

Concrete Rated Source Quality Catalog

NOTE: Refresh the page to view the most current list.

Overview

The Concrete Rated Source Quality Catalog (CRSQC) lists the Aggregate Quality Monitoring Program (AQMP) rated values for concrete aggregates for Tex-410-A, “Abrasion of Coarse Aggregate Using the Los Angeles Abrasion Machine,” Tex-411-A, “Soundness of Aggregate by Use of Sodium or Magnesium Sulfate,” and Tex-612-J, “Acid Insoluble Residue for Fine Aggregate.”

Tex-499-A, “Aggregate Quality Monitoring Program (AQMP),” provides the requirements and procedures for monitoring aggregate products that have demonstrated continuing quality and uniformity. The AQMP allows the districts to use aggregates from rated sources qualified through AQMP without project specific testing by the Construction Division, Materials and Pavements Section (CST/M&P).

The districts must perform job control tests to determine specification compliance for those aggregate requirements not covered by the AQMP.

Aggregate suppliers are added to AQMP based on test history of aggregate products used on TxDOT projects. The AQMP was created by TxDOT to improve efficiency of TxDOT operations. Participation is not at the option of the aggregate supplier.

The Department reserves the right to conduct random sampling of these materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, project site, and quarry. CST/M&P reserves the right to test samples to verify compliance with test method Tex-499-A, “Aggregate Quality Monitoring Program (AQMP).”

Effective Dates

Effective: 2/2/2012–3/15/2012

Legend

Coarse Aggregate (CA)

RSLA = Rated Source Los Angeles Abrasion for specification compliance.

RSSM = Rated Source Soundness Magnesium for specification compliance.

RSMD = Rated Source MicroDeval. MicroDeval performed on aggregates delivered to a project can be compared to the listed rated value to indicate the need to sample project stockpiles for additional soundness and Los Angeles Abrasion testing.

*CTE = Coefficient of Thermal Expansion. Only applicable for CRC Pavement. Final approval of the CTE mix design will be done by the CST/M&P, Rigid Pavement and Concrete Materials Branch.

ASR = Alkali silica reaction. Product cannot be used with Item 421, Option 8 if indicated by an '8'.

Fine Aggregate (FA)

RSAI = Rated Source Acid Insoluble

ASR = Alkali silica reaction. Product cannot be used with Item 421, Option 8 if indicated by an '8'.

Producer Code Number

The producer code number for each aggregate source provides information as to the location.

The first two digits of the producer code number identify the district in which the pit is located. Sources located outside Texas have '00' as the first two digits of the code.

The middle three digits identify the county in which the source is located. A list of counties, in alphabetical order, can be found on the official Texas Travel Map. The counties are numbered beginning with Anderson County as '1' and ending with Zavala County as '254.'

Out of state sources are denoted with the following middle three digits:

- 401 – Mexico
- 402 – Canada
- 501 – Arkansas
- 502 – Louisiana
- 503 – New Mexico
- 504 – Oklahoma
- 505 – Kentucky
- 506 – Missouri
- 507 - Illinois

The last two digits of the producer code is assigned sequentially and indicates the number of pits in that county that have been assigned a producer code number.

Product Code

The following concrete aggregate code numbers indicate material usage:

- 084 - Concrete Fine Aggregate subject to direct traffic
- 085 - Concrete Fine Aggregate for structures (cannot be used as 084)
- 086 - Concrete Coarse Aggregate

Material Code

The following material codes indicate the material type of the source (quarry):

Coarse Aggregate

- 010 - Siliceous Gravel
- 011 - Crushed Siliceous Gravel

012 - Partly Crushed Siliceous Gravel

013 - Siliceous & Limestone Gravel

014 - Crushed Siliceous and Limestone Gravel

015 - Partly Crushed Siliceous and Limestone Gravel

016 - Siliceous and Calcareous Gravel

017 - Crushed Siliceous and Calcareous Gravel

018 - Crushed Limestone

019 - Crushed Dolomite

020 - Limestone Gravel

021 - Crushed Limestone Gravel

022 - Partly Crushed Limestone Gravel

023 - Limestone and Siliceous Gravel

Fine Aggregate

059 - Limestone Sand

060 - Limestone and Siliceous Sand

061 - Manufactured Sand

062 - Siliceous Sand

063 - Siliceous and Limestone Sand

024 - Crushed Limestone and Siliceous Gravel

025 - Partly Crushed Limestone and Siliceous Gravel

029 - Crushed Sandstone

032 - Crushed Rhyolite

033 - Crushed Rhyolite Gravel

034 - Rhyolite Gravel

040 - Quartzite

048 - Lightweight Aggregate

049 - Crushed Limestone Rock Asphalt

050 - Crushed Trap Rock

051 - Crushed Granite

064 - Rhyolite Sand

065 - Manufactured Limestone and Siliceous Sand Blend

066 - Siliceous and Calcareous Sand

068 - Siliceous and Manufactured Limestone Sand Blend
