This SUE (Subsurface Utility Engineering) plan sheet is designed to identify underground utilities, including electric, gas, water, and communications lines. The plan is used for preliminary utility location and is not intended for construction purposes. It is part of the certification process for ensuring the accuracy of underground utility locations.

The engineer's seal on this sheet is to certify that the utilities shown have been investigated in accordance with industry standards. However, this certification is not for construction purposes.

The plan details various features such as manholes, utility lines, and symbols indicating the types of utilities present. It is an important tool for urban planning and infrastructure management.
