I-35 Corridor Segment Committee 4 – Meeting Notes
10303 Tool Yard, San Antonio, Texas
August 3, 2010 – 9:00 AM to Noon

Welcome

The facilitator Nancy Parker welcomed the I-35 Corridor Segment Committee 4 (CSC 4) members to the August meeting and explained that the two main discussion topics on the agenda were committee sign-up for public workshops and committee review of public workshop presentation boards.

Public Involvement Workshops

TxDOT distributed a handout to committee members that listed all of the scheduled CSC public workshop locations and dates. It was explained that the main committee role at the public workshops will be to staff the display boards related to their proposed projects and answer questions from the general public and media regarding proposed projects. Although the public workshops have been advertised from 6:00 PM – 8:00 PM, the committee shifts are from 5:30 PM – 8:30 PM to ensure there is adequate time to discuss the proposed projects with the public. Public Workshop sign-up sheets were passed around during the meeting initiating committee attendance. The goal is to have at least two committee members staff each public workshop. TxDOT will be communicating with committee members via email to coordinate the staffing logistics. It is expected that the MY35 website (www.MY35.org) will be updated by early September to include all of the public workshop materials. It was noted that a segment-specific meeting flyer, listing meeting locations, dates, and times, will be emailed to committee members for distribution to interested parties.

Review of CSC 4 Public Workshop Materials

The committee then discussed the public workshop questionnaire, which is intended to probe citizens' interest in the committee's proposed projects. It was discussed that the other segment committees had issues related to including Section 3 of the committee survey, which dealt with guiding principles and general policy items, in the public workshop questionnaire. Instead of polling citizens on a myriad of individual policy items, it was decided for consistency that the workshop questionnaire for all segments will instead include an open-ended question that will allow citizens to add comments on any other issues that they may deem relevant to the future planning of the I-35 corridor. It was noted that the committee can still include any or all of the guiding principles and/or general policy items in their report to the I-35 Corridor Advisory Committee (CAC). Only travel demand management questions will remain in *Section 3: Operational Improvements*, due to operational impacts of the proposed roadway and rail solutions.

Staff also asked CSC 4 if they would like to show conceptual project cost estimates on their project fact sheets noting that as with the guiding principles, they were seeking consistency with all of the CSC public workshop questionnaires. After some discussion, the committee opted to remove financial information from the project boards and information sheets. Staff informed

CSC 4 that CSC 3 also chose to remove costs and final action would depend on the opinions of CSC 1 and 2.

The facilitator Nancy Parker gave the committee members some time to review the presentation boards to provide staff with final comments. The following revisions were requested:

- Goals – add “Impacts –use existing right of way to maximum extent possible”, after the environmental goal.
- I-35 Improvements - explain that truck traffic is restricted to the right two lanes.
- Loop 1604 Improvements – reduce project limits to span from I-35 SW to I-10 NE
- Loop 20 Improvements – extend Loop 20 southward to include the Quatro Vientos roadway segment; project intersects US 83 south of Laredo.
- Passenger Rail to Austin and Dallas – define project as High Speed Passenger Rail and revise limits to state “from San Antonio to Dallas”
- Passenger Rail to Laredo – change project title to clarify “Passenger Rail from Laredo to San Antonio”

Wrap-Up / Adjourn

There will be no CSC 4 meeting during September since the public workshops will be the main committee focus. The facilitator Nancy Parker reminded the committee members that she will be contacting them about public workshop sign-up throughout August. The next CSC 4 meeting is scheduled for Thursday, October 14th at the TxDOT San Antonio District Office.

I-35 Corridor Segment Committee Public Planning Workshop Schedule

I-35 Corridor Segment	City	Workshop Date	Workshop Facility	Address
1	Sherman	Thursday, September 09, 2010	Sherman City Hall Council Chambers	220 W. Mulberry
