

Pavement Marking Material (Construction-Grade, Temporary)

NOTE: Refresh the page to view the most current list.

The following producers of temporary construction-grade prefabricated pavement marking materials have been pre-qualified per DMS-8243, “Temporary Construction-Grade Prefabricated Pavement Markings.”

The materials will not require sampling and testing before use unless deemed necessary by the Department. Tex-732-I, “Sampling Prefabricated Pavement Marking Materials,” describes the sampling method.

The Department reserves the right to conduct random sampling of pre-approved, certified materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, the project site, and the warehouse. The Materials and Pavements Section of the Construction Division (CST/M&P) reserves the right to test samples to verify compliance with DMS-8243.

For more information, contact CST/M&P’s Coatings and Traffic Materials Branch at [\(512\) 506-5870](tel:5125065870).
