

Sign-In

All hearing attendees are encouraged to sign-in. The sign-in sheets assist in keeping a record of attendance for this meeting and will help in evaluating the public interest for this project.

Meeting Purpose

The purpose of this public hearing is to present the proposed design and results of the environmental studies for the proposed addition of collector-distributor (C-D) lanes on I-10 between SH 20 (Mesa Street) and Executive Center Boulevard and improvements to the interchange at US 85.

Project Description

Traffic volume and congestion on the I-10 corridor has continued to increase due to population growth and economic development. Future population growth trends are expected to place even more traffic demand on the I-10 corridor. The proposed I-10 improvements would meet this increased demand with the construction of collector-distributor lanes for 5.75 miles of I-10 and improvements to the US 85 (Paisano Dr.) interchange. The I-10 C-D lanes would be constructed to the outside edge of the existing main lanes in both east and west directions connecting three interchanges. The existing direct connector at Resler Drive and the direct connector at Sunland Park Drive would be replaced with improved connectors. Improvements are also proposed for the existing interchange at SH 20 (Mesa Street), Sunland Park Drive and Executive Center Boulevard.

Project Objectives

The objectives of this I-10 improvement project include:

- Improve mobility and operational efficiency
- Facilitate congestion management in the project corridor
- Reduce travel time

Public Hearing

This Public Hearing is to encourage and solicit public comments regarding the proposed I-10 C-D project. No formal presentation will be given, however project staff is present to answer any questions you may have regarding the project.

Written Comments

Comment forms are located at the sign-in table. Forms completed tonight should be dropped into the white deposit box. Comment forms returned by mail should be mailed to:

KBR
