

# Review possible passenger rail routes!

The Texas-Oklahoma Passenger Rail Study project team has reviewed possible rail routes and types of service and has recommended a few alternatives for further study. Now, it is your chance to review this recommendation and let TxDOT know if these are the right choices to study in more detail.

The study is looking at a range of passenger rail service options along the 850-mile IH-35 corridor from Oklahoma City to South Texas. The study will end with a service-level environmental impact statement (EIS). **Comments on the draft alternatives are due by February 28, 2013.**
