

## CONNECTING OR PARALLEL ROADWAY TO I-35

### Proposed Project – New Braunfels Connector from I-35 to SH 130

#### Project Purpose

The purpose of the proposed connector project is to provide improved roadway connections between I-35 in New Braunfels and State Highway (SH) 130 north of Kingsbury.

#### Project Proposed by Corridor Segment 3 Committee

The project proposed by I-35 Corridor Segment 3 Committee would construct a new four-lane controlled access facility from I-35 in New Braunfels to SH 130 north of Kingsbury.

#### Conceptual Project Cost Estimate

An estimated cost cannot be determined at this time because an active project alignment has not been determined. If the project proceeds in the Segment 3 I-35 Plan, detailed environmental and engineering studies as well as additional public involvement would need to be conducted to determine potential project costs.
