

Concrete Curing Compounds (Liquid Membrane-Forming)

Material Producer List

Construction Division – Materials & Pavements Section

Concrete Curing Compounds (Liquid Membrane-Forming)

The following manufacturers for concrete curing compounds have complied with DMS 4650, “Hydraulic Cement Concrete Curing Materials and Evaporation Retardants.” This Specification describes the procedure for pre-qualification.

These manufacturers pre-qualified to supply the following products for use on Department projects and requisitions when DMS-4650 is referenced. No further sampling and testing is required unless deemed necessary by the engineer or CST/M&P. Tex-718-I, “Sampling Liquid Membrane-Forming Compounds for Curing Concrete,” describes the sampling method.

The Department reserves the right to conduct random sampling of prequalified, certified materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, the project site, and the warehouse. The Materials and Pavements Section of the Construction Division reserves the right to test samples to verify compliance with DMS-4650.

Variation from Percent Solid specification will be limited to ± 2% for samples taken from producer manufacturing site and ± 4% for field samples.

For more information, contact the Construction Division’s Coatings and Traffic Materials Branch at (512) 506-5870.

Producer	Product	Percent Solids
Bona US	Type II, code: 309	10.73%
Concrete Paving Solutions	Type 1-D, code: 1140	25.0%
Dayton Superior	Type I, code: Resin Cure w/ dye J11WD	19.5%
	Type II, code: White Resin Cure TX	25.42%
	Type II, code: Texas WWC J9A	26.33%
	Type II, code: WSH	8.29%
Hunt Process Corp.	Type II, code WTX	28.5%
	Type II, code: WWTX1 White Wax Cure	10.49%
Prime Eco Group	Type I-D, code: TID-300	19.12%
	Type II, code: TSC-100	20.7%
	Type II, code: Eco1000	13.24%
Right Pointe	Type II, code: White Water Resin	25%

Producer	Product	Percent Solids
	Type II, White Water Wax Cure	20.84%
