Planned Projects

Project Number	023119003
Highway Route	US 190
Project Length	5.12
Limits From	LAMPASAS CO LINE
Limits To	US 190 W OF CLARKE RD
Description (1)	WIDEN FROM TWO TO FOUR LANES DIVIDED AND CONSTRUCT
Description (2)	INTERCHANGE
County Name	Coryell
Project	Under Development

500 Foot Buffer

Click on individual sites (pins) to see details about the sites.

Archeological Sites

- Site Type: Lithic procurement site
- Explanation: The site is an extremely dense scatter of chert debris
- Specific Time Period: Archaic
- General Time Period: Prehistoric
- Eligibility: Ineligible within ROW

TxDOT Early Tribal Coordination Tool

About the tool:

The **TxDOT Early Tribal Coordination Tool** is an online tool that layers TxDOT projects with archeological sites so that tribes can participate early in the transportation planning process. Through a partnership with TxDOT Archeology and the Texas Historical Commission, TxDOT now provides tribes access to certain data from the Texas Archeological Sites Atlas (Atlas). It includes:

- ▶ A map of minor and major transportation undertakings (projects) for a 10 year period.
- ▶ A 500-foot buffer around each project, defining the projects' provisional Area of Potential Effects (APE).
- ▶ A layer of known archeological sites from the Atlas is shown, with data about eligibility and time period. Only sites within 1 km of the APE are included in this map.
- ▶ The project info will be updated up to four (4) times a year.
- ▶ The "legend" includes types of projects – major and minor – and types of archaeological sites recorded within 500 ft.
- ▶ You can choose projects to focus on for future consultation with TxDOT, including opportunities for site visits, peer exchanges and mitigation.

Tribes may also provide shape files to add as a layer, however TxDOT does not maintain those shape files in perpetuity.

A few things to note about the online system:

1. Schematics and detailed project information are not included.
2. You can view and search projects by highway, project ID, TxDOT district, county and state/federal legislative district.
3. As a project develops, its status may change from planning to design to construction.
4. Many of these projects are very large and complex. As such, shifts in funding and regional priorities can affect their status.
5. TxDOT updates the Early Tribal Coordination Tool quarterly, while daily project updates can be found on the **[TxDOT Project Tracker online](#)**.
