A P P E A R A N C E S

COMMITTEE MEMBERS PRESENT AND PARTICIPATING:

- Rob Stephens, Chair
- John McBeth, Vice Chair
- J.R. Salazar
- Jim Cline
- Joseph Kopser

COMMITTEE MEMBERS PARTICIPATING TELEPHONICALLY:

- Michelle Bloomer

TxDOT PRESENT AND PARTICIPATING:

- Eric Gleason, PTN Director
- Kelly Kirkland, PTN Business Operations Manager
- Josh Ribakove, Communications Manager PTN

SPEAKERS IN COMMENT PERIOD:

- Naomi Chaves, South Plains Association of Governments
- Rina Bale, Permian Basin M.P.O. (Metropolitan Planning Organization)
- Kyle Ingham, Amarillo Regional Planning Commission
- Aida Martinez, South Plains Regional Coordination Advisors Committee

## 1 P R O C E E D I N G S

2 ROB STEPHENS: All right, everyone. Thanks  
3 for coming out to Austin today. My name's Rob Stephens.  
4 I'll chair this meeting today. Let's get started. It's  
5 a little after 1. Call the meeting to order. Let's  
6 begin with Mr. Josh Ribakove with our Safety Briefing.

7 JOSH RIBAKOVE: Hi, folks. Welcome to  
8 TxDOT's Riverside Campus here in south Austin. What can  
9 I tell you. Let's see. If we should need to evacuate  
10 the building for any reason, you'll go out this door,  
11 straight back the door you came in, out to the main  
12 parking lot. Turn right, you'll see an apartment  
13 complex back there. Just go off back to the apartment  
14 complex. That's where we'll all get together.

15 Should there be inclement weather, and  
16 clearly, we're not expecting any today, but if there is,  
17 the place for us to shelter within the building is right  
18 next door, behind that wall, in the main auditorium.  
19 You would just go out either of these two doors and in  
20 the very next one, and that's another windowless room  
21 and that's the place to -- to shelter.

22 Restrooms, closest ones are, again, out  
23 either of these doors, back to the lobby where you came  
24 in, and there are men's and women's rooms there in the  
25 lobby. There's a good cafeteria in this building.

1 You'll find it going out this door and all the way to  
2 the end of the hallway, and you'll see signs for it over  
3 to the left.

4 Austin is a no handheld cell phones while  
5 driving city, and they do enforce on that. It's good to  
6 keep it in mind. There's also some construction going  
7 on on our highways, which you may or may not have  
8 noticed as you came in. And along with that in --  
9 construction goes additional enforcement. Be -- be  
10 aware of the speed limits. I think that's --

11 ROB STEPHENS: Thank you, Josh. Thank you,  
12 very much, for that. Next thing on the agenda is  
13 we'll --

14 JOSH RIBAKOVE: Rob, I want to say one more  
15 thing.

16 ROB STEPHENS: Yes, sir.

17 JOSH RIBAKOVE: I'm sorry.

18 ROB STEPHENS: Go ahead, Josh.

19 JOSH RIBAKOVE: I'm sorry. By the door we  
20 have some sign-in sheets. We also have comment cards.  
21 If you'd like to speak in this meeting, just fill out  
22 one of those comment sheets, pass it over to me, and  
23 I'll make sure that the Committee Chair gets it. That's  
24 all. Sorry.

25 ROB STEPHENS: Yes, sir. Appreciate you,

1 Josh. Thank you, sir. Okay. You guys know how to be  
2 safe and you know how to make comments, so we'll get  
3 started. Number -- the third thing on the agenda is  
4 introduction of members.

5 I'd like to begin -- on the other side of  
6 the table we have two fairly new members. Jim's been  
7 here. Joseph, this is your first time with us.  
8 Appreciate you. Jim Cline and Joseph Kopser join us,  
9 appointed by the Speaker, and they represent the user  
10 and the general public portions of our committee.

11 And I'd like to give -- please welcome them  
12 and please give them a chance to introduce themselves.  
13 Go around the table. We'll start with Jim.

14 JIM CLINE: Thank you. Yeah, Jim Cline.  
15 I'm with Denton County Transportation Authority. Lot of  
16 -- I had 20 years with municipal government. I'm a  
17 Professional Engineer, and 28 years in the National  
18 Guard. I'm retired from the National Guard, not from  
19 the other gig.

20 JOSEPH KOPSER: There might be a theme here.  
21 My name is Joseph Kopser. I spent 20 years in the  
22 United States Army, starting 23 years ago back here in  
23 Texas at Fort Bliss. All throughout that career, a  
24 whole mix of exposure to transportation of all kinds.

25 And then at the end of my 20-year Army

1 career created a company called Ride Scout, which was  
2 designed to make mobility and transportation smoother  
3 for everybody involved. It took me all over the U.S.  
4 but it kept me here in Austin, Texas.

5 And now I just do some private consulting,  
6 but I'm a huge fan of all issues of mobility, and  
7 thrilled to be and honored to be here on the -- is it  
8 officially considered a commission? Or a board? Or a  
9 panel?

10 ROB STEPHENS: Yeah, we're an advisory  
11 committee.

12 JOSEPH KOPSER: An advisory committee.  
13 Thrilled to be a part of it.

14 ROB STEPHENS: Thank you, Joseph. J.R.?

15 J.R. SALAZAR: Yes. My name is J.R.  
16 Salazar. I'm the General Manager of Central Texas Rural  
17 Transit District. It is a middle to large size 5311  
18 agency located in the Abilene/San Angelo area.

19 JOHN McBETH: I'm John McBeth. I am the  
20 President and CEO of Brazos Transit District, and also  
21 the President of the Association of Community  
22 Transportation, and the Vice Chairman of PTAC.

23 ROB STEPHENS: Thank you, John. And,  
24 lastly, my name's Rob Stephens. I currently serve as  
25 your Chair, and I currently GM small, urban in west

1 Texas, in Midland/Odessa, and I've been in the business  
2 for about 25 years now. And someone join us?

3 JOSH RIBAKOVE: No, but Michelle should.

4 ROB STEPHENS: Michelle. Okay. So that --  
5 that's me, I'm Rob. And, Michelle, are you on line?

6 MICHELLE BLOOMER: I am. My name's Michelle  
7 Bloomer. I'm a general public representative and I was  
8 appointed by the Governor. Spent 12 years at the North  
9 Central Texas Council of Governments with transit  
10 funding, planning, regional coordination activities. In  
11 the last four-and-a-half years, I've been on the  
12 operational side, and I'm currently the AVP of Bus  
13 Operations at DPTA.

14 ROB STEPHENS: Thank you, Michelle. Thank  
15 you. Okay, guys.

16 MICHELLE BLOOMER: Thank you.

17 ROB STEPHENS: Yeah, introductions. Through  
18 with introductions. I guess we got staff. You want to  
19 introduce yourself, guys?

20 ERIC GLEASON: Sure. Eric Gleason. I'm the  
21 Director for the Public Transportation Division, and  
22 that division staffs this committee, and look forward to  
23 the meeting.

24 ROB STEPHENS: Thank you, sir.

25 KELLY KIRKLAND: Kelly Kirkland with TxDOT's

1 Public Transportation Division. I'm a Business  
2 Operations Manager and handle data collecting, data  
3 reporting, legislative, and a whole -- whole slew of  
4 ideas and things going on.

5 ROB STEPHENS: Thank you. Thank you, very  
6 much. And you've met the wonderful Mr. Josh Ribakove.  
7 You want to --

8 JOSH RIBAKOVE: Sure.

9 ROB STEPHENS: Go ahead and introduce  
10 yourself.

11 JOSH RIBAKOVE: I'm Josh Ribakove. I work  
12 for Eric in the Public Transportation Division, and I'm  
13 the Communications Manager in that division. Pretty  
14 much get in touch with me and I'll see if I can't find  
15 the person you really want to talk to.

16 ROB STEPHENS: Thank you, Josh. Appreciate  
17 you. Let's move to item number 4, Approval of minutes.  
18 Have you guys had a chance to review those? If you  
19 have, I'll entertain a motion.

20 J.R. SALAZAR: I'll move to approve.

21 ROB STEPHENS: All right. We got a motion.

22 JIM CLINE: Second.

23 ROB STEPHENS: Second. Any discussion? All  
24 in favor.

25 ("Aye" spoken in unison)

1                   ROB STEPHENS: All opposed, same sign.  
2                   Hearing none, motion passes. Got the minutes out of the  
3                   way. That's very good. We'll move to number 5.  
4                   Michelle, do you have something?

5                   JOSH RIBAKOVE: No, I think that was just  
6                   somebody else --

7                   ROB STEPHENS: Oh.

8                   JOSH RIBAKOVE: -- listening in and --

9                   ROB STEPHENS: Okay.

10                  JOSEPH KOPSER: It's Morse code.

11                  ROB STEPHENS: Morse code. Number 5, we'll  
12                  move on to that one. It's the Director's report. I'll  
13                  hand this over to Mr. Eric Gleason, Director of the  
14                  Public Transportation.

15                  ERIC GLEASON: Thanks, Rob. Once again,  
16                  Eric Gleason, Director of Public Transportation Division  
17                  for TxDOT. I have a number of items I want to brief the  
18                  committee on in my report. Some of it we'll get to in  
19                  more detail later on in our conversations today.

20                  The first I'd like to touch on is just a  
21                  quick legislative update. I would invite members of the  
22                  committee to join me in this conversation if they have  
23                  things to add to that.

24                  Very quickly, just focused on issues that  
25                  are near and dear to the work this committee did last

1 year in helping the department prepare its  
2 appropriations request.

3 The appropriations request, as you know, in  
4 the baseline proposal, the baseline request does include  
5 an additional 3-and-a-half million dollars for areas of  
6 the state getting state funding that are over 200,000  
7 but not yet having formed themselves under the transit  
8 authorities.

9 That additional funding, at this committee's  
10 recommendation, was included from the department's  
11 anticipated nondedicated highway fund revenues. It also  
12 includes an exceptional item request, which is not  
13 funded from the department's revenue stream but would  
14 require general revenue.

15 As -- as an exceptional item, I think it's  
16 still -- it's -- I'm not sure how to describe its  
17 status. It is not part of our appropriations request.  
18 It is, I think, in what they call Chapter 11 now, which  
19 means it is an exceptional item and it is recognized as  
20 that, and would need to be -- take action on some member  
21 of the legislature to bring it into the appropriation's  
22 budget.

23 And, finally, House Bill 1140, forwarded by  
24 Representative Watson, Doc Watson, which actually amends  
25 state statute to recognize the -- those urban --

1 urbanized areas over 200,000 that have not formed  
2 transit authority as a -- as a separate and distinct  
3 group qualified for funding. So it would support the  
4 additional dollars that are in the department's  
5 baseline.

6 Those are the legislative issues I was gonna  
7 touch on. I don't know if anyone else has anything  
8 they'd like to add quickly to that.

9 JOHN McBETH: I would add that House Bill  
10 1140 was voted out this morning, early, which is exactly  
11 one week from when we testified for 1140. It was voted  
12 out. The vote was 10-4, one abstention, which is not  
13 unusual. We testified on it first thing last Thursday  
14 morning, 8:00. First time I've been listed at 8:00 that  
15 I actually got to speak at 11 -- at 8:00.

16 Eric and Deputy Executive Director Mark  
17 Williams were there, answered all of the questions that  
18 the members of the committee had, which they -- they --  
19 they had quite a few. But they were pretty much  
20 harmless questions and Eric and Mark answered them  
21 perfectly and assured them the money's there.

22 So this bill will now -- we're unsure where  
23 it's gonna go. It would normally go to local consent  
24 but I think the -- the -- Representative Doc -- Doc  
25 Watson, who's carrying it, wants it over in calendar, so

1 I think it's probably gonna go to calendars. We'll see.  
2 The senate companion to this bill is being carried by --  
3 by Senator Hinojosa, and the number is -- what's the  
4 number on the Senate Bill?

5 FEMALE SPEAKER: 1334.

6 JOHN McBETH: 1334. Senator Hinojosa is  
7 carrying that at the west with Rob, who we -- who we  
8 sent over there with the transit director from Senator  
9 Hinojosa's area. And he was on the -- I guess you would  
10 say too pleased to sign off on this bill; was very, very  
11 happy.

12 So we -- we look for the bill to move pretty  
13 quickly now, once we get some of the other stuff out of  
14 the way. It's -- it's gonna be a good bill, everybody  
15 understood it. There's no -- so far we've encountered  
16 no opposition to this bill whatsoever.

17 ERIC GLEASON: Thank you. Couple other  
18 items to mention. 5310 program, again, we'll talk about  
19 that later today in item 6, but I do want to let the  
20 committee know that our current call for projects  
21 applications were due in on the 15th of March. We got  
22 51 applications, total requests of about 11.3 million  
23 dollars in federal funding for those 51 applications.

24 And we have -- assuming we get full  
25 apportionments this year at some point, and they --

1 roughly what they were last year, we should have about 7  
2 million dollars for the areas of the state under 200,000  
3 in population to make decisions on those 51 proposals  
4 totaling 1.3 million dollars.

5 So it's a typical situation for us to find  
6 ourselves in. We're not, at this point, terribly  
7 concerned about the gap between the (indiscernible).  
8 Just to let you know, those are all in and we are in the  
9 process of beginning to evaluate them.

10 The other -- we had another Call for  
11 Projects on the regional coordination planning. Again,  
12 we have another agenda item for that, but I would let  
13 the committee members know that we received 12  
14 applications. Applications were due this week, on  
15 Monday, the 27th. Received 12 applications.

16 We're asking for just over 1.1 million  
17 dollars in funding, and we anticipate having 5 to  
18 700,000 dollars available for those 12. And I think we  
19 are, in both cases, 5310 and -- and planning, I believe  
20 we're targeting a June commission meeting for those  
21 awards. Again, 53 -- 5310, it's difficult to say,  
22 depending on federal appropriations, how we'll approach  
23 that in June.

24 Two other things I will also mention, that  
25 we have a third Call for Projects out there. The

1 Transportation Alternatives Set-Aside program is  
2 actually a -- a federal highway program for bicycle and  
3 pedestrian infrastructure construction, that began. The  
4 department administers in areas of the state under  
5 200,000.

6 I mentioned this at our January semiannual  
7 meeting, for those of you who attended that transit  
8 provider should attend that. It is -- it's an  
9 opportunity to -- to partner with -- with a local city  
10 or community where you may have a transit facility or  
11 you have well used service.

12 You can partner with them to -- I would look  
13 at it as an opportunity to expand access to your system  
14 through the construction of additional sidewalks and  
15 ramps, those kinds of things, to enable  
16 pedestrian/bicycle access to your system.

17 Now, the program is not designed to supplant  
18 what would normally be funded through an FTA funding  
19 stream, it's designed to add on to that. So we're not  
20 gonna construct a transit center for you with this.  
21 We're not gonna construct a bus stop, and pad, and ramp  
22 in the vicinity of that. But if you want to extend  
23 access to those investments, this program could be used  
24 for that, and so I'll draw your attention to that.

25 These project proposals are due on May 22nd.

1 And we have roughly -- we're actually giving out  
2 anticipated funding amounts through fiscal year '20, so  
3 we're gonna be distributing about 52 million dollars  
4 worth of funding.

5 And, finally, I'll mention our TIGER  
6 project. Those of you who are familiar with it, the  
7 department was successful securing USDOT TIGER funding  
8 for a Rural Transit Asset Replacement Project back in  
9 2015.

10 The total TIGER project is a combination of  
11 TIGER funding, STP flex funding, which the commission  
12 elected to flex from the highway program over to transit  
13 to support fleet replacement needs, and an additional  
14 element of state funding which the commission elected to  
15 add to the project.

16 And it's significant. It's a 36 million  
17 dollar project with all three funding streams, with 16  
18 million of it -- just over 16 million of it being  
19 associated with decisions that the commission made to  
20 bring money that could be used for other purposes to --  
21 to transit. So over 40 percent of that total project is  
22 -- is -- is money like that. So it represents a pretty  
23 good commitment on the part of the department to Rural  
24 Transit Asset Replacement.

25 That is going to help us finish four

1 facilities that were already under construction but  
2 needed additional funding, and replace 325 vehicles in  
3 the rural fleet that were in excess of 130 percent of  
4 the useful life two years ago. So pretty excited about  
5 all that.

6 We are beginning to spend the money down.  
7 We -- we finally executed the grant. We were the first  
8 in the country to execute their 2015 TIGER program  
9 funding, across all modes. First to execute. Executed  
10 in late August of last year. We are -- have expanded  
11 just under 2 million dollars of the total 36 million, so  
12 we are on our way to spending that down.

13 We've got fleet that have arrived. J.R.'s  
14 got fleet he's bought with that money. He's finishing  
15 construction of his facility. We've got major  
16 construction effort out here, CARTS in Austin, just east  
17 of the airport. And we are learning every day that  
18 fleet are rolling in that people have bought. So we're  
19 beginning to see the benefits of that. Excited about  
20 that.

21 That, Mr. Chair, completes my report.

22 JOHN McBETH: If I could, I'd like to make  
23 one comment. Going back to the hearing that we had last  
24 Thursday -- and Eric jogged my memory. At the end of  
25 that hearing, when we were through with our bill, which

1 was pretty quick. We got it all done in about, what,  
2 ten minutes? Pretty fast.

3 On the committee is Larry Phillips, who's  
4 past chairman of transportation and is a current  
5 chairman of another committee. As a matter of fact,  
6 there's five chairs on that transportation committee.

7 But it was real significant, Representative  
8 Phillips asked for -- to make some privileged comments,  
9 and was highly complimentary toward Eric and TxDOT for  
10 work they have done this year, solving a pretty darned  
11 problem up there in northeast Texas.

12 It's -- for a person who's done this for 40  
13 years now, it's very rare that a chairman is that  
14 complimentary to anybody. Particularly, it's rare that  
15 they're complimentary to TxDOT because everybody over  
16 there doesn't like TxDOT. But he was speaking from his  
17 hear. He was very sincere.

18 I know how much work was done to solve that  
19 problem, and it's just a -- it's just a big compliment  
20 when the -- when the committee, and particularly  
21 Representative Phillips, makes comments that are that  
22 positive; and basically said it would've been a  
23 catastrophe if you people would not have stepped in and  
24 ponied up and done your job.

25 So kind of jogged my memory about some of

1 that other stuff y'all have done. And that's -- that's  
2 real -- that was real significant. I wondered about it  
3 for the last four days. I think it's amazing.

4 ERIC GLEASON: Thank you, I appreciate that.

5 JOHN McBETH: It speaks well of what this  
6 department does representing public transportation.

7 ERIC GLEASON: I appreciate that. I will  
8 pass it on to my staff as well. Thank you.

9 ROB STEPHENS: Well deserved.

10 JIM CLINE: Can I ask you a couple  
11 questions?

12 ERIC GLEASON: Sure.

13 JIM CLINE: This --

14 ERIC GLEASON: You bet.

15 JIM CLINE: This group of cities that's --  
16 does not have a transportation authority and is over  
17 200,000 --

18 ERIC GLEASON: Yes.

19 JIM CLINE: -- what's the -- it's got to be  
20 a -- and just help me put a face on that.

21 ERIC GLEASON: Okay. So we've got six  
22 areas, based on U.S. Census, urbanized area designations  
23 that qualify. There's Brownsville, there's McAllen,  
24 there's Killeen, (Indiscernible), Lubbock, and Laredo.  
25 Now, Laredo is a little unique because -- because you --

1 well the first five I mentioned all have urban -- urban  
2 transit districts formed when they were under 200,000.

3 And so -- and -- and so they simply -- when  
4 you surpass the 200,000 threshold per state statute, you  
5 may choose to reform yourself as a transit authority,  
6 and that gives you the ability to go out and ask for  
7 sales tax to support your system, as long as you as a  
8 community have not exceeded or are at your cap already.  
9 So it is not in addition to your constitutional cap. It  
10 has to be within the constitutional cap.

11 And, in many cases, folks just already  
12 there, or significant communities within their service  
13 area are already there and --

14 JOSEPH KOPSER: Already there at their cap?

15 ERIC GLEASON: At the cap. And so, you  
16 know, the -- the minute they form themselves as a  
17 transit authority, they remove themselves from state  
18 funding. So it's kind of a Catch 22 for many systems.  
19 So we have systems who have just gone over and they just  
20 have to reform themselves.

21 Now, our funding formula, which you'll hear  
22 next time, caps the credit they get for population at  
23 199,999. So we don't give them any more credit from a  
24 dollar standpoint if they haven't gone over, but they  
25 still play in the performance pot. And because of their

1 size and density of development, they do very, very well  
2 in the performance pot.

3 These -- and in addition to those six, for  
4 state funding purposes -- and this goes back to the  
5 original conversations in 2006 -- '5 and '6 -- the  
6 Midland/Odessa area, even though treated by the Census  
7 as two distinct urbanized areas, and people don't think  
8 they'll ever grow to come together, for state funding  
9 purposes, the decision at the time was to put them  
10 together as one. They're operated by a single system.  
11 And -- and so they are a seventh member in that group,  
12 from state urban funding purposes that --

13 JIM CLINE: Caps are at 200?

14 ERIC GLEASON: -- are above 200,000.

15 Collectively, those systems -- so there are 30 urban  
16 transit districts that are funded by state funding.  
17 Collectively, those seven take up a third of the  
18 funding. So there's 10 million a year, they take up 3.3  
19 million a year. So it's a pretty big chunk of change.  
20 And so the 3-and-a-half million in the LAR pulls them  
21 out. There's enough money in there that would put as  
22 much as they get now.

23 But by pulling them out with a new set --  
24 set of money, the remaining group, 23 or 24, still have  
25 all that 10 million to divide amongst themselves. And

1 so the real -- the real (indiscernible) here is the  
2 small urbanized areas see a pretty significant increase  
3 in (indiscernible). So it's a big deal. This little  
4 bit of money, just structurally, really has a big impact  
5 (indiscernible).

6 JOSEPH KOPSER: Those other 23 are less than  
7 200,000 people?

8 ERIC GLEASON: They're between 50 and  
9 200,000, which is the FTA -- that's the federal  
10 definition of small urban funding is 50 to 200,000.

11 JOHN McBETH: The seven that are -- the  
12 seven that are in here, into this -- in this category,  
13 all seven of those are at their sales tax cap. They --  
14 for them to be able to pass -- they -- they couldn't  
15 pass a sales tax 'cause they would have to, first of  
16 all --

17 JIM CLINE: Un --

18 JOHN McBETH: -- vote --

19 JIM CLINE: Undo.

20 JOHN McBETH: -- to undo --

21 JIM CLINE: Yeah.

22 JOHN McBETH: -- where that sales tax is  
23 going, and you can imagine how difficult that's gonna  
24 be.

25 ERIC GLEASON: And, actually, Midland/Odessa

1 doesn't even have the option --

2 JOHN McBETH: Yeah. No, they don't.

3 ERIC GLEASON: -- because they're  
4 considered two separate --

5 JOHN McBETH: Two separate things.

6 ERIC GLEASON: -- urbanized areas. And I  
7 would expect that perhaps that could be a conversation.  
8 Nothing in the administrative --

9 JOHN McBETH: Yeah.

10 ERIC GLEASON: -- code right now that  
11 exactly says that we have to do that. That was the  
12 understanding coming out of the policy discussions, you  
13 know, 10, 11 years ago now. So, anyways, there you go.  
14 You asked the question.

15 ROB STEPHENS: Very good.

16 ERIC GLEASON: Got about 30 minutes into  
17 next meeting's presentation. That's good. We'll do it  
18 all again.

19 ROB STEPHENS: Eric, what was that third  
20 Call for Projects on the part where (indiscernible).

21 ERIC GLEASON: That is the -- it's the --  
22 formally known as the Surface Transportation Block Grant  
23 Program, Transportation Alternatives Set-Aside. That's  
24 the federal name for it. It is a program that the  
25 commission, through its rulemaking, elected to use the

1 funding for to construct bicycling/pedestrian  
2 infrastructure in the state.

3 And this is our second Call for Projects  
4 under that program. Now, we -- again, it's rare to say  
5 that under 200,000. On the federal side they go from  
6 5,000 to 200,000 as one group. Not 50 but 5,000,  
7 200,000, and then below 5,000.

8 But, from my mind, it's an opportunity to  
9 partner with cities and others that you serve to expand  
10 the access to your system. Again, not including the  
11 footprint that federal public transit funds would  
12 normally fund, but in addition to that. So to connect  
13 transit center with a sidewalk, to a public destination  
14 to -- you know, to whatever you might need to do. It's  
15 a really good opportunity for that.

16 JIM CLINE: You know, Eric, there's another  
17 piece of that that's in -- that we're -- our agency's  
18 well over 200,000, but what we've seen by building  
19 trails, we bring an added value to our community, 'cause  
20 most of the people that pay for transit never use it.

21 MALE SPEAKER: Right.

22 JIM CLINE: And so you can partner with the  
23 cities to do some things that have a transit benefit,  
24 community benefit, and then you can be a real hero.

25 So --

1 ERIC GLEASON: Right.

2 JIM CLINE: -- that's a -- that's a cool --  
3 you know, in terms of our role in the communities, it's  
4 a big deal.

5 ERIC GLEASON: And -- and -- and to add, at  
6 my very strong recommendation at the operator's meeting  
7 was that y'all not propose a project yourselves because  
8 you're gonna have to learn an entirely different set  
9 of --

10 ROB STEPHENS: Right.

11 ERIC GLEASON: -- rules on the highway side  
12 about how to manage projects. But to go with a local  
13 partner who's familiar with that as opposed to  
14 introducing that to your shop as well, I would not.

15 ROB STEPHENS: Agreed. Thank you, sir.

16 ERIC GLEASON: Yeah.

17 ROB STEPHENS: Okay. Any -- any questions  
18 for Mr. Eric Gleason on his Director's report? Any  
19 comments, questions?

20 JIM CLINE: I had one question, Eric. I  
21 don't know -- you mentioned the fleet replacement. Have  
22 you heard --

23 ERIC GLEASON: Yes, sir.

24 JIM CLINE: -- or do you know if there's any  
25 systems that are having troubles procuring their buses?

1                   ERIC GLEASON: No, everyone -- actually,  
2                   virtually -- well, the vast majority of people are going  
3                   right to the Comptroller's site and buying it, which is  
4                   great. And Paul was letting me know the other day, they  
5                   actually have a good medium duty option on there as  
6                   well.

7                   And one of the things we're seeing is people  
8                   opting to go more medium duty, I think with the notion  
9                   that the vehicle will last longer and, you know, that  
10                  the -- the additional expense is more than worth it,  
11                  given the additional life expected.

12                  When we did the project proposal back in the  
13                  spring of 2015, we identified 325. And just a straight  
14                  out replacement was 325, broken down to vans and, you  
15                  know, sort of five-year life cycle, seven-year life  
16                  cycles on vehicles. That's shifted, as you might  
17                  imagine, over those two years.

18                  And so we're now buying 290 replacement  
19                  vehicles. So we're gonna retire 325 but we're gonna buy  
20                  290 new ones. And average cost per unit's a little  
21                  higher than it was two years ago, makes sense. And  
22                  also, people are opting for fewer vans and more the  
23                  longer life deals.

24                  So we're kind of seeing both those working  
25                  to reduce the number of vehicles being purchased for

1 every bit as much money, but I think in general with a  
2 longer life cycle associated with that aspect.

3 JIM CLINE: Okay.

4 ROB STEPHENS: Good.

5 ERIC GLEASON: How'd I do? I'm testing that  
6 out to try on the FTA. How'd that sound? It sound like  
7 that might work?

8 JOHN McBETH: It sounded better than when  
9 you explained it to me. Getting pretty good. You just  
10 need one more person to ask you that question.

11 ROB STEPHENS: Fine tune. Fine tune.

12 ERIC GLEASON: All right.

13 ROB STEPHENS: All right. We'll -- we'll  
14 move on, if you guys are ready to do that. Move on to  
15 item number 6, which is the Review and Discussion of  
16 areas of Texas Administrative Code under consideration  
17 for 2017 rulemaking efforts. Detailed discussion on  
18 Federal Transit Administration Section 5310 and 5339  
19 programs. Mr. Gleason.

20 ERIC GLEASON: Yes. Okay. So at our last  
21 meeting we described to the committee that we were going  
22 to embark on some rulemaking over the next eight to ten  
23 months, largely triggered by either necessary changes in  
24 federal regulations or the opportunity in our  
25 appropriations request with the additional funding would

1 require that we go in and make some modifications to our  
2 formula rules.

3 So what I want to do today, we'll start this  
4 conversation today, and I'll talk a little bit about  
5 context and some schedule, and then we'll talk about  
6 what we need from the committee. The handout which you  
7 receive in your packet will give you an overview.

8 So we identified for you -- starting on page  
9 two here, we identified for you back in January four  
10 programs that we felt we needed to come to this  
11 committee with for a discussion on -- on rules. And for  
12 the newer members, the commission relies on this  
13 advisory committee very heavily to reach a consensus and  
14 to advise the staff accordingly on rule changes.

15 And there is history, I think, and I --  
16 hopefully people like Michelle, and J.R., and Rob will  
17 validate this. We have a history, I think, as a  
18 department in responding to this committee's advice and  
19 recommendations in the development of those rules. So  
20 we have four areas of rules. You see them here on -- on  
21 page two.

22 We're gonna talk about the first two  
23 bulleted items today. The last two, which are the ones  
24 that really, I think, challenge us as a group are  
25 formula related, and those will come later on. And

1 we'll talk about schedule here. The next slide talks  
2 about schedule. So let's -- let's talk this through  
3 from a number of different levels.

4 Before we get into this specifically, the  
5 department, as a rule, does not -- does not do  
6 rulemaking during the legislative session. It's just  
7 generally not a good idea to open up your administrative  
8 rules during the session, have a potentially heated  
9 conversation, difficult conversation with issues about  
10 that while -- while folks are in session. So, as a  
11 matter of practice, we don't do that.

12 So what we'll be doing to respect that  
13 practice as a committee is we will be talking with you  
14 conceptually, if you will, without putting formal rule  
15 change language in front of you until after the session  
16 has ended.

17 So the way we get there is -- you'll see  
18 that -- here we are today. We're gonna review with you  
19 5310 and 5339 rules on concept level. And what we mean  
20 by that and what we need from the committee during that  
21 discussion, we're gonna identify issue areas that we  
22 think need changes.

23 We're gonna walk you through a discussion of  
24 those areas, and hopefully prompt a conversation among  
25 committee members about things you are interested in,

1 insights you might have for us to accommodate in our  
2 proposed rule changes.

3 We do not need the committee to take formal  
4 action on this discussion. If the committee desires to  
5 take action, you certainly can. What -- what we need,  
6 what we would like to be able to do, though, is to leave  
7 this meeting with enough of a conversation where we feel  
8 as though we can reflect the intent of the committee  
9 when we draft proposed rules.

10 So that approach is truthful this meeting  
11 and it will be truthful our next meeting in late May,  
12 early June. Yes, sir.

13 MALE SPEAKER: (Indiscernible) that folks  
14 are having a hard time hearing a little bit on the  
15 phone. We're wondering if it's possible that I could  
16 ask you and Joseph to switch spots to get you closer to  
17 it, because we're a limited amount of length of cable.  
18 Sorry about that.

19 JOSEPH KOPSER: No.

20 MALE SPEAKER: You'll be good for --

21 JOSEPH KOPSER: It's a good call.

22 MALE SPEAKER: -- (indiscernible) and for  
23 Michelle.

24 ERIC GLEASON: I'll take my sunglasses.

25 JOSEPH KOPSER: Your future is so bright,

1 Eric, that's what I heard the commissioners say.

2 FEMALE SPEAKER: (Indiscernible) the air  
3 conditioner.

4 ERIC GLEASON: Okay. Can you hear me now?  
5 All right. So -- go ahead, please. That's yours, yeah.  
6 I won't -- I won't repeat myself. We'll just carry on.  
7 Okay. So I want to point out to the committee, the July  
8 semiannual operator's meeting, which is a little earlier  
9 this year than it typically is, July 12th. That is a --  
10 we're gonna take advantage of that opportunity on the  
11 agenda there and spend a lot of time at that operator's  
12 meeting talking about these rule changes.

13 Again, we won't be showing them language  
14 change but we'll be walking them through at the same  
15 level or greater level of detail, the same information  
16 we're going over with you in the next two meetings, to  
17 give that group an opportunity to give us some feedback.  
18 And then we'll get back with you two weeks after that  
19 with proposed rules.

20 So that will be the first time this  
21 committee will see proposed rules. And we are focused  
22 on going to the commission in August. And the way the  
23 commission does rules is they first adopt a proposed set  
24 of rules. That triggers a formal public comment period  
25 on those proposed rules. And then they come together

1 again at a subsequent meeting to adopt final rules.

2 So -- and, again, this committee will -- we  
3 will give the committee an opportunity, before we  
4 recommend proposed rules, to review what we're doing.  
5 We will make changes that we can based on conversation  
6 here, and then we will also provide the committee with  
7 an opportunity and the benefit of public comment to  
8 review a final set of rules.

9 And the committee is, in both cases, welcome  
10 to form a recommendation of its own, to present to the  
11 commission as a part of that process. So any questions  
12 on that?

13 So, you know, we're not done with this until  
14 -- in October -- or no, we're not done with it until the  
15 December commission meeting, so it -- it can stretch on  
16 us. And -- but the idea would be have these new rules  
17 in place, one, as soon as we can, and two, before FY '18  
18 federal funding became available. Any questions on  
19 schedule? Okay. And we can always come back --

20 JOSEPH KOPSER: Is it going to be as  
21 exciting as it sounds?

22 ERIC GLEASON: Yes.

23 JOSEPH KOPSER: All right.

24 ERIC GLEASON: Now, you remember, Joseph, I  
25 warned you about this. All right. Now, so our first

1 program we're going to look at is the 5310 program, and  
2 that is a formula grant program that the department  
3 administers in areas of the state under 200,000. It is  
4 the federal program with grants for enhanced mobility of  
5 seniors and individuals with disabilities.

6 Now, we as a committee -- this committee,  
7 the last time you looked at rules was several years ago  
8 in conjunction with federal authorization known as  
9 MAP-21. That was for federal fiscal years '13 and '14.  
10 And this program had some pretty significant changes  
11 under MAP-21 that were carried through and into the  
12 current authorization FAST Act.

13 At the time that MAP-21 came out, and  
14 lacking federal guidance, because it was a couple years  
15 before we actually got federal guidance on the programs,  
16 we took some actions as a committee, anticipating  
17 certain elements of the new program that while largely  
18 on point, it is clear to us at this juncture we can  
19 update our rules to better reflect our understanding of  
20 the intent of the federal changes.

21 So -- and those areas to update have to do  
22 with project types. One of the significant things that  
23 happened with a change at the federal level was -- and I  
24 think it was triggered by a decision to allow a portion  
25 of this program to be used for operating; historically

1 operating side.

2 So at the federal level they distinguish  
3 funding uses. You can use it on capital infrastructure  
4 asset type things or day-to-day operations.

5 JOSEPH KOPSER: Yeah.

6 ERIC GLEASON: And this program historically  
7 had been limited to capital. And it was -- in MAP-21  
8 they allowed for the first time the use of the  
9 operating. And I think in conjunction with that there  
10 was a desire to preserve not only a -- a minimum level  
11 of capital investment, a traditional level of capital  
12 investment but to also make sure that traditional  
13 program applicants and recipients were preserved as  
14 well, and that, you know, the -- the abilities operating  
15 somehow introduce a shift in some of the traditional  
16 nonprofit agencies getting a share of these funds for  
17 the target population.

18 So with that in mind, there was some -- we  
19 need to do some things on the types of projects. We  
20 need to clarify elements of our administrative code with  
21 respect to who's eligible to apply for traditional  
22 projects. And then we here in Texas have introduced  
23 some changes to our project selection process that need  
24 to be reflected in the code as well.

25 There's no linear way to go through this

1 that the -- there's a relationship between who's  
2 eligible to apply and a traditional versus  
3 nontraditional project. And so it gets a little mixed  
4 up, I think, as we go through, and I'll be glad to  
5 answer questions as we go along.

6 A little background on the program itself.  
7 We get funds for areas under 200,000. We get a certain  
8 amount of money for those areas between 50,000 and  
9 200,000, and areas under 50,000. Together it's about 7  
10 million dollars a year.

11 We have a formula that allocates it by TxDOT  
12 district. We have 25 districts. And so it's a  
13 combination of every district getting a certain amount  
14 and the same amount, and then above and beyond that  
15 amount, it's based on their share of the target  
16 population. And then within each district we have a  
17 competitive process to award projects.

18 This gives you a sense of where those funds  
19 went last year, how they were used last year. And to  
20 kind of introduce you to these categories, start on the  
21 right-hand side, fleet. Fleet is fleet. That's pretty  
22 straight forward.

23 Purchase of service, this is actually, you  
24 know, when -- when we give money to an agency and they  
25 go contract with someone else or enter into an inner

1 agency contract with someone else for the provision of  
2 service, that's called a purchase of service. And in  
3 that context is considered to be a capital investment,  
4 which means that 80 percent of the expense of it can be  
5 charged up against the grant\*40:49.

6 Operating investments are 50/50. So a large  
7 share of this 40 percent of it, purchase of service,  
8 that has actually been kind of -- that has been an area  
9 of growth for the program in the last several years.  
10 We've seen more of that.

11 Operating, we can go as high as almost 45  
12 percent for operating, but we only use 8 percent. So  
13 the problem with the operating is -- 50 max just means  
14 you need more local money to actually use the federal  
15 dollars, and it's just not there. We have a small  
16 amount of money going into IT investments, software,  
17 dispatching programs, things like that.

18 And then mobility management can be a very  
19 broad category. We tend to limit this to projects that  
20 enable individuals to make a connection to a transit  
21 service. So hook people up with transit options in  
22 their community, try to limit this to projects that have  
23 a direct impact on system utilization.

24 And then preventative maintenance limited to  
25 fleet purchase with this program that preventative

1 maintenance is also an eligible capital expense. That's  
2 the breakdown from last year's, just to give you a sense  
3 of what the program does.

4 Page seven, these are some typical people we  
5 give -- typical agencies we give money to. In 2016, 17  
6 transit districts got it, 17 health and human service  
7 agencies. Some of them may have turned around and then  
8 used a purchase of service agreement with a transit  
9 district with their funds. Private nonprofits, eight,  
10 and a private taxi, one. All right. Any questions on  
11 that so far?

12 So I mentioned traditional projects. So the  
13 FAST Act, which is the current authorization, requires  
14 that at least 55 percent of the funding of this program  
15 be allocated to what it calls traditional projects. And  
16 there's a list here of five areas that traditional  
17 projects fall under. They're all capital. You  
18 recognize some of these from the pie chart you just saw.

19 And then, if you -- if you take the next  
20 page, it says and of the total group of eligible  
21 sub-recipients for this program, there's a subset that  
22 are only to apply for this money.

23 So if you take page 8 and lay it up next to  
24 page 9, this is where the federal program, the federal  
25 folks tried to marry and preserve traditional

1 participation in this program with traditional project  
2 investment while they allowed operating money to come  
3 into the program for the first time.

4 And if you look at page 9 and you look at  
5 the eligible sub-recipients per traditional Section 5310  
6 projects, private nonprofit organization or state or  
7 local government authority that is approved or certified  
8 to do one of the following things. That's straight out  
9 of the federal circular. We haven't paraphrased it.  
10 It's what it says.

11 Now, I will say there's some ambiguity in  
12 understanding exactly what this means at the federal  
13 level. You go ask the feds for clarification, you won't  
14 get it. It's ambiguous. And that's not uncommon. They  
15 leave it up to us to come up with a proposal that they  
16 will choose to concur with or not.

17 So, examples. So what's -- what's an  
18 example of a private nonprofit that we have grant  
19 relationships with. Centers for independent living.  
20 The big one. We do a lot of work in this program, the  
21 centers for independent living from voucher programs to  
22 travel training, what have you.

23 Senior nutrition centers, adult day health  
24 centers. Those are all three examples of agencies with  
25 whom we have existing agreements for use of this program

1 funding.

2 This next group, a state or local  
3 government. Here are some examples, on page 11, of what  
4 that means. And you'll see that the fifth category,  
5 Public Transit Providers.

6 And we -- you know, if you were to marry up  
7 the circular language and look at the bulleted point  
8 about coordinating services for seniors and individuals  
9 with disabilities, we believe that Chapter 461 that  
10 speaks to the need for coordination between Health and  
11 Human Services and transit providers is the -- the --  
12 the -- the authorizing legislation that allows us to  
13 include public transit providers on this list of  
14 eligible recipients for traditional projects.

15 This sounds hopelessly complicated. What it  
16 boils down to for a rule change for us is our current  
17 administrative code, while we believe it is sufficiently  
18 written to enable us to carry out this program, we think  
19 it can be better, and one area of it is that our current  
20 administrative code identifies transit providers as the  
21 primary recipient for this program funds.

22 And we are going to be looking at rules that  
23 remove the primary position of transit, and just sort of  
24 bring everybody down into that parallel level of  
25 opportunity between transit and nonprofit, and others

1 who are eligible to apply for this traditional project  
2 funding. Very -- very straightforward change, but for  
3 those of you who have been involved in this conversation  
4 for several years, it's pretty significant.

5 The final area, again, if you go to page 12,  
6 Nontraditional Project Programs. So a lot of noise made  
7 about these -- this program funding being available for  
8 operating. So less than 45 percent can be spent on  
9 nontraditional projects. This is also the portion of  
10 the program that we take our -- we take our  
11 administrative program expense out of.

12 So the entire 45 percent is not available  
13 for operating. That is the part of the program we take  
14 our administrative program expenses out of. And I think  
15 -- Kari, what are we at with that? Do you know where  
16 we're at, in terms of percent?

17 KARI BANTA: We take the full 10 percent.

18 ERIC GLEASON: We take 10 percent. We're  
19 allowed to take 10, we take 10, okay. Not so much true  
20 on the rule side. With 5311 we take 3 or 4 percent  
21 more, and I think we can take 10 or 15 percent. But in  
22 this instance, this program does take a lot of care and  
23 feeding, so we take the entire 10 percent.

24 So that leaves, what, 35 percent of the  
25 overall program amount available for nontraditional

1 projects. And you can see here, you know, the kind of  
2 things that can happen with that.

3 So the administrative code also lists all  
4 the different kinds of capital projects that we will  
5 find. And I will tell you while this list looks  
6 comprehensive, the federal language is even more broadly  
7 written to anticipate anything that might qualify as a  
8 capital investment.

9 This -- this is actually a limiting list  
10 over what's allowed in the federal program language. So  
11 we're not recommending any change to this part of the  
12 program. It's pos -- other states limit and focus the  
13 investment that this program does. Some states just do  
14 fleet, and the federal program is even more broadly  
15 construed.

16 So, you know, it's an opportunity. We're  
17 not recommending or think anything needs to change about  
18 it, but if we would -- we included it just so you could  
19 see the range of specific capital investment that the  
20 department entertains for funding as a part of this  
21 program.

22 So, so far the only change we're tracking in  
23 this of substance is the change to the current wording  
24 that identifies trans providers as the primary recipient  
25 of this program funding.

1                   Slide 14, the update focus project selection  
2                   process. Two things we are doing differently than we  
3                   have before, we -- historically we formed stakeholder  
4                   groups at the district level and used those groups to  
5                   help us interpret public comment, and involvement, and  
6                   score projects.

7                   What -- and that -- that approach kind of  
8                   ran its course several years ago when it just became  
9                   almost impossible to find in some areas of the state  
10                  people to participate as stakeholders. What we do now  
11                  is we have merged public workshops with stakeholders --  
12                  stakeholder engagement. We do it all at once.

13                  We're working with the department's public  
14                  involvement program to get out and hold these workshops.  
15                  We've held 17 workshops in conjunction with this last  
16                  effort. I think we had well over 200 people attend  
17                  those 17 which is, for us, a big bump in participation.

18                  JOSEPH KOPSER: Is that total?

19                  ERIC GLEASON: Yes, sir. I know it doesn't  
20                  sound like a lot with a state the size of Texas, but  
21                  it's big for this program. So -- and it's -- given our  
22                  target audience, it represents its own challenges in  
23                  terms of our ability to -- to communicate with them.  
24                  Project scoring, we used to ask stakeholders to do that.

25                  We don't do that anymore. The scoring's

1 actually being done here with the help or our field  
2 staff, and -- and we will make those decisions on  
3 scoring and funding here as opposed to using  
4 stakeholders to help us with that.

5 And that was -- that was becoming  
6 problematic anyways because the stakeholders would in  
7 fact be a part of the proposal and they would have to  
8 recuse themselves, or they wouldn't. So we think all of  
9 these improvements are good. So you will see some  
10 changes in the program language there.

11 I'm gonna stop there. Kari Banta -- Kari,  
12 you want to waive your hand? Kari is here. She is the  
13 5310 program manager. She is a subject matter expert.  
14 I would ask her to join us at the table, if the  
15 committee has specific questions of her at this point or  
16 any thoughts in anything I've said.

17 Mr. Chair, it's open for discussion --

18 ROB STEPHENS: Okay.

19 ERIC GLEASON: -- at this point.

20 ROB STEPHENS: Come on up here, Kari. First  
21 of all, Michelle, you still with us?

22 MICHELLE BLOOMER: I'm still here.

23 ROB STEPHENS: Okay. Want -- wanted to give  
24 you an opportunity, you know, to -- if -- if you'd like,  
25 to -- if you've got comments or questions for Ms. Kari

1 or Eric. If you have any, please -- please offer them.  
2 Okay. Anyone else here?

3 MICHELLE BLOOMER: Sorry, Rob, were you  
4 wanting me to go first --

5 ROB STEPHENS: Yeah.

6 MICHELLE BLOOMER: -- or you just opening it  
7 up to everybody?

8 ROB STEPHENS: Well, I'm opening it to up  
9 everybody, but I wanted to be kind to you, because I  
10 didn't want to wait till the end and forget about you.  
11 So if -- and that's what usually happens to me,  
12 Michelle, so I'm sorry. But if you're ready, yeah, I'd  
13 like to take your comments first, if you got any. I'll  
14 circle back around if you're not ready.

15 MICHELLE BLOOMER: I know I'm easily  
16 forgettable. Sometimes --

17 ROB STEPHENS: No --

18 MICHELLE BLOOMER: -- so quiet.

19 ROB STEPHENS: No, you're not. I just get  
20 going and forget. But if you're not ready, I'll circle  
21 back around and catch you at the end. I just wanted to  
22 offer you the opportunity --

23 MICHELLE BLOOMER: Well, I'm ready. I have  
24 one comment and one question. I'm just gonna make the  
25 comment and move on. On the cover page, the photo on

1 the far right. That's all I'm gonna say. And then I  
2 had a question --

3 ERIC GLEASON: You're not supposed to know  
4 that much about the picture, Michelle. You are not  
5 supposed to know --

6 MICHELLE BLOOMER: Unfortunately, I do.

7 ERIC GLEASON: Well, you'll keep that to  
8 yourself.

9 MICHELLE BLOOMER: My question, the  
10 transition -- the main transition for the 5310 program  
11 is to remove the wording that transit providers are the  
12 primary recipients of the funds, correct?

13 ERIC GLEASON: That's correct.

14 MICHELLE BLOOMER: Okay. So my thought --  
15 question was, why does PTN think that is a positive  
16 move? Why is that being proposed, I guess.

17 ERIC GLEASON: It's being proposed because  
18 we believe it is language then that would be more  
19 consistent with the intent of the program at the federal  
20 level.

21 Everything that we've been led to believe,  
22 based on conversations we've had beginning back in FY  
23 '14 and '15, and through now, all the guidance we've  
24 been given, all the recognition we've been given for our  
25 program and the things we have done leads us to

1 believing, with a high level of certainty, that sort of  
2 leveling that playing field is -- is completely  
3 consistent, even in the context of some ambiguity.

4 It's completely consistent with the intent  
5 actually and improvement closer to the intent of the  
6 federal program at this time.

7 MICHELLE BLOOMER: So that -- that language  
8 that has a transit provider, the primary recipient of  
9 the funds, that's not language that came specifically  
10 out of the federal guidance?

11 ERIC GLEASON: That is correct.

12 MICHELLE BLOOMER: Okay. So that was just  
13 TxDOT's interpretation at the time.

14 ERIC GLEASON: Well, it was -- yes. It was  
15 this advisory committee's interpretation at the time as  
16 well.

17 MICHELLE BLOOMER: Okay. That's all. Thank  
18 you.

19 ERIC GLEASON: Uh-huh.

20 ROB STEPHENS: How about you guys?

21 JIM CLINE: I have one question. Kari, we  
22 mentioned that the traditional provider used to be  
23 transit district, and we're making changes intact to  
24 clear that up, if you will. But I guess my question is  
25 -- and I know that some of my neighboring providers have

1       opted to not join the 5310 game, if you will.

2                       When we talk about the 17 transit districts,  
3       I wonder where that compares to three or four years ago  
4       where there used to be a lot more transit districts that  
5       applied for 5310 funds. So I don't know if you know  
6       that. And if you don't know it, if you could get it to  
7       me, I sure would like to know that.

8                       KARI BANTA: Certainly. This is Kari Banta.  
9       There are, I believe, three or four who no longer  
10      participate in 5310 by choice. Among the reasons that  
11      have been cited are the limitations in funding available  
12      in the program compared to the amount of effort it takes  
13      to prepare an application, and that's something that's  
14      across the board for everyone.

15                      JIM CLINE: Okay.

16                      ERIC GLEASON: And, Jim, just to be clear,  
17      the group -- so we have 17 transit agencies and we have  
18      17 health and human service providers. And given our  
19      emphasis in the current program of a partnership between  
20      trans providers and health and human service agencies,  
21      in fact, transit agencies are eventually receiving funds  
22      through a purchase of service agreement.

23                      I think possibly one of the major  
24      distinctions will be the -- you know, the amount of  
25      funding spent on fleet, for example, which may have been

1 higher historically, particularly since we've seen the  
2 growth in the purchase of service area. But we can come  
3 back in a couple years and look at -- at the breakdown.

4 ROB STEPHENS: Go ahead, Joseph.

5 JOSEPH KOPSER: Quick question. So as I  
6 understand 5310 and how it's designed for the purpose of  
7 administering these funds for large cities that are not  
8 a part of this, they cross this, U.S. as well as some  
9 here in Texas, beginning to partner with new  
10 nontraditional technology based transportation providers  
11 who are extending their service, especially in, you're  
12 talking, low dense areas and routes of not large number  
13 of population of people;

14 Are those funds inside this eligible for  
15 these, either transit agencies or the -- the HHS  
16 agencies and the nonprofits, are they able to use these  
17 funds in partnership with these new business models that  
18 are out there?

19 ERIC GLEASON: Yes. There are examples of  
20 that. And so it depends of the specific application and  
21 structure of the agreement. Just to clarify, we get --  
22 we get funds for areas under 200,000. The large metros,  
23 the over 200 get their funds directly.

24 JOSEPH KOPSER: Right.

25 ERIC GLEASON: So they get these funds, too,

1 for the same purposes, they just get to administer to  
2 them in a way they choose.

3 JOSEPH KOPSER: Right.

4 ERIC GLEASON: But you've touched -- I mean,  
5 there is -- you know, we have these segregations and  
6 thresholds, and -- and travel does not respect those.

7 JOSEPH KOPSER: Correct.

8 ERIC GLEASON: And so we have that kind of  
9 need to blend, and cross, and integrate. And -- but,  
10 yes, those kinds of applications are possible to -- to  
11 do.

12 JOSEPH KOPSER: Okay.

13 ROB STEPHENS: Yeah. Go ahead, Jim.

14 JIM CLINE: Just -- just a thought, a  
15 transition, if it moves more from the public transit  
16 provider who's a little bit more familiar -- probably a  
17 lot more familiar with how to do the federal funding and  
18 manage those things, and do all that type of effort to  
19 transition to a charitable cause, which is not a bad  
20 thing.

21 But if there -- there could be a period of  
22 time when you could actually have a dip in service  
23 because of inability to manage some of those processes  
24 or make decisions on fleet versus operating balance. It  
25 -- it seems like maybe it ought to have something where

1 it's encouraged to work with a transit provider or some  
2 -- something --

3 ERIC GLEASON: We actually do encourage  
4 that --

5 JIM CLINE: Okay.

6 ERIC GLEASON: -- in our -- in our call. We  
7 do encourage those kinds of partnerships, in part  
8 exactly for that reason. And I will say, you know, this  
9 program traditionally has been the source of numerous,  
10 sort of, other kinds of agencies receiving our funding  
11 and struggling with what you just described.

12 And over the years we have significantly  
13 reduced the numbers of different kinds of people and  
14 agencies we give funding to. But -- but that is  
15 something that does happen. That is why we do encourage  
16 the partnerships and why you see so many partnerships  
17 there with the health and human service agencies that go  
18 in to purchase the service for exactly that reason.

19 We're also not supposed to be giving money  
20 to funds to agencies that limit the use of their  
21 services to their clientele. I mean, this is -- you  
22 know, we're not -- you know, it's supposed to be  
23 available for this general target population, not just  
24 the population that comes to the senior center. That's  
25 who we get the money for.

1                   And it's easier to manage that, honestly.  
2                   It's easier to manage that through a partnership with  
3                   the health and human service agency and the pro -- the  
4                   transit provider (indiscernible).

5                   J.R. SALAZAR: To your point, Jim, you're --  
6                   you're correct. That happens with what we're doing now.  
7                   In our area we get a lot of phone calls, e-mails about  
8                   how do you do this, what -- TxDOT this, how do you do  
9                   that.

10                  And so we have been helping those in our  
11                  area to accomplish that but it is not as easy as what  
12                  people think it is because what -- what happens is they  
13                  see that there's money available, and yes we'll apply  
14                  for the money and we'll get the money but then we don't  
15                  know how to abide by all the TxDOT contractual. So it  
16                  is an issue.

17                  JIM CLINE: And just -- for the -- in the  
18                  over 200,000 world we're facing the same drill. I mean,  
19                  in terms of first dibs, you know, the non transit  
20                  providers.

21                  ROB STEPHENS: Yes.

22                  JIM CLINE: So that's just...

23                  KARI BANTA: May I make a comment related to  
24                  this? This is Kari Banta. Jim, one of the things we  
25                  consider before doing a 5310 award is the financial and

1 managerial capacity of the agency. So this is much less  
2 targeted at smaller agencies who -- who would have  
3 difficultly managing a federal award.

4 JOHN McBETH: This is John. We... We  
5 basically are the railroad baron in our area. And  
6 anyone that wants one of these vehicles comes through  
7 us, and this is in 17 counties. And they -- they  
8 understand. They're -- they're -- there's -- they're --  
9 they're very intensely vetted.

10 If we're ever willing to place a bid, we've  
11 got to know what you're doing, who you're gonna carry,  
12 are you open to carrying other people when you're not  
13 carrying -- you're not gonna get a vehicle and then use  
14 it in the morning, and use it an hour in the afternoon,  
15 and park it all the rest of the day, 'cause we're not  
16 gonna let you have a vehicle.

17 And then we have the rules that we explain  
18 to them that you're gonna be required to put a minimum  
19 of 12,000 miles a year on this vehicle. Minimum.  
20 That's the minimum. If we see that you're not gonna do  
21 that, we're gonna come talk to you about it one time.  
22 The second time, we're just gonna snatch the vehicle up  
23 and give it to somebody who does, because there's a lot  
24 of competition, in our particular area, for these  
25 vehicles when they come available.

1                   But the managerial, as you pointed out, the  
2 managerial ability of a large transit district to  
3 basically incorporate what J.R. was talking about,  
4 incorporate all the paperwork and everything you've got  
5 to do to get these vehicles, track the vehicles, make  
6 sure they're maintained.

7                   A little, bitty nonprofit corporation --  
8 we've got a couple of really well developed ones in our  
9 area -- but even they find this very difficult, so we do  
10 it for them. And they basically -- they -- we do  
11 everything. We -- we -- we -- we by the vehicle,  
12 inspect the vehicle, tell them -- they tell us what  
13 we're gonna inspect it. We buy it. We place it with  
14 them. We monitor it. We check it out to make sure it's  
15 maintained.

16                   I would like to see something in the -- in  
17 here that while we take primary out that we put  
18 something in there, because it is the -- it is your  
19 policy to encourage going through the larger agency.  
20 I'd like to see something put in there that says TxDOT  
21 encourages these -- these nontraditional and traditional  
22 to go through their rural transit district.

23                   ERIC GLEASON: Okay.

24                   JOHN McBETH: Like J.R. said, in our area,  
25 no one -- when they come to talk to us and we -- we --

1 we open up the application, we print it out on the  
2 computer. We say, okay, here you go. Do you do this.  
3 Do you do that. Can you -- can you sign all of these.  
4 It just -- it drives -- it drives -- what? We just --  
5 we just want to money.

6 And it's like J.R. said, everybody looks at  
7 it and says, oh, wow, we can buy a bus.

8 J.R. SALAZAR: 12,000 miles a year isn't --

9 JOHN McBETH: It's not enough.

10 J.R. SALAZAR: It's not enough, is it.

11 JOHN McBETH: When we started out, 8,000  
12 miles a year. Every year we've increased it. It's  
13 probably now up to 15,000 miles a year.

14 ROB STEPHENS: Thank you, guys.

15 MICHELLE BLOOMER: This is Michelle. Can I  
16 ask a question?

17 ROB STEPHENS: Yes. Please go ahead,  
18 Michelle.

19 MICHELLE BLOOMER: I just have a follow up  
20 question for John. I know he mentioned how it works in  
21 his area previously. So how does that -- how (telephone  
22 cutting out) agency serving as sort of the overarching  
23 entity it can't -- general public EMD service. I mean,  
24 if you're giving a vehicle to agency "X," what type of  
25 service are they providing? Are they providing service

1 for their customers only, or is it general public  
2 transportation?

3 JOHN McBETH: Good example would be the  
4 local community mental health and mental retardation  
5 centers where we have vehicles placed in three different  
6 areas in our region. They are using the vehicles  
7 because they operate 24-hour a day group living centers.  
8 They're using their vehicles to transport their people.  
9 But during the day they are also using those vehicles to  
10 transport clients to and from sheltered workshops.

11 And then, if they have spare time and they  
12 make us aware of it, we actually will give them some of  
13 our ADA transit and pay them to carry those people.  
14 It's a fee for service thing. They could actually get  
15 money back. And we pay for that either out of our 5307  
16 or 5311 program.

17 And this is a program that -- we've been  
18 doing this -- actually, before I even came to Brazos  
19 Transit in 1982, I worked at the community MHMR center,  
20 and we began doing this with Brazos Transit at that time  
21 when they bought us the vehicles under the old 16-B2  
22 program, and then funded our operating deficit with  
23 their Section 18 program. So the reason ours is so well  
24 developed is we've been doing it since basically 1979.

25 And we --

1 MICHELLE BLOOMER: I guess my concern in --  
2 in areas that don't have a system similar to that, I  
3 know in the north central Texas area, my -- my concern  
4 with removing the primary is we're opening it up, and I  
5 don't want to see us go back to where we were 10, 12  
6 years ago where we were funding private nonprofits with  
7 four vehicles that would sit there, just used Monday  
8 through Friday in the a.m. and the p.m., when those  
9 assets could be better utilized on the public  
10 transportation side, and more through a contract of  
11 service for the public transportation provider to  
12 provide those trips, in lieu of giving a vehicle to this  
13 agency and a vehicle to that agency.

14 ROB STEPHENS: Thank you. Thank you all for  
15 those comments. Eric or Kari, you got any...

16 ERIC GLEASON: Well, let me -- Michelle,  
17 that's actually very, very helpful. We will look for  
18 opportunities in the rules, either in the goals or sort  
19 of overall areas of emphasis, to incorporate the  
20 emphasis on a partnership with your local transit  
21 provider for the provision of the service because you  
22 are correct, we do not have a desire to inadvertently  
23 find ourselves going back to a timeframe when we do have  
24 the problem that you described.

25 So I think we will make note and look for

1 opportunities to be clear about that.

2 KARI BANTA: I have one thing to add --

3 MICHELLE BLOOMER: Thank you, Eric.

4 ERIC GLEASON: Yeah.

5 KARI BANTA: Oh, sorry. One thing to add,  
6 just as a final comment, regarding the TAC changes that  
7 duplication of service is not allowed under 5310. So  
8 whatever service would be funded for -- through a  
9 nonprofit, for example, could not duplicate the service  
10 already being offered in the area by the transit  
11 district.

12 ERIC GLEASON: Correct. And I think we're  
13 interested in that and we're interested in making sure  
14 that the service that is offered is not exclusive to  
15 that agency's clientele. And -- because you're correct,  
16 this program is kind of above and beyond what the  
17 general purpose transit service already is in the  
18 community for this target population, and so extends the  
19 reach, if you will, of the general service provision for  
20 this target population.

21 And so we have to make sure, though, that we  
22 maximize the access to these program funds in the  
23 service delivery by not inadvertently limiting it to  
24 clientele associated agency we gave it to.

25 JOHN McBETH: Yeah, this is John and I -- I

1 -- I -- I would say we can't overemphasize enough when  
2 you're -- when you're -- when we're doing these rules  
3 that this service cannot -- people that get these  
4 vehicles, they can -- they cannot just be for their  
5 exclusive use.

6 ERIC GLEASON: Yeah.

7 JOHN McBETH: Because that's -- that's an  
8 issue that we deal with. 70 percent of the people that  
9 come to us, they just want it for what they're gonna use  
10 it for.

11 ERIC GLEASON: Right.

12 JOHN McBETH: And we tell them, sorry, you  
13 can't do that. They're always -- they always say, well,  
14 where -- where's it written, and we just tell them,  
15 John's rule.

16 ERIC GLEASON: Oh, okay.

17 JOHN McBETH: Okay. Yeah, I'm not gonna  
18 mess with him. But, no, you can't -- you can't over --  
19 that cannot be emphasized enough because it is an -- it  
20 is an issue.

21 ROB STEPHENS: Very good.

22 ERIC GLEASON: Okay. Ready to move on to  
23 the next set?

24 ROB STEPHENS: Yes, sir, please.

25 ERIC GLEASON: All right. Let's change

1 programs. All right. So this is gonna be page 15. And  
2 Section 5339, Bus and Bus Facilities Program. Now, for  
3 -- this is a relatively new program that started under  
4 MAP-21. And it was -- it's a bus and bus facility  
5 capital program. Again, we administer it in areas of  
6 the state under 200,000 in two groups. And you'll see  
7 here rural areas and small urban areas.

8 This is a -- it is a well intentioned  
9 program and a hugely underfunded program at the federal  
10 level. It is particularly underfunded for the rural  
11 areas. This is a -- this amount of 1.75 million for  
12 Texas, which is the largest rural program in the  
13 country, is the same amount of money that Rhode Island  
14 gets for the smallest. It is a flat amount for every  
15 state, doesn't matter on the size.

16 So we get about 20 cents per capita; Rhode  
17 Island gets about \$12 per capita, go figure. It is --  
18 the explanation we get for it federally is it's part of  
19 the deal. They did increase us by a half million  
20 dollars between MAP-21 and FAST Act. It used to be 1.25  
21 million, and now it's 1.75, but the inequity still  
22 stands.

23 There's not a lot of money. Small urban  
24 areas, it is based on their proportional share of  
25 population relative to the others in the country. So

1       there is some recognition of size difference. But it  
2       comes -- both chunks of money come to the State. The  
3       State has a formula then for allocating those funds to  
4       sub recipients.

5                   And while there's nothing about the 5399  
6       program at the federal level that requires us to change  
7       anything about our rules, the formula that we have to  
8       allocate this program is possibly not the most  
9       transparent, easily understood, well intended program in  
10      terms of its outcomes. I don't mean well intended.

11                   It doesn't necessarily encourage the kind of  
12      outcomes that you might want to for use of these funds,  
13      and so we are raising this to the committee's attention  
14      to get some feedback on whether or not you think it's  
15      going to be worth our effort to try and change the  
16      formula that we distribute these funds with.

17                   Now, the next page then, here it is. This  
18      is the formula. And, you know, to paraphrase, we  
19      basically have to make -- based on the information we  
20      have, we make a determination of the relative condition  
21      of individual agency fleets to others. And based on  
22      that determination of relative condition, we assign a  
23      proportional share of the funding available to that  
24      agency.

25                   We call it the relative decrepitude

1 calculation because it's -- it's -- it's... We've been  
2 doing it for years, and years, and years, and I think  
3 generally it's well accepted in the industry. People  
4 understand that's what we do.

5 The problem with it, if you turn the page,  
6 is that it's not the most transparent formula in the  
7 world. It requires -- I'll introduce Paul Moon here.  
8 Over here, raise his hand. Paul is our program manager  
9 -- Fleet and Procurement Program Manager. And Paul has  
10 been doing this calculation for years, and it's  
11 combination of art and science. It is done in an  
12 unbiased way based very much on the information we have.

13 But the whole notion of evaluating the  
14 relative condition of someone's fleet versus another is  
15 a little -- little murky. So from a transparency  
16 standpoint, it's a little complicated to understand how  
17 it works.

18 We get into problems when you have agencies  
19 who provide service in both in urban area and a small  
20 urban area. We have to make decisions about what share  
21 of their fleet gets allocated to the urban side and what  
22 share gets allocated to the rural side; so that  
23 introduces a level of complexity.

24 And then it tends to not necessarily  
25 encourage disposition of fleet no longer needed for

1 service, because you get money if your fleet's in bad  
2 shape. I mean, that's how this works. You get more  
3 money the worse off your fleet is.

4 Now, the good side of that is it gets money  
5 to people who need it. I mean, you know, got bad fleet,  
6 need money, good. But it tends to encourage you,  
7 perhaps, to hang on to old fleet as a part of your  
8 inventory longer than you need to, if you understand how  
9 this works.

10 So that's kind of the -- that's the current  
11 formula. It occurs to us, wouldn't it be great if --  
12 let's just take reported revenue miles. Report it every  
13 year, let's do it out that way, proportional based on  
14 revenue hours, service hours, even population, whatever.

15 So we looked at a couple different ways of  
16 doing that. We looked at three different ways. If you  
17 turn the page, we looked at vehicle revenue miles. We  
18 looked at the number of vehicles in an agency transit  
19 fleet and the population (indiscernible) just to see  
20 what we have.

21 And here's what we found. And if you -- if  
22 you want to just set the next page side by side here.  
23 This is the -- this is actually the results of the  
24 revenue mile application. These blue bars represent the  
25 difference between what you got in 2016 from this

1 program and what you would've gotten from the program if  
2 you had used revenue vehicle miles.

3 And all the different ways we tried to  
4 calculate this, the amount of variation over the current  
5 level of funding is extreme, so there's quite a change.  
6 It's a big, big change. So we have handled big changes  
7 like this before by introducing also a cap that limits  
8 how much you can use each year, if you are one of these  
9 that are below the line.

10 If you're -- if -- if by going from relative  
11 condition to vehicle revenue miles reported, if your --  
12 if your share of this funding drops significantly in  
13 some people's view, then we will limit any one year how  
14 much you use. But you will gently come down and, you  
15 know, and deliberately come down over time to a level  
16 you should be at.

17 So I guess what we'd like to hear from the  
18 committee would be do the issues associated with the  
19 current calculation, which is a transparency, difficulty  
20 separating joint fleets, and perhaps promoting people  
21 hanging on to fleet longer than we want them to, do  
22 those three issues warrant -- are those enough to  
23 warrant introducing a change that could result in these  
24 -- this kind of variation from one year to the next of  
25 what people got, particularly in the first year.

1                   And if the answer to that question is yes,  
2           then I would recommend to this committee that they  
3           consider a cap. And while I don't need -- we wouldn't  
4           want to hear from the committee what that cap was  
5           exactly, like, 10 percent or 25 percent, what would be  
6           helpful is a sense of how long would the committee be  
7           comfortable in suggesting it take for someone to hit the  
8           bottom.

9                   So if an agency, under our new formula, if  
10          -- if agency "A" would get 50 percent less than they got  
11          last year, do we want them to take all of that in the  
12          first year and just adjust to reality a different  
13          formula, or would we want to step them down over three  
14          years to that point. We have those options.

15                   So I'm gonna -- I'm gonna open it up.  
16          There's kind of two levels of conversation. Issues with  
17          the current formula, whether or not they're enough to  
18          warrant a look at a different approach, the answer to  
19          that question is yes, how to deal with a variation from  
20          last year to this that that change would represent.

21                   JOSEPH KOPSER: So first question, if I may.

22                   ROB STEPHENS: Yeah, go ahead, please.

23                   JOSEPH KOPSER: This is Joseph Kopser. So  
24          without naming the names or identifying --

25                   ERIC GLEASON: Right.

1                   JOSEPH KOPSER:  -- who your data points are,  
2           the -- what -- what yells out from this graph is the  
3           fact that there is another influence, or many other  
4           influences that would explain why there would be such a  
5           variance in what they receive.  Can you give any kind of  
6           background or anecdotal example of how to visualize what  
7           these differences might be?

8                   ERIC GLEASON:  Well, this -- what this one  
9           tells you -- what this one captures or attempts to show  
10          is that last year I got \$50,000 from this formula.  
11          Based on the condition of my fleet, there's 37 --

12                   JOSEPH KOPSER:  Condition or age?  All I  
13          hear --

14                   ERIC GLEASON:  Condition.

15                   JOSEPH KOPSER:  -- is age.

16                   ERIC GLEASON:  Condition.

17                   JOSEPH KOPSER:  And the definition on the  
18          other page, I just want to clarify, make sure I  
19          understand, based on remaining useful life, that implies  
20          age.

21                   ERIC GLEASON:  And mileage.  Useful life is  
22          both age --

23                   JOSEPH KOPSER:  Okay.

24                   ERIC GLEASON:  -- and mileage.

25                   JOSEPH KOPSER:  Okay.

1                   ERIC GLEASON: And, actually, we use mileage  
2 as a much clearer indicator of usefulness than age.

3 It's the reason that John mentioned. We get vehicles,  
4 they don't accumulate 12,000 a year. Five years, I got  
5 60,000 miles. These individuals put some 200,000 miles.

6                   JOSEPH KOPSER: Yeah.

7                   ERIC GLEASON: So mileage is probably the  
8 best of any single (indiscernible) to use. And we track  
9 that. We -- we go out and inventory, you know, 2,700  
10 members of the state fleet, that have federal or state  
11 funding, every year. We see them physically every two  
12 years. We update our information on them every year  
13 from a mileage and condition standpoint.

14                   So we take that and we do this relative  
15 condition calculation. I got \$50,000 from that in 2016.  
16 What this tells me, if I'm this -- if I'm agency "X" and  
17 I'm scheduled under revenue miles, I got a 600 percent  
18 increase. What that means is my fleet is in pretty good  
19 shape, so I don't get a lot of money on performing them  
20 based on fleet, but alone, a lot of revenue miles.

21                   And so I get a lot of new money for that.  
22 Not really any extra (indiscernible), it's just that,  
23 you know, depending on what you use to carve the money  
24 up, it can introduce significant swings.

25                   And generally in our formulas, we think it's

1 always better to be using numbers and data that are as  
2 clear of uncertainty or bias as possible because that  
3 makes it transparent. It makes it predictable from one  
4 year to the next. And -- and it just is a super  
5 calculation to understand.

6 So that's the -- that's the issue here. I  
7 -- I -- you know, this kind of variation is -- does not  
8 leave me feeling comfortable. It's -- it's hard to slap  
9 a formula in place that says agency "A," guess what, you  
10 used to get 50, you get 10. That's a hard message to  
11 do, so it can just make for difficult waters.

12 ROB STEPHENS: Okay. Anyone -- yeah, go  
13 ahead, Jim.

14 JIM CLINE: Just -- I mean, this is a  
15 philosophical point. This is Jim. Is -- is there a way  
16 that the funding could be essentially -- I don't want to  
17 say a reward, but encourage proper fleet behavior,  
18 proper fleet replacement.

19 So if it's part of a doing what right looks  
20 like, that should be something that's encouraged by it,  
21 not -- and everybody got caught in this 5339 deal  
22 because all of a sudden, money drops or it's done with  
23 formulating. You never get enough money to buy a whole  
24 vehicle, not enough to do what you're gonna do.

25 So that's the only way you're replacing

1 vehicles, I don't know if it really matters where you  
2 are on that chart, you're not gonna make it.

3 JIM CLINE: No.

4 ERIC GLEASON: Well, that's the other side  
5 of this conversation is, you know, we're --

6 JIM CLINE: It's --

7 ERIC GLEASON: -- (indiscernible) --

8 JIM CLINE: Some of these checks aren't big  
9 enough to go to the bank by themselves.

10 ERIC GLEASON: Yeah.

11 JOSEPH KOPSER: And so, you know, that piece  
12 comes into play, so how can it -- how can it be -- how  
13 can it supplement proper fleet behavior. And I suspect  
14 that maybe -- and there's also a transition because is  
15 there -- is this a one or a zero. It's either some  
16 major condition, maybe by mileage, or only revenue  
17 miles. Or is it some -- in using some data -- using the  
18 data point so you're not having -- is John back?

19 JOSEPH KOPSER: Paul.

20 JOHN McBETH: Paul.

21 JIM CLINE: Paul. So Paul's program is not  
22 all of a sudden doubling effort to get the same -- you  
23 know, same amount of product at the end of the day when  
24 you may not get a better answer. But that just struck  
25 me.

1           Two things struck me when I read this in  
2           advance, is that -- and the other was is there -- how do  
3           you transition from it because a -- and the idea of a  
4           cap works, too. Is it something where you use the old  
5           formula for 100 percent, 50, 75. You know, some step  
6           down and ramp up the other one.

7           I don't know. There's a bunch of different  
8           ways to do it. But at the core, I -- I really was --  
9           was -- because we're -- again, on a -- on a personal  
10          note, trying to go back to find how do you do business.  
11          What does right look like in terms of fleet management  
12          from a rural transit provider, or any transit provider.

13          And then how do you say, and we're gonna  
14          encourage that behavior through our funding path. So if  
15          you do a bad job, we're not gonna give you any help, or  
16          only a little bit. If you're doing the right thing,  
17          link that proper behavior and investment -- it's gonna  
18          take outside investment other than 5339 to -- you know,  
19          if you decide to spend all your money on operating, none  
20          of it on capital, from other categories, and then you  
21          say, oh, I'm so sorry, I've run all my vehicles to the  
22          ground. I need a lot of --

23                       ERIC GLEASON: Right.

24                       JIM CLINE: -- buses 'cause they're all  
25          broken, that's -- that's not the kind of behavior we

1 would want to reward, I wouldn't think.

2 ERIC GLEASON: That is correct. And I don't  
3 -- I'm gonna -- I would enjoy a conversation with the  
4 committee about their ideas about how to do that.

5 One of the -- you know, reward for  
6 performance, from our standpoint, if the resulting  
7 method is something other than a subjective assessment  
8 of performance, you don't want to introduce to your  
9 program anything that looks like a subjective assessment  
10 of performance on our part, and so you have to find  
11 numbers in a readily available, easily recorded, minimum  
12 bias risk numbers to do that with.

13 And so I'm interested now. I agree  
14 philosophic on that completely. The question is what is  
15 that.

16 JIM CLINE: Well, the Transit Asset  
17 Management Program that is being implemented may be a  
18 part of that, 'cause it takes into account age and  
19 mileage. Those are -- those are binary numbers. I  
20 mean, those are just -- I mean, it is what it is.  
21 There's not -- there's no grade on how old -- how old a  
22 bus is and how many miles it's got on it. Maybe it's  
23 miles -- you know, how many average mileage on your  
24 fleet, maybe that's a metric.

25 That's the kind of performance that I'm

1 thinking about that might be applicable news -- again,  
2 it -- there's -- there's so many unique things with  
3 rural providers and the challenges they face.

4 And, you know, again, representing the  
5 general public, how are we gonna keep from ultimately  
6 leaving the general public in the lurch if those bad  
7 decisions are made, and how can we keep our --

8 JOSEPH KOPSER: That's exactly the nature of  
9 my question and why I asked the same question. What  
10 incentives are we rewarding or inspiring.

11 ROB STEPHENS: Are you -- are you guys, Jim  
12 and Joseph, are you guys -- are you comfortable with --  
13 with moving forward in asking Eric to -- to explore  
14 changes 'cause there's issues with the current formula;  
15 you guys okay --

16 JOSEPH KOPSER: Yeah.

17 ROB STEPHENS: -- with it? Okay.

18 JIM CLINE: I'm sorry.

19 J.R. SALAZAR: No, just my two cents. I  
20 know that the vehicle revenue miles is something we've  
21 used for many years to provide funding in excess in  
22 federal funding. So I think we have an easier time --  
23 or maybe I shouldn't speak for we.

24 I'll say I have an easier time accepting the  
25 vehicle revenue miles as a good barometer of service, or

1 level of service, because we've done it for years. Not  
2 saying it's perfect, but we have done that for many  
3 years. And so I'm okay with that and I'm in favor of  
4 capping that.

5 We've done that as well, 'cause I don't  
6 think it's fair to someone go up 600 percent or drop  
7 down, whatever percentage that may be, too. So those  
8 are my quick little statements on -- on that.

9 JOHN McBETH: Yeah, this is John. Revenue  
10 miles basically is rewarding performance. You're --  
11 you're not getting paid for the age of the vehicle,  
12 you're getting paid for putting miles on the vehicle,  
13 which means you're carrying people. Hopefully nobody's  
14 out there just driving the buses --

15 JOSEPH KOPSER: Well, that --

16 JOHN McBETH: -- around, empty.

17 JOSEPH KOPSER: -- was my question is, a  
18 revenue mile means a butt in a seat.

19 JOHN McBETH: Yeah, yeah. Revenue --

20 ERIC GLEASON: Yes.

21 JOHN McBETH: -- mile's --

22 JOSEPH KOPSER: Okay.

23 JOHN McBETH: -- always got --

24 ERIC GLEASON: Well --

25 JOHN McBETH: -- a person in a seat.

1                   ERIC GLEASON:  -- let's be clear.  When --  
2                   so fixed route bus service, which is, you know, you guys  
3                   run a lot of that.  That's easy.  A revenue mile is when  
4                   it's in service and it's carrying people, open to  
5                   service.  Demand response system's a little bit  
6                   different because they spend a lot of time traveling to  
7                   get their passenger initially.

8                   The way we calculate it is when that vehicle  
9                   leaves the garage in the morning, the mileage it  
10                  accumulates during the day is where the mileage.

11                  JOHN McBETH:  Yeah.

12                  ERIC GLEASON:  So, you know, it's -- it's a  
13                  -- is it revenue miles, is it revenue miles per vehicle,  
14                  is it some kind of -- there's just no other way to  
15                  account for it where the -- with the demand response  
16                  system because, you know, it's problematic.

17                  JOSEPH KOPSER:  Unless -- and maybe this is  
18                  not in the conduct of what we're talking about here.  
19                  Unless you divide by the number of seats in that  
20                  vehicle.  So it's one thing to send a 4-passenger,  
21                  12-passenger out for a long ride to get somebody to  
22                  bring him or her in.

23                  But if you're sending a much larger vehicle,  
24                  that, to me, just as a member of the general public not  
25                  see that as a good use of funds, and that is not a

1 behavior we would want to reward, to send a 40-passenger  
2 or a 25-passenger out to pick up one or two people.

3 ERIC GLEASON: Sure. So we're into  
4 effective utilization of fleet...

5 JOSEPH KOPSER: Right.

6 ERIC GLEASON: ...as opposed to just  
7 quantity utilization of fleet.

8 ROB STEPHENS: Go ahead, Jim, please.

9 JIM CLINE: Rob, in answer to your question,  
10 I -- I don't -- I'm not gonna presume, as a member of  
11 this group, to say, Eric, this is the way it ought to  
12 be. I would think that asking the question of the staff  
13 to say, is -- is there a better way that does reward the  
14 right behavior, is what I would like to see, our  
15 recommendation; is that a fair way to frame that?

16 ROB STEPHENS: Yeah.

17 JIM CLINE: I want to make --

18 ROB STEPHENS: The first question was is --  
19 is -- is -- is are -- are we ready to move to look --  
20 are we not comfortable with letting Eric explore  
21 different possibilities was the first question, correct?

22 ERIC GLEASON: That's correct.

23 ROB STEPHENS: Yeah. So -- so if we're okay  
24 with that, then -- then we can move on to the --

25 ERIC GLEASON: So if that new methodology

1 introduces extreme variation, and the next question is  
2 does the -- is the committee interested in just moving  
3 to that new methodology and letting people adjust at one  
4 time to that new level; or do we step people down, and  
5 if so, how long. I don't even know the percent. You  
6 know, on the formula side, we say you get no -- no less  
7 than 10 percent less than you got the year before, if  
8 you step down at 10 percent of the time. You know, I --  
9 I -- you know, is it three years --

10 ROB STEPHENS: I'm in favor --

11 ERIC GLEASON: -- five years.

12 ROB STEPHENS: -- of the step down. I'm in  
13 favor of that. But I -- I would let -- I would defer to  
14 you and your staff to give us recommendations about what  
15 those ranges might be. What -- but I --

16 ERIC GLEASON: Okay. I was hoping to  
17 extract some sense of three years, five years, two  
18 years. I mean, how long does it take to adjust your  
19 budget to -- I mean --

20 JOHN McBETH: On the capital? Probably  
21 three years on capital. The -- the rural program, 5311  
22 formula, I think we stretched that over six years, and  
23 it worked. It was --

24 ERIC GLEASON: Well, that's just --

25 JOHN McBETH: It hurt but --

1 ERIC GLEASON: -- how it turned out to be.

2 JOHN McBETH: -- it worked.

3 ERIC GLEASON: That's what -- we didn't have  
4 six years in mine. We just --

5 JOHN McBETH: Yeah.

6 ERIC GLEASON: -- said no more than 10  
7 percent.

8 JOHN McBETH: Exactly.

9 ERIC GLEASON: It resulted in taking six  
10 years --

11 JOHN McBETH: Yeah. Exactly.

12 ERIC GLEASON: -- for some folks to get  
13 there.

14 JOHN McBETH: And I think you could do the  
15 same thing here. You could say no more than 10 percent,  
16 and see how long that takes.

17 ROB STEPHENS: Go ahead, Jim.

18 JIM CLINE: Just wanted -- I -- it'd be  
19 interesting to me to say -- I would ask the question, if  
20 there is -- if there is such a dramatic shift, is that  
21 an appropriate way to do it. That's another...

22 ERIC GLEASON: Okay. You would call in to  
23 question the --

24 JIM CLINE: I just -- it would be -- I would  
25 just say, is that -- is that appropriate if it's that

1 dramatic, that's all. That's -- that's a question that  
2 would hit me. As I looked -- again, looking in advance,  
3 saying, wow, it goes from basically a flat line, right,  
4 where there's no -- everybody's on the same line to  
5 where it's a huge variation in saying is that dramatic.  
6 Are people making that -- that bad a decision so now  
7 when they're getting -- you know, that's -- that's my --

8 ERIC GLEASON: So hearing what you're  
9 saying, Jim, so of the three that we looked at, based on  
10 your comment, we ought not to be looking at population  
11 -- and Joseph, yours. Population land area doesn't  
12 introduce any sense of reward --

13 JIM CLINE: How well --

14 ERIC GLEASON: -- (indiscernible) --

15 JIM CLINE: -- you do your job running your  
16 agency.

17 ERIC GLEASON: So that's not the kind of --  
18 we're not willing to make that kind of change for that.  
19 But that revenue miles or some way of getting that  
20 effectiveness in a simple measure is what you want.

21 ROB STEPHENS: Maybe passengers per mile?

22 ERIC GLEASON: And, you know, readily  
23 available, whatever.

24 JIM CLINE: Readily available data.

25 ERIC GLEASON: So we can -- move to that.

1 And then if in our minds the level of variation that  
2 that -- that that new data represents is extreme or  
3 whatever, we will give some thought to a step down. And  
4 I think what we'll probably try and do is come back to  
5 you at the next meeting with the results of that and get  
6 another check-in point to say, are we on target  
7 (indiscernible), but the committee's interest in seeing  
8 that.

9 ROB STEPHENS: Sure.

10 ERIC GLEASON: New approach, minimize  
11 variation with a step down, come back and show us what  
12 you think.

13 J.R. SALAZAR: I think we just need to keep  
14 in mind, too, that we're talking about 1.75 million.

15 ERIC GLEASON: Oh, I know. And that's the  
16 other thing; at the end of the day, it's not a lot of  
17 money.

18 JOHN McBETH: Yeah, and -- and at the end of  
19 the day --

20 J.R. SALAZAR: For rurals.

21 JOHN McBETH: By --

22 J.R. SALAZAR: Sorry.

23 JOHN McBETH: By May -- this is John. By  
24 May this program may not exist.

25 ERIC GLEASON: Well, sure. There's that,

1 too.

2 JOHN McBETH: TIGER's gonna go and there's  
3 proposal to cut bus -- buses slowly by 60 percent. So  
4 we might be talking about not much --

5 ERIC GLEASON: Okay.

6 JOHN McBETH: -- at all.

7 JOSEPH KOPSER: You talking about the  
8 federal budget?

9 JOHN McBETH: The federal budget, yeah. It  
10 -- it's -- right now the transportation budget is pretty  
11 inconsequential in the scheme of things up there. But  
12 (indiscernible) who secretary said, yeah, we'll give you  
13 more information in May. They're not even in the skinny  
14 budget right now, so this -- this program --

15 ERIC GLEASON: Okay.

16 JOHN McBETH: -- could go on.

17 ERIC GLEASON: Good to know.

18 ROB STEPHENS: Quick question, Eric.

19 ERIC GLEASON: Yes, sir.

20 ROB STEPHENS: I guess it just reminded me,  
21 were there -- were there situations in previous years  
22 where -- I've got the amount was that small. Were there  
23 situations where agencies didn't get enough to purchase  
24 a vehicle? A replacement vehicle?

25 ERIC GLEASON: Yes. And, keep in mind, this

1 formula is based on vehicle condition, but the funds can  
2 be used for any capital program purpose.

3 ROB STEPHENS: Okay.

4 ERIC GLEASON: And so even if you don't get  
5 enough for a vehicle, you could, you know, replace the  
6 concrete pad, or buy a lift, or whatever you wanted to  
7 do for your shop, too.

8 ROB STEPHENS: Okay.

9 ERIC GLEASON: And that was a point of  
10 confusion when we made the shift initially was because  
11 the calculation was by fleet, people made the assumption  
12 they could only use it. No, in fact you can use it for  
13 anything.

14 JIM CLINE: That goes back to the, are you  
15 making good decisions.

16 ERIC GLEASON: Yes. Yeah. Okay.

17 ROB STEPHENS: Very good.

18 ERIC GLEASON: Excellent. That's what we  
19 needed. Now, give you a sense of what's next. Final  
20 page on this handout. So we're gonna convene again late  
21 May, early June. And the idea with that date is going  
22 to be, do we have enough confidence in the legislature  
23 and in appropriations process, wherever they might be at  
24 that point, to -- to feel that we know that that  
25 additional funding is going to be made available.

1                   And so I don't have any reason to believe at  
2                   this point that it won't be there at the end of the  
3                   session, no reason at all. Just don't want to second  
4                   guess the appropriations process. So stay tuned for  
5                   that, but we will be trying to set -- and maybe we'll  
6                   just set a couple dates up and -- with you that you're  
7                   both -- both dates available, and I will pick one,  
8                   depending when and where they are.

9                   We will -- at that agenda -- on that agenda  
10                  we will follow up from today's discussion, then we're  
11                  gonna -- bring your caffeine. We're gonna take you  
12                  through a summary of the current formula, and why it is  
13                  the way it is. And this is -- this is the most  
14                  important work this committee does, hand down, when we  
15                  get into talking about formula, formula funding  
16                  affecting state and rural program amounts.

17                  That's really critical stuff, so we're gonna  
18                  make sure that we have a pretty good foundation and  
19                  understanding of all members of the current formula and  
20                  why it is the way it is. And we'll identify what we  
21                  think our areas that we may want to look at for change,  
22                  and it will be areas that will be -- allow us to  
23                  incorporate the additional funding for sure.

24                  There are also areas, we think, where it's  
25                  weak or perhaps doesn't encourage what we want that we

1 will highlight for the committee as well to get some  
2 feedback. And then we'll work you through sort of  
3 different ways of looking at those areas of change and  
4 the things you might consider; again, not to get an  
5 action on the part of the committee but to promote the  
6 same kind of conversation like we had today, so we can  
7 leave with an understanding of how to write up some  
8 proposed rules.

9 That, Mr. Chair, concludes everything I have  
10 to say on this item.

11 ROB STEPHENS: Okay. Awesome. Anyone else  
12 have any closing remarks on item number 6? Okay. It's  
13 an action item, but we don't necessarily have to take  
14 action. We can just move on to item number 7, I think,  
15 if you guys think we covered everything clearly and Eric  
16 will bring back to us stuff next time. You guys  
17 comfortable with that?

18 MALE SPEAKER: Yeah.

19 ROB STEPHENS: Okay.

20 ERIC GLEASON: All right.

21 ROB STEPHENS: Item number 7.

22 ERIC GLEASON: Number 7. Okay.

23 ROB STEPHENS: Number 7 is Update and  
24 Discussion on Regionally Coordinated Public  
25 Transportation Efforts. We do have some speakers lined

1 up for this one --

2 ERIC GLEASON: Okay.

3 ROB STEPHENS: -- but we'll begin our  
4 conversation.

5 ERIC GLEASON: Okay.

6 ROB STEPHENS: And then after that we'll  
7 have a discussion on the comments.

8 ERIC GLEASON: Again, Mr. Chair, on this  
9 item we are not looking for action on the part of the  
10 committee. We want to bring this item to the  
11 committee's attention because it was the basis of a  
12 fairly prolonged conversation, 12 to 18 months ago at  
13 this committee, about the -- the Coordination Planning  
14 Program and next steps for that.

15 A brief bit of background; this program  
16 started back in 2005 following state statute that  
17 requires the department to facilitate a process to  
18 encourage coordination between transit providers --  
19 transit -- public transportation providers and health  
20 and human service agency transportation for efficiency  
21 and coordination purposes.

22 We also have in federal 5310 program, we do  
23 have a requirement for having a coordination plan. So  
24 the way we've approached this for the better part of  
25 almost 12 years now is the department has facilitated

1 planning efforts in each of the state's 24 regional  
2 planning areas. We have funded and facilitated planning  
3 efforts to create a coordination plan to update that  
4 plan every five years, and in between plan updates to  
5 fund an ongoing effort to sustain that planning process.

6 We had a conversation at this committee  
7 about a year ago, I guess, where the committee felt  
8 strongly that we had supported the planning effort  
9 enough that we could limit our planning support to those  
10 needed updates, but that in between the updates, the  
11 committee wanted to see an emphasis of funding, what we  
12 call implementation projects.

13 Projects or -- to identify gaps or projects  
14 that were identified in the plan itself for  
15 implementation to experiment, to pilot, and to learn,  
16 and to see what kinds of outcomes we could actually  
17 document as coming from this planning effort. So we  
18 have made that transition.

19 And I referenced earlier in my report, we  
20 have projects now, from the very first call for projects  
21 under this new approach where we are no longer proposing  
22 to fund agencies in their ongoing planning efforts. We  
23 are funding their update efforts but not the ongoing  
24 plan efforts, and we now have first set of projects in.

25 Now, having said that, wanted to let the

1 committee know we are hearing from some of our lead  
2 agencies. So in each of these 24 regions we have lead  
3 agencies. We are hearing from some of them that no  
4 longer having funding available to support ongoing  
5 planning is a problem for them from a staffing and  
6 resource level.

7 And we have three agencies who have stepped  
8 back from that lead agency role, and we've heard from a  
9 number that they are considering that. And so while  
10 we're not looking for action today, we may be coming to  
11 you in the future with some recommendations if we  
12 determine that trend to be a significant issue for this  
13 -- this effort.

14 So what you have in your packet -- and I  
15 think there's updated information. Again, you may have  
16 some of that, not in the notebook itself but in --

17 JOSH RIBAKOVE: In -- in the packet. All  
18 the -- the packets that have been updated, and you  
19 should have one that has today's date on it.

20 ERIC GLEASON: There's an updated one for  
21 this item of words and -- that describe this issue. It  
22 also provides you with an update on this recent effort,  
23 update on the update. So -- so each of the -- so if you  
24 look at the map, each of the 24 regions of the state  
25 here -- well, 22 of the 24 have undertake -- are

1       undertaking or have undertook plan update efforts.

2                       The blue represent those areas who have  
3       completed that. We expect the rest of the crowd,  
4       yellow, to finish up by the end of the April. And we  
5       have two areas that they're on different schedule  
6       updates, and I can't tell you what those schedules are.

7                       Steve Wright is with us here today. Steve,  
8       why don't you join us at the table. Steve is our  
9       program manager for this effort and could answer any  
10      more specific questions you might have. I just wanted  
11      to get this out here.

12                      Mr. Chair, I know we have folks who traveled  
13      a long --

14                      ROB STEPHENS: Yes.

15                      ERIC GLEASON: -- way. We have good  
16      representation from west Texas, the panhandle, and --  
17      and South Plains area, and others to comment on this.  
18      And -- and I think I probably said enough.

19                      ROB STEPHENS: Okay. I'll open up to the  
20      committee. I don't know -- Michelle, are you on the  
21      line?

22                      MICHELLE BLOOMER: I'm still here.

23                      ROB STEPHENS: Okay. If you -- if you've  
24      got any kind of comments or questions, or anything you  
25      want to say about this, this particular item, please do.

1 MICHELLE BLOOMER: I -- I do, but I think I  
2 want to wait and hear what the folks --

3 ROB STEPHENS: Okay.

4 MICHELLE BLOOMER: -- the public has during  
5 the comments.

6 ROB STEPHENS: Okay. We can do that, sure.  
7 J.R., you feel the same --

8 J.R. SALAZAR: Sure.

9 ROB STEPHENS: -- about that? Okay. John  
10 stepped down just a minute. So you guys -- you guys,  
11 Joseph, Jim, you got anything --

12 JIM CLINE: Good.

13 ROB STEPHENS: -- you want to start with?

14 JIM CLINE: No.

15 ROB STEPHENS: We'll open, go ahead and do  
16 the public comment section. Naomi Chaves with South  
17 Plains Association of Governments. Please come up and  
18 address the committee.

19 ERIC GLEASON: Gonna let you go ahead and  
20 use my seat.

21 NAOMI CHAVES: Perfect.

22 ERIC GLEASON: Right by the microphone so  
23 you can speak.

24 NAOMI CHAVES: Alrighty. Well, good  
25 afternoon, everyone. My name's Naomi Chaves. I'm with

1 South Plains Association of Governments, and we are the  
2 lead agency for the South Plains Regional Coordination  
3 Transportation Advisory Committee in west Texas. And  
4 before I begin, I'd like to thank everyone for taking  
5 the time to listen to our comments regarding the new  
6 funding strategies for 5304 funding.

7 So, as all of you know, the state of Texas  
8 has a great sense of regionalism due to its varying  
9 types of geographies, demographics, social and economic  
10 characteristics. And because of this, it's a state that  
11 rarely gets away with blanket policies or strategies,  
12 because what is effective in one area might not be true  
13 or as effective in another area.

14 So because of the rural nature and low  
15 population density in west Texas compared to the rest of  
16 the state, it's significantly impacts the strategies  
17 through which we can improve and/or continue to  
18 coordinate effective transportation planning for our  
19 region.

20 With that being said, we like to take a very  
21 collaborative approach to transportation planning  
22 because we have a comprehensive understanding of the  
23 role that transportation plays in the quality of life of  
24 people, the economy, and the safety and security of our  
25 region.

1                   And without basic lead agency funding, we  
2                   are definitely posed with some challenges that will  
3                   hinder the effect -- the effectiveness of our  
4                   transportation planning efforts. And the absence of  
5                   these resources will make it difficult for the multi  
6                   provider coordination that has been successfully taking  
7                   place at SPAG over the last five years.

8                   With that said, I would like to thank the  
9                   committee for allowing us the opportunity to be a part  
10                  of this conversation.

11                  ROB STEPHENS: Okay. Thank you, Naomi.  
12                  What I'd like to do is hold, I guess that -- we'll let  
13                  all the speakers come up and -- and the committee will  
14                  respond as a whole. Thank you, Naomi. Next, Rina Bale,  
15                  with Permian Basin M.P.O., please come up.

16                  RINA BALE: Hello. And, yes, thank you. My  
17                  name, again, is Rina Bale. I'm the Mobility Manager at  
18                  the Permian Basin M.P.O., which is also west Texas  
19                  Midland/Odessa area. We are the lead agency for the 17  
20                  county region of planning Region 9.

21                  And regionally coordinated transportation  
22                  planning has gained more significance over the past  
23                  couple of years since TxDOT implemented it back in 2005.  
24                  Active stakeholders in my area has increased by 280  
25                  percent from FY '15 to FY '16. We have a 35 percent

1 increase in new members, also from FY 2015.

2           Some of our members travel anywhere from 50  
3 to 180 miles -- that's one way -- to attend our planning  
4 meetings, which those things emphasize the importance  
5 that they believe that regional planning is. Public  
6 transportation awareness was identified as the number  
7 one issue in our updated regional plan.

8           Without continuing these planning meetings  
9 and stakeholder involvement on the in between years,  
10 it's going to be hard to fulfill that need, because  
11 outreach and education, that's -- that's where it  
12 starts. It starts in those meetings. It's starts with  
13 partnerships. It starts with talking to the different  
14 agencies and letting them take the information back to  
15 their stakeholders to get things done in the region.

16           The sharing of information has also been  
17 used to implement infrastructure projects, including  
18 facilities, fleet, and communication controls. The  
19 regional planning program also assists in the 5310  
20 process by encouraging partnerships, ensuring projects  
21 have local support, and confirming that there are no  
22 duplication of services.

23           Looking at the select populations that are  
24 the focus of regional planning, which include the  
25 elderly, disabled, low income veterans and children,

1 significant strides have been made to attempt to meet  
2 their transportation needs.

3           Throughout planning region 9, senior  
4 citizens now have transportation to senior centers which  
5 provide activities and nutritious meals. Individuals  
6 with disabilities can now receive trib training to learn  
7 to ride the public transit system, so they have  
8 transportation freedom without having to depend on  
9 others.

10           Unmet transportation needs and gaps in  
11 services for veterans, low income individuals and  
12 children are being heard, documented, and measures are  
13 being taken to satisfy those needs. None of these  
14 things would be possible without the coordinating  
15 efforts derived from the regional planning process,  
16 regardless of geographic location.

17           By providing lead agencies with enough  
18 funding to maintain the minimal efforts, you are doing  
19 so much more than just funding some meetings. You are  
20 helping to provide the necessary resources to help a  
21 blind man get to a medical appointment, or a disabled  
22 mother get to work, or a veteran to get to a VA  
23 hospital. You are improving people's quality of life.

24           Please reconsider this request for  
25 sustainability funds so partnerships will continue to be

1 developed, agencies can continue working together to  
2 improve their client transportation, and we can continue  
3 to get people where they need to go effectively,  
4 efficiently, and seamlessly. Thank you.

5 JIM CLINE: Thank you.

6 ROB STEPHENS: Thank you, very much. Okay.  
7 We have another speaker, Kyle, with Panhandle Regional  
8 Planning Commission.

9 KYLE INGHAM: Thank you, sir.

10 ROB STEPHENS: Yes, sir.

11 KYLE INGHAM: I'm Kyle Ingham. I'm the  
12 local Government Services Director up at the Panhandle  
13 Regional Planning Commission in Amarillo, Texas. So  
14 we're blue up there. We have ours turned in.

15 I do -- I do want to touch base -- and I  
16 think the two previous speakers did a very good job of  
17 outlining the importance of the regional planning  
18 process. And I think whether you're an MPO providing  
19 services or Council of Governments providing the  
20 services, we developed some expertise over the past 12  
21 years.

22 Starting in about 2007, I became involved in  
23 the program. And at the time, our rural provider, our  
24 urban provider, and our -- our private providers  
25 wouldn't even come to the table and talk to each other.

1 And so we're fiercely independent out in the Texas  
2 panhandle, and it takes something to make people to come  
3 together to work together.

4 And so we went from an almost adversarial  
5 relationship ten years ago to now those people wanting  
6 to come together and have meetings on an every other  
7 month basis just to touch base with each other. They're  
8 using it as a forum to discuss what the -- what the next  
9 actions are gonna be, and even where they can get some  
10 synergy, help each other out and fill in some gaps.

11 The private providers are filling gaps that  
12 the public providers are missing, and everybody's gladly  
13 doing this now. They've touched on the importance of  
14 all that, but really one of the things I want to get  
15 into is the functional -- functionality of continuous  
16 funding.

17 We run into a problem as a Council of  
18 Governments specifically, and while we are political  
19 subdivision, we are not a taxing entity in the state of  
20 Texas. Every bit of service that we provide is done so  
21 on a contract basis. So if we do regional water  
22 planning, the Texas Water Development Board is paying  
23 for our staff time to do that.

24 If we're doing public transportation  
25 planning, that's under a contract with TxDOT to pay for

1 the staff to do that. If you move over and you're  
2 providing services to a locality or you're providing  
3 services of workforce or aging, whatever it is that we  
4 do -- and all the Council of Governments are very  
5 different -- it's under a contract.

6 And so if I'm being asked to host meetings,  
7 if I'm being asked to coordinate, if I'm being asked to  
8 help implement a plan on behalf of an agency with no  
9 funding tied to that, I'm actually stealing from another  
10 state agency. I'm stealing tax dollars from another  
11 program that we have a contract to provide those  
12 services.

13 That's -- that's a problem in pulling  
14 something from somewhere else. So -- so services for  
15 free, while it looks really nice on paper, it doesn't  
16 work very well in a business model.

17 And then finally, the -- the reason that I  
18 know you guys moved away from the ongoing funding really  
19 makes sense. The implementation of this plan is highly  
20 important. 2007 plan, 2011 plan in our region, we got  
21 the vast majority of those strategies implemented.

22 We had partner agencies that were utilizing  
23 5310, 5311, the different programs, even some local  
24 funds to begin doing this. The private entities  
25 designed some programs around the funding that was

1 available to them through Medicare and Medicaid also.

2 I don't think that continuing to pay for the  
3 planning effort is mutually independent of the  
4 implementation of the strategies, 'cause I don't want to  
5 plan to plan any more than anybody else.

6 So putting together a plan, putting it on  
7 the ground, implementing it maybe with other resources  
8 as opposed to the planning resources, or even partially  
9 with the planning resources, establishing some base  
10 level, and then the ongoing competition.

11 I think the competition's good. It rewards  
12 those entities that have done a good job, those regions  
13 that have done a good job, like you were talking about,  
14 coming together, putting together the right plans, doing  
15 things the right way, getting strategies implemented.

16 Yeah, if they can be more competitive and it  
17 implement more projects, that's a good thing. But some  
18 level of base funding in order to keep those experts in  
19 place, as she said, is really a necessity going forward.  
20 Thank you, guys, for the time.

21 ROB STEPHENS: Thank you, Kyle.

22 KYLE INGHAM: And for the public record,  
23 this is a letter from our advisory group.

24 ROB STEPHENS: Thank you. We have one more  
25 speaker. Aida Martinez, with the South Plains Regional

1 Coordination Transit Advisory Committee.

2 AIDA MARTINEZ: Thank you. That's little  
3 bit of a tongue twister, the name of our little regional  
4 advisory committee. My name is Aida Martinez. I am the  
5 211 Texas Director for the South Plains Association of  
6 Governments. A while ago you mentioned 2005, and that's  
7 how long I've been involved in the transportation  
8 discussion on the South Plains region, back when Citibus  
9 was our lead agency.

10 And a couple of years ago, as Naomi  
11 mentioned, we -- South Plains Association of Governments  
12 took over as lead planning agency and have still  
13 remained a member of the committee, because  
14 transportation is a huge issue up in west Texas, like  
15 Kyle and Naomi have mentioned. And we have high  
16 committee -- committed committee members on our  
17 stakeholder group.

18 So I'm here to represent and speak as a  
19 stakeholder for the committee. And on our behalf of the  
20 committee, I'd like to say that we strongly support the  
21 idea of 5304 funding being used to sustain our lead  
22 agency's efforts in overseeing the progress of the  
23 five-year transportation plan.

24 SPAG has been the lead agency in the Lubbock  
25 region since 2012. And while there was transition in

1 stakeholders as well as lead agency staff, the last two  
2 years have seen a tremendous amount of regional  
3 coordination that is impacting our region in big ways.

4 SPAG has done an excellent job of providing  
5 monthly multi provider coordination meetings, writing  
6 the first regional transportation plan with SPAG as a  
7 lead agency, identifying the unmet needs and gaps  
8 concerning transportation in the South Plains region,  
9 and helping us develop and apply for innovative  
10 demonstration project funding to further our goals and  
11 fill the gaps in our area.

12 All of these efforts have been very  
13 difficult, if not impossible, to achieve without basic  
14 lead agency funding. We do appreciate TxDOT's  
15 objectives to use limited dollars as strategically as  
16 possible. However, we do feel that basically an agency  
17 funding has resulted in efficient and effective  
18 transportation planning of our region.

19 I do want to stress, however, as a  
20 stakeholder in the local planning process what a  
21 difference a stable lead agency means to our region.  
22 The needs of the South Plains citizens -- the needs of  
23 the South Plains citizens my organization serves are not  
24 the same as those needs of those in Houston or Dallas.

25 Continued lead agency funding is critical to

1 the continued success of regional coordinated planning.  
2 And once again, I'd like to thank you for your time  
3 today.

4 MALE SPEAKER: Thank you.

5 MALE SPEAKER: Thank you.

6 ROB STEPHENS: Thank you, very much. Okay.  
7 We don't have any more speakers, so what I'd like to do  
8 now is open up, I guess, for committee discussion. And  
9 I'll come back to you, Michelle. So you've heard from  
10 speakers. Are you still there with us?

11 MICHELLE BLOOMER: I'm still here.

12 ROB STEPHENS: Okay, okay. If you're ready  
13 to make comments now, if you've got some, if you're  
14 ready, please go ahead.

15 MICHELLE BLOOMER: I'll (indiscernible) the  
16 other members at this time.

17 ROB STEPHENS: Okay. Awesome. Joseph, Jim,  
18 you guys got anything over there?

19 JIM CLINE: I just -- I want to kind of make  
20 sure I understand the issue really well, being new at  
21 this. These funds, in particular the requests that  
22 we've been getting, are -- we have been previously  
23 funding fairly stable dollars -- stable of the dollars  
24 that essentially is doing sustainment.

25 ROB STEPHENS: Yes.

1           JIM CLINE: A sustained level of playing,  
2           some of which is implementation, some of which is other  
3           things, but a fairly stable level that's been happening.  
4           And then we're proposing changing that, or that's been  
5           proposed.

6           JOHN McBETH: Been changed.

7           JIM CLINE: Been changed to do something  
8           different without the postponement limitation rather  
9           than on -- I think effectively it's probably the -- the  
10          MPO level staff; am I correct? Is that probably how  
11          it's generally --

12          MALE SPEAKER: It's mixed.

13          ERIC GLEASON: Council of Governments, MPO,  
14          transit district, the -- the lead agencies -- it's a  
15          diverse group of agencies who have elected to lead this  
16          effort in each of the 24 regions.

17          JIM CLINE: Okay.

18          ERIC GLEASON: It has historically been for  
19          planning purposes. Creating a plan initially and  
20          updating it every five years, and then sustaining some  
21          ongoing level of planning work, working with  
22          stakeholders, you know -- you know...

23                 And the -- the discussion a year ago was  
24          that aside from the updates, that the in between years  
25          let's shift our focus from sustaining ongoing meetings

1 with stakeholders to talk about the issues. Let's take  
2 those resources and let's put them more specifically on  
3 projects to implement projects in the plan, because the  
4 discussion at the time, we weren't seeing necessarily  
5 measurable outcomes, results from the planning effort.

6 We saw a lot of planning going on. We know  
7 we had new ideas coming to the table. We know we had  
8 new groups working together who have not worked together  
9 before. We -- the -- but the committee was interested  
10 in, and we agreed, was let's see if we can't focus  
11 ourselves on getting pilot projects out there, service  
12 projects out there, measurable projects with measurable  
13 results to move the meeting, you know. And that's what  
14 we're trying to do here.

15 And what has then -- what is no longer  
16 funded then is this sort of sustainment level of  
17 planning activity in between updates. You know, you can  
18 imagine, you know, an update is a big -- a big blip in  
19 effort. And then it cooks along for three or four years  
20 at a lower sustainment level, and then it ramps up again  
21 for your updating, and then back to the -- to the lower  
22 sustainment level. And it's that lower sustainment  
23 level that has been replaced by the notion of funding  
24 implementations and not planning.

25 JOSEPH KOPSER: Is the number equal between

1 all 24 districts?

2 ERIC GLEASON: No. No. The process we --  
3 we go through a competitive call. We ask agencies to  
4 put together proposals to spend money in different ways,  
5 and then we evaluate the proposals and make decisions on  
6 differing amounts based on that. So it's not like we  
7 say everybody gets \$50,000 a year, everybody gets  
8 100,000 or whatever.

9 You know, we typically -- the program we  
10 fund this from, we get -- is a federal program that  
11 requires a 20 percent state or local match for it, the  
12 state actually provides the money as match. And I think  
13 when you add match to federal money, I think the annual  
14 total was, what, 1.6?

15 STEVE WRIGHT: 1.7.

16 ERIC GLEASON: 1.7.

17 STEVE WRIGHT: Total.

18 ERIC GLEASON: Total for Texas. And it's  
19 for all purposes. We -- we have a demand for this  
20 program. This is the same program that we could use  
21 funds to move facilities and things through a project  
22 development process, from concept to feasibility, to  
23 environmental, things of that. So we have a lot of  
24 demand for these funds.

25 And I think you were hearing from the

1 committee that enough had been spent on planning, and  
2 given the demand for these funds, we wanted to move into  
3 a more strategically based focus to get results. Sorry,  
4 that was a long explanation, but that's...

5 JOSEPH KOPSER: But that's essentially, on  
6 average, \$66,000 per district.

7 ERIC GLEASON: At how much?

8 JOSEPH KOPSER: 1.7 you said.

9 ERIC GLEASON: Okay, okay. Sure. If it all  
10 went to this purpose, yes.

11 JOSEPH KOPSER: Okay.

12 ERIC GLEASON: But, as I said, we have other  
13 competing demands for it, so we don't spend all of it on  
14 this.

15 JIM CLINE: Yeah, I was gonna ask how much  
16 dough we're talking about, from the level of money  
17 (indiscernible).

18 ERIC GLEASON: So one point -- I think a  
19 year ago we calculated since inception that we had -- I  
20 think we were at about 11 million dollars. 10, 11  
21 million dollars over -- it's about ten a year, on  
22 average, to support this program, statewide.

23 JOHN McBETH: This is John. There -- and  
24 there are -- there are people that -- that have needs to  
25 use this money. Brazos is an example. Year-and-a-half

1 ago, at the request of the city councils in Bryan and  
2 College Station, they asked us to study our 5307 Fixed  
3 Route Urban Program because the cities have grown so  
4 rapidly and so quick.

5 And I don't -- I don't have a planner on my  
6 staff, nor will I ever have a planner on my staff,  
7 because you can go out on the free market and buy them.  
8 So we basically floated an RFP and the proposal came  
9 back. And the study that we needed to do to meet the  
10 requirements of the two cities and the county was about  
11 \$375,000.

12 This money could've paid for that study, but  
13 because the funds were not available, we didn't ask for  
14 it. We just went ahead and used our own 5307 money,  
15 planning money and did it that way. But there -- there  
16 are lots and lots of systems in -- in the state.

17 The end result of our study is we're going  
18 to be adding five fixed bus route and three demand  
19 response ADA bus routes that are going to serve, based  
20 upon the projections, an additional probably 400,000  
21 trips a year. That's for a \$300,000 study.

22 So there are a lot of other uses for -- for  
23 these funds that -- that will -- that you can show  
24 you're carrying more people faster. Gonna be able to  
25 cut our head waits down from an hour to 30 minutes. So

1 we're gonna have a lot more frequent riders.

2 ROB STEPHENS: J.R.?

3 J.R. SALAZAR: No, the only comment really I  
4 have is, you know, I think we need to be aware that  
5 there are different circumstances in different parts of  
6 the state. And so I think, people that spoke, that  
7 maybe things up north Texas aren't the same as central  
8 Texas or maybe in some of the more populated areas.

9 But, you know, I don't want to say maybe we  
10 made a mistake or anything like that, but maybe we were  
11 a little ahead of ourselves for -- to not consider  
12 sustainability for the project.

13 ERIC GLEASON: Okay.

14 ROB STEPHENS: Yeah. Michelle?

15 MICHELLE BLOOMER: I -- I just have a couple  
16 of thoughts. I think Eric did a really good job of  
17 summarizing why the committee did what they did. I  
18 understand and I appreciate the position that the  
19 agencies that spoke are in.

20 I go back to the concern that -- since we  
21 started regional coordination we've spent 11 million  
22 dollars on planning, and we still aren't able to  
23 quantify the net number of trips that we've provided  
24 because of that 11 million.

25 So I'm not sure if there's a hybrid or if

1 there's something we can look at, but I don't think we  
2 can continue to fund planning because what we've been  
3 doing is funding staff positions. And in the off years,  
4 the level of effort required is significantly less than  
5 in the year that the plan is being updated.

6 So back to the gentleman from the panhandle,  
7 I think in those off years we're sort of subsidizing  
8 staff activities because we have a much lower level of  
9 effort needed during those off years.

10 My other question, so to Eric, you said  
11 three agencies have stepped back from being the lead  
12 agency role?

13 ERIC GLEASON: Yes.

14 MICHELLE BLOOMER: I don't want to know who  
15 these are, but what types of agen -- were they a Council  
16 of Governments, an MPO, were they health and human  
17 service agency?

18 ERIC GLEASON: We had a -- we have transit  
19 providers and a county that have stepped back.

20 MICHELLE BLOOMER: Okay. I mean, one of the  
21 other things, in order to receive 5310 funds, region  
22 must have a coordination plan. So agencies that -- or  
23 regions that step back from the regional coord --  
24 coordination effort remove themselves from eligibility  
25 for 5310 funds.

1                   ERIC GLEASON: Well, let me clarify. They  
2                   did have an updated plan. And we are still in the  
3                   business of funding that. I think the risk is that, you  
4                   know, having to gear up and restart, you know, every  
5                   five years as opposed to having some level of efforts  
6                   sustained throughout.

7                   I think that's -- that's what we've come  
8                   down to. I think -- you know, my thought was that we --  
9                   I wanted to make my -- make our way through the projects  
10                  that we received so that we would have a sense of the  
11                  kind of projects we were looking at as a result of this  
12                  shift. And, you know, I wanted to have that information  
13                  and I wanted to possibly hear from more. I know a  
14                  number of other lead agencies are considering this  
15                  situation.

16                  So my -- my guess is as plan updates get  
17                  completed, we may begin to hear from more. And then I  
18                  thought maybe at -- possibly not your next meeting but  
19                  the one after that, we might be in a position to come to  
20                  you with some options that would respond to what we're  
21                  hearing; how's that sound?

22                  MICHELLE BLOOMER: I think -- I think that  
23                  sounds like a good idea. Like I said, I'm -- I'm trying  
24                  to find the right word. I definitely don't want us to  
25                  take a step back.

1 ERIC GLEASON: Correct.

2 MICHELLE BLOOMER: We spent --

3 ERIC GLEASON: I understand.

4 MICHELLE BLOOMER: -- the last -- is it 15  
5 years, 12 years, on regional coordination efforts, and  
6 I'd hate for the lack of sustainability to put us back  
7 from where we currently are.

8 ERIC GLEASON: Correct.

9 MICHELLE BLOOMER: If we can figure out how  
10 to continue the sustainability, but still add some sort  
11 of measurable outcome or way to quantify what benefit is  
12 being received from spending these planning dollars,  
13 then I think I would feel much more comfortable moving  
14 forward with a change.

15 ERIC GLEASON: Okay. That's helpful.

16 JOSEPH KOPSER: If I could just add, if it  
17 has been this many years with this many districts, there  
18 have got to be examples of best practices, and I would  
19 love to see some discussion of best practices, because  
20 if there's no real accountability, I don't know how we  
21 are able to measure any return on investment on the  
22 money we've seen.

23 ERIC GLEASON: I think we have -- Joseph, I  
24 think one of the answers, or the observations I would  
25 have for you, that is we have many examples of best

1 practice planning and not as many examples of best  
2 practice project with results.

3 JOSEPH KOPSER: Execution.

4 ERIC GLEASON: Execution. And it's  
5 understood. I mean, we're not being critical of the  
6 planning effort, but there just has to be a balance --

7 JOSEPH KOPSER: I think it's both.

8 ERIC GLEASON: -- in a limited --

9 JOSEPH KOPSER: You're right.

10 ERIC GLEASON: -- funding environment that  
11 we can have some outcomes and that we're trying to find  
12 that sweet spot, if you will, of, you know, where we  
13 land.

14 JOSEPH KOPSER: Talking and doing.

15 ERIC GLEASON: Yeah.

16 ROB STEPHENS: I'd like to close with some  
17 comments of my own, Eric. I -- I can't disagree with  
18 anyone here that made comments about regional  
19 coordination, and the speakers that presented. I just  
20 -- I think this whole thing being driven by 461 in 2005  
21 began with a whole (indiscernible) in that study that  
22 came up.

23 Supposed to coordinate review programing  
24 practices and help us to maximize the state's investment  
25 in public transportation and coordinating with health

1 and human services. We've struggled with success at --  
2 at coordinating with the biggest health and human  
3 service provider in the state, the Medicaid project  
4 (indiscernible). So, to me, that's a huge  
5 disappointment.

6 And I know you're aware of -- you know, all  
7 those efforts have happened. I mean, I've been a part  
8 of some small successes; a couple two, three different  
9 regions with transit providers. Some really good stuff  
10 happened out there.

11 But, to me, that's the hugest disappoint  
12 from this -- from this effort is that we cannot bring  
13 that -- that agency back to the table to work with the  
14 state's investment in public transit as to how do you  
15 move that forward.

16 I don't know where we go with that, but  
17 that's -- that's my comment on that. But otherwise, I  
18 support your efforts in moving in a different direction,  
19 Mr. Gleason.

20 ERIC GLEASON: Well, it's -- we're  
21 responding to this committee's --

22 ROB STEPHENS: Right.

23 ERIC GLEASON: -- desires to see us move in  
24 a different direction that --

25 ROB STEPHENS: I do --

1 ERIC GLEASON: -- I think --

2 ROB STEPHENS: -- appreciate --

3 ERIC GLEASON: -- makes sense.

4 ROB STEPHENS: -- everyone here that's  
5 trying to move it into some direction where we get some  
6 kind of results. Anyone else have anything?

7 J.R. SALAZAR: No, I just have one last  
8 comment, kind of follow up on what Rob said. That's -  
9 that's one of the things that we struggled in our area  
10 as well as we were one of the lead agencies, and we took  
11 a step back and we're deciding not to be a lead agency.

12 And, Michelle, just so you know, just  
13 because we're not gonna be a lead agency does not mean  
14 that we're not gonna participate in the regional  
15 process. We certainly will be at the table and will do  
16 our part, and obviously we know the 5310 is -- is joined  
17 at the hip, if you will.

18 But, yes, it is frustrating when you try to  
19 involve some of the other partners that are supposed to  
20 be there, and for whatever reason, it just doesn't come  
21 out to fruition. So it can be frustrating.

22 ROB STEPHENS: Anyone else? Yes, Jim.

23 JIM CLINE: And, Rob, I don't know the  
24 answer. I'm not gonna propose that I know how to manage  
25 this. I'm just -- I struggle with the idea -- spent

1 some time talking to our friends at Span. They're a  
2 rural provider in the Denton County area. They do that  
3 part.

4 And knowing how tight the numbers are just  
5 to keep the doors open in those, because of where -- the  
6 funding sources, and they're begging and borrowing for  
7 -- for what they need or just what -- to try to get buy  
8 versus the sales tax for your, you know, urban transit  
9 districts.

10 And then seeing how that part of this  
11 regional coordination, that -- got to think about it a  
12 little bit more. I'm struggling a little bit on how you  
13 get -- it's like the 5339. It's not enough money to buy  
14 a bus.

15 ROB STEPHENS: Right.

16 JIM CLINE: This isn't enough to bring a  
17 person. It's not -- you know, are we not -- are we  
18 doing funding in a way that doesn't have an increment --  
19 a usable increment. You know, is it just pieces and  
20 parts and it's kind of being pulled together, so...

21 And I'm sure some of the more -- more  
22 questions than answers. So that's -- seeing what other  
23 people are going through, and it's just a... I can see  
24 the struggle.

25 ROB STEPHENS: Okay, guys. If we don't have

1 anything else, it's an action item, just as the rest of  
2 them, but we can move to item number 8 if you guys are  
3 ready to do that, okay.

4 JIM CLINE: That was 7?

5 ROB STEPHENS: We just took care of 7, yeah.

6 JIM CLINE: Can I just ask, Eric, you said  
7 you were gonna look at some options.

8 ERIC GLEASON: Yes, sir.

9 JIM CLINE: Not decide on an option, but I  
10 think if we talked out of here, I would -- just my -- I  
11 would hope we would at least review options on is there  
12 a hybrid, is there a way we do things. That's what I  
13 heard. I just --

14 ROB STEPHENS: Yes.

15 JIM CLINE: I think in terms of any -- it's  
16 not to say we're gonna do "X" but to say that, you know,  
17 you're gonna look at some options and bring them back, I  
18 think that would be valuable, if there was a question.  
19 Is that appropriate to say?

20 ROB STEPHENS: Yeah, I believe so.

21 ERIC GLEASON: Let me -- let me just be real  
22 clear. We're gonna wait to see what the results of the  
23 current call, what kinds of projects we get out of it.  
24 We're gonna see what other kinds of feedback we're  
25 getting from current lead agencies in this time frame

1 about continuing their efforts.

2 And based on those two things, we may come  
3 to you with options, or we may simply report that what  
4 we thought was an issue was not that big of an issue,  
5 and move on. But we'll come back to you one way or the  
6 other. But if we believe that there's enough  
7 information in front of us that suggests it warrants a  
8 discussion, we'll come knocking, that respond to a lot  
9 of what we covered today.

10 JIM CLINE: So you're gonna come back with  
11 the results (indiscernible) last year --

12 ERIC GLEASON: Come back, and then --

13 JIM CLINE: Come back with the results, and  
14 if there's something doesn't look right, then we'll --

15 ERIC GLEASON: We'll have options.

16 JIM CLINE: That's -- I was just...

17 ROB STEPHENS: And that'll be at the next  
18 meeting, or --

19 ERIC GLEASON: No, I think we're talking --  
20 next meeting we got to save --

21 ROB STEPHENS: Too much stuff, yeah.

22 ERIC GLEASON: -- formula and stuff like  
23 that. We'll go in the --

24 ROB STEPHENS: Subsequent meeting.

25 ERIC GLEASON: -- July -- yeah, subsequent

1 meeting.

2                   ROB STEPHENS: Okay. All right, guys. If  
3 you are ready to move to item number 8, now, this is  
4 just a staple item on our agenda. Discussion and  
5 development of PTAC work plan. See what you've got.  
6 You should have your packet. These are guiding  
7 principles for -- it was updated February 2012.

8                   I think we've had an ongoing discussion here  
9 for the last couple of years. So just make yourself  
10 aware of the -- of the guiding principles. Number one,  
11 support public transportation, and, of course, number  
12 two is promote coordinated transportation.

13                   Underneath those there's some goals and some  
14 objectives in them. We can talk about them, review  
15 them, but it is a -- just a normal staple to have that  
16 open as an item on the agenda for discussion. You guys  
17 have any comments, suggestions, or discussion items you  
18 want to talk about? None? Okay. Well, good.

19                   Then nothing hearing on -- on that item  
20 number 8, and we've taken care of number 9, is there any  
21 -- any other public comment cards, Josh, or anything?

22                   JOSH RIBAKOVE: That is all of the public  
23 comments that -- that we --

24                   ROB STEPHENS: All right.

25                   JOSH RIBAKOVE: -- got.

1                   ROB STEPHENS: Sir, thank you --

2                   JAMES CLINE: Can I ask a --

3                   ROB STEPHENS: -- so much. Yes, sir.

4                   JAMES CLINE: Common commuting question. We  
5 found that we had a bunch of people that were talking --  
6 in this case, we went a whole lot of discussion and then  
7 we got to something totally different for people -- you  
8 know, outside folks.

9                   And our -- our board meetings, a lot of  
10 times what -- and other board meetings have been  
11 involved in the city counsels and things. We know  
12 there's -- it -- it might consider rearranging -- within  
13 the open meetings rules we can rearrange the order of  
14 items --

15                   ERIC GLEASON: Absolutely.

16                   JAMES CLINE: -- right?

17                   ROB STEPHENS: Okay.

18                   JAMES CLINE: What would you suggest when  
19 you think about that?

20                   JOHN McBETH: This -- this is John. At our  
21 board meetings we have public comments after our safety  
22 briefing, at the very top of the agenda, and then we  
23 have public comments at the very end of our meeting so  
24 the public has two opportunities to make comments.

25                   JAMES CLINE: And typically -- and just my

1 suggestion would be the general -- I want to make a  
2 statement about what we're doing. I think that's  
3 probably appropriate at the end. Or it could be --  
4 that's -- that the will of the group.

5 MALE SPEAKER: Yeah.

6 JAMES CLINE: But if we had an item number 8  
7 -- or in this case, 7, should we think about maybe  
8 moving --

9 ERIC GLEASON: Sure.

10 JAMES CLINE: -- 7 up if we know we have --  
11 well, we used to do it, too, we would -- we had a bunch  
12 of --

13 MALE SPEAKER: Sure.

14 JAMES CLINE: -- lawyers that would -- when  
15 your burn rate gets real high, (indiscernible)  
16 altogether.

17 MALE SPEAKER: Yeah.

18 JAMES CLINE: But if you have -- everybody's  
19 time is valuable. I mean, that's just -- we're here for  
20 the duration.

21 ROB STEPHENS: Right. Yeah. Thank you,  
22 James. You're right. We'll -- I'll pay closer  
23 attention to that next time.

24 ERIC GLEASON: You -- you have that  
25 (indiscernible).

1 JIM CLINE: Just -- just a thought, and I  
2 think that's just a courtesy.

3 ROB STEPHENS: I agree, Jim. We'll pay  
4 attention. I'll pay attention. Okay, guys. So if  
5 there's nothing else, no public comments or anything, we  
6 got number 10, Propose and discuss new -- new meeting  
7 time, confirm date of meeting time, or any agenda items  
8 that we want to see on the next -- next meeting.

9 JIM CLINE: You say you're gonna put a  
10 couple of dates together?

11 ERIC GLEASON: I volunteered to have us put  
12 a couple of dates together, anticipating when we might  
13 have a good enough idea on the legislature. If they go  
14 long and things seem in question, we might want to have  
15 a plan "B" date that's (indiscernible). Otherwise,  
16 we're looking at the end --

17 JIM CLINE: (Indiscernible) is the 29th,  
18 right?

19 ERIC GLEASON: It is.

20 JOSH RIBAKOVE: This is -- this is Josh.  
21 Let me just -- just let you know that Monday, May --  
22 Monday, May 29th is Memorial Day. Our typical May  
23 meeting is on the last Tuesday in May, which would be  
24 May 30th. But maybe we want to do a different date  
25 because maybe that holiday will interfere with

1 everyone's schedules.

2 JOHN McBETH: Might want to wait till June.

3 JOSH RIBAKOVE: Well --

4 JOHN McBETH: This is John.

5 JOSH RIBAKOVE: -- might want to wait till  
6 June 6th or 13th. May 23rd is also a possibility. It  
7 really depends on what the committee wants to do.

8 JIM CLINE: Can I suggest 6th?

9 ERIC GLEASON: Let's go with the 6th.

10 JIM CLINE: I think the story's gonna be  
11 told on the budget.

12 ERIC GLEASON: If they finish it, yes.

13 JIM CLINE: Yeah. If they have to go to  
14 special session, that's a -- I mean, all bets are off.

15 ERIC GLEASON: Thanks for coming, guys.

16 ROB STEPHENS: Thank you.

17 ERIC GLEASON: Safe trip back.

18 ROB STEPHENS: June --

19 MICHELLE BLOOMER: This is Michelle. Eric.

20 ERIC GLEASON: Yes, ma'am.

21 MICHELLE BLOOMER: Quick question. We  
22 usually have a PTAC meeting in coordination with the  
23 TxDOT semiannual, and that's earlier. You mentioned it  
24 had been moved up. So how would moving the May meeting  
25 impact the July meeting?

1                   ERIC GLEASON: Okay. The -- this time in  
2 July we are not going to have the PTAC meeting  
3 immediately following the semiannual. The semiannual is  
4 scheduled for the 12th of July.

5                   We are scheduling the PTAC meeting toward  
6 the end of the month, about two weeks later. That will  
7 give us an opportunity to reflect on the discussion of  
8 the rules at the semiannual meeting, and incorporate any  
9 changes into language we put in front of the committee  
10 at their July meeting. So we have about a two-week  
11 separation this year in July.

12                   So I would see -- I don't have an issue with  
13 a June 6th meeting where we knock ourselves out on the  
14 formula. And that gives us, as a staff, enough time to  
15 turn around and consider changes, get ready for a  
16 presentation of options and thoughts at the semiannual,  
17 and have rules written and ready by -- for the committee  
18 to look at, end of July.

19                   I think it works. I wouldn't want to let  
20 that June meeting slide any closer because then I think  
21 you tend to compress our schedule too much in being able  
22 to respond and deflect with changes, anything we might  
23 be hearing.

24                   ROB STEPHENS: Would it be the last Thursday  
25 in July, the 27th, or a Tuesday?

1 ERIC GLEASON: I think we're talking last  
2 Thursday in July. I don't -- is it on there?

3 JOSH RIBAKOVE: I think generally we're  
4 talking about a Tuesday.

5 ERIC GLEASON: Okay.

6 JOSH RIBAKOVE: 'Cause -- 'cause -- yeah.  
7 'Cause the --

8 ERIC GLEASON: Help me out, Josh.

9 JOSH RIBAKOVE: -- commission will be --  
10 will be the -- the last --

11 ROB STEPHENS: When's the commission --

12 JOSH RIBAKOVE: -- Thursday most likely.

13 ERIC GLEASON: Commission is the last  
14 Thursday in July. And right now we are looking at July  
15 25th, which is a Tuesday, right here on the schedule.

16 ROB STEPHENS: Okay.

17 ERIC GLEASON: And that is where we are  
18 hoping to come to you with draft rule text. Again, and  
19 that will put us on target for a proposed rule  
20 introduction at the commission at their August meeting.  
21 I know it's -- it's cumbersome, but...

22 JIM CLINE: So 6th is the date --

23 ERIC GLEASON: We got --

24 JIM CLINE: -- looks like?

25 ERIC GLEASON: Let's go for the 6th of June.

1 (Indiscernible) to also to be plan "B." Yeah, that's  
2 fine. We will -- I'm speaking out of turn, and I  
3 apologize, but we will try and prepare some issue papers  
4 ahead of that June 6th meeting and capture the range of  
5 conversation of the formula. (Indiscernible), keep it  
6 short.

7 ROB STEPHENS: Awesome. Thank you. Okay.  
8 So if we've got that settled, move to item number 11.  
9 I'll entertain a motion to adjourn.

10 JOHN McBETH: So moved.

11 J.R. SALAZAR: Second.

12 ROB STEPHENS: All right, a second. All in  
13 favor say, "Aye."

14 ("Aye" spoken in unison)

15 MICHELLE BLOOMER: Aye.

16 ROB STEPHENS: All right. We're adjourned.

17 (Proceedings Concluded)
