The Honorable Anthony R. Foxx  
Secretary  
U.S. Department of Transportation  
1200 New Jersey Avenue SE  
Washington, DC 20590

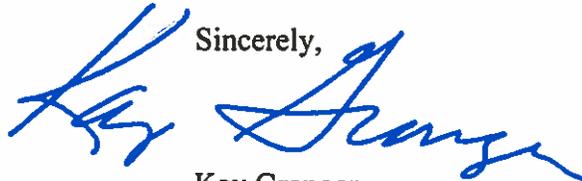

Dear Secretary Foxx,

I would like to express my support for the Texas Department of Transportation's FASTLANE application for the North Tarrant Expressway Segment 3C project, which reconstructs Interstate 35 West from North Tarrant Parkway to Eagle Pass Parkway.

The project includes operational improvements and the addition of two managed lanes in each direction to address current and future travel demands. The project will facilitate the safe and efficient movement of freight and passenger traffic through a region that is experiencing rapid population and employment growth.

I would like to emphasize my support for this regionally and nationally important project which will provide the region with a reliable travel option. The safety improvements to the roadway, bridges, bicycle and pedestrian facilities, and intersections along the corridor will help reduce traffic accidents and improve the highway experiences for all users. Thank you for your consideration of the North Tarrant Expressway Segment 3C project for the FASTLANE program.

Sincerely,

Kay Granger  
Member of Congress

**Congress of the United States**  
**House of Representatives**  
**Washington, DC 20515-4333**

April 8, 2016

The Honorable Anthony R. Foxx  
Secretary  
U.S. Department of Transportation  
1200 New Jersey Avenue SE  
Washington, DC 20590

Dear Secretary Foxx,

As a Member of Congress serving the Dallas-Fort Worth Metroplex, I would like to express my support for the Texas Department of Transportation's FASTLANE application for the North Tarrant Expressway Segment 3C project, which reconstructs Interstate 35 West (IH 35W) from North Tarrant Parkway to Eagle Pass Parkway.

The project includes operational improvements and the addition of two managed lanes in each direction within the project limits to address current and future travel demands and operational deficiencies. The project will facilitate the safe and efficient movement of freight and passenger traffic through a region that is experiencing rapid population and employment growth.

One of the major regional economic areas that the project passes through and would provide congestion relief to is AllianceTexas. This area is an 18,000-acre master-planned, mixed-use community whose cornerstone is the Alliance Global Logistics Hub. The Hub is an inland port that offers multimodal transportation access for freight and passenger traffic, including Class I railroads (BNSF and UP), intermodal facilities, and the Fort Worth Alliance Airport, which is the world's first 100 percent industrial airport specifically designed for cargo, corporate and government aviation. The Hub also has access to multiple Interstate, U.S., and State highways.

The project is well supported and represents a coordinated effort by the Texas Department of Transportation's Fort Worth and Dallas Districts, the North Central Texas Council of Governments, the cities of Fort Worth and Haslet, and Tarrant County. Its completion will provide the region with a reliable travel option that encourages carpooling through the HOV component and include a revenue source for future operational and maintenance costs through the tolling component. Additionally, the safety improvements to the roadway, bridges, bicycle and pedestrian facilities, and intersections along the corridor will assist in reducing traffic accidents and improving the highway experience for all users.

I emphasize my support of this regionally and nationally important project. Thank you for your consideration and hopeful selection of the North Tarrant Expressway Segment 3C project for the FASTLANE program.

Sincerely,

Marc Veasey  
Member of Congress
