

# Grouts for Post-Tensioning

---

## Material Producer List

Materials & Tests Division

## Grouts for Post-Tensioning

### Overview

The following post-tensioning grout products have been prequalified according to DMS-4670, “Grouts for Post-Tensioning.”

The Department reserves the right to conduct random sampling and testing of materials from qualified manufacturers of thixotropic grouts for post-tensioning. Department representatives may sample material from the manufacturing plant, warehouse, or the project site. The Materials & Tests Division reserves the right to test samples to verify compliance with DMS-4670.

For more information, contact the Material & Tests Division’s Rigid Pavements and Concrete Materials Section at (512) 506-5858.
