

**NOTICE AFFORDING OPPORTUNITY for PUBLIC HEARING
TRAMMEL-FRESNO ROAD: from Vicksburg Blvd to Fort Bend Parkway**

The City of Missouri City, in cooperation with the Texas Department of Transportation (TxDOT), proposes to widen Trammel-Fresno Road from Vicksburg Boulevard to Fort Bend Parkway, in Fort Bend County, Texas.

The proposed project includes the addition of one travel lane in each direction. The inside lanes would be 12-feet wide, and the outside lanes would be 14-feet wide with 1-foot curb offsets. Directions of travel would be separated by a 14-foot wide raised median. Five-foot wide, concrete sidewalks are proposed along both sides of Trammel-Fresno Road. Drainage would be via curb-and-gutter on both sides of the road. In addition, an approximately 3.62-acre detention pond would be built within City-owned right-of-way (ROW) north of Trammel-Fresno Road and approximately 580-feet west of Fort Bend Parkway, adjacent to and south of the City's Mustang Bayou Regional Waste Water Treatment Plant.

No additional ROW would be required for the proposed project, and no displacements would occur. Since the project area of Trammel-Fresno Road would be closed during construction, a temporary detour would route traffic around the site from the Trammel-Fresno Road intersections at Vicksburg Boulevard and Hurricane Lane southward to SH 6. There would be no impacts to waters of the United States, floodplains, parklands, wildlife or waterfowl refuges, recreational areas, or historic or archeological sites. There would be no effect on federally threatened or endangered species or their habitat.

The purpose of this project is to update the operational conditions of the roadway to current design standards, improve connectivity between Trammel-Fresno Road and the local and regional transportation network, and increase capacity to enhance mobility and improve emergency vehicle access. Additionally, this project would continue the improvements to Trammel-Fresno Road that Fort Bend County and TxDOT are making on the east side of Fort Bend Parkway, providing for continuity.

Maps and drawings showing the proposed project location, design, environmental studies, and information regarding tentative schedules for construction of this project are available for viewing online at <http://www.txdot.gov/inside-txdot/projects/studies/houston.html> and at the following locations:

- TxDOT Houston District Office located at 7600 Washington Avenue, Houston, Texas 77007
- TxDOT Fort Bend Area Office located at 4235 SH 36, Rosenberg, Texas 77471
- Missouri City, City Hall located at 1522 Texas Parkway, Missouri City, Texas 77489.

These offices are open Monday through Friday, 8:00 a.m. to 5:00 p.m., excluding city and state holidays.

Any interested person may request that a public hearing be held covering the social, economic, and environmental effects of the project by mailing a written request to the Director of Project Development, Texas Department of Transportation, P.O. Box 1386, Houston, Texas 77251-1386 on or before February 26, 2015. In the event a public hearing is requested, one would be scheduled and notices about the hearing date and location would be published in local papers and mailed to adjacent property owners and elected officials.
