhyolite |
| 015 - Partly Crushed Siliceous and Limestone Gravel | 033 - Crushed Rhyolite Gravel |
| 016 - Siliceous and Calcareous Gravel | 034 - Rhyolite Gravel |
| 017 - Crushed Siliceous and Calcareous Gravel | 037 - Crushed Shale |
| 018 - Crushed Limestone | 040 - Quartzite |
| 019 - Crushed Dolomite | 048 - Lightweight Aggregate |
