AGENDA ITEM 6
TxDOT Bicycle Tourism Trails Study Update

April 2017 BAC Meeting
April 10, 2017
Agenda

• Approval of interim products
  o Present study vision statement, goals, and study objectives
  o Present project stakeholders of statewide significance

• Example tourism trails done by other states and statewide approaches

• Summary and next steps
Vision

A network of bicycle tourism routes collaboratively developed to provide safe, non-motorized access to and connectivity between statewide/regional destinations and support economic development across Texas.
Goals

- Identify bicycle tourism trail routes
- Foster the development of safe bicycle tourism trails
- Identify benefits of bicycle tourism trails
- Engage stakeholders
Goal 1: Identify bicycle tourism trail routes

Objectives:

1.1 Establish criteria for route locations
1.2 Connect existing bicycle, transit, rail, vehicle, and pedestrian networks with potential tourism trails
1.3 Identify statewide/regional destinations and annual bicycling events
1.4 Identify existing and potential routes
1.5 Map routes
Goal 2: Foster the development of safe bicycle tourism trails

Objectives:

2.1 Establish design criteria for various bikeway accommodations

2.2 Provide estimated costs associated with development of various bikeway accommodations

2.3 Establish procedures for considering state-maintained roadways for inclusion in the USBRS

2.4 Provide guidance for local jurisdictions and other agencies to develop proposed bicycle tourism trails
Goal 3: Identify benefits of bicycle tourism trails

Objectives:

3.1 Identify economic benefits
3.2 Identify health benefits
3.3 Identify environmental benefits
3.4 Identify transportation/travel benefits
Goal 4: Engage stakeholders

Objectives:

4.1 Consult and coordinate with state agencies (including Texas Economic Development and Tourism Office and the Texas Parks and Wildlife Department)

4.2 Coordinate with other government entities

4.3 Engage statewide bicycle interest groups
Who are project stakeholders?

Stakeholder involvement:
• Identify potential routes
• Review route selection criteria
• Review design criteria
• Identify issues or concerns
• Comment on TxDOT’s draft Texas bicycle tourism trail map

Stakeholder qualities:
• Has knowledge of regional bikeways in Texas
• Has expertise in bicycle tourism
• Has responsibilities related to development, promotion and implementation of Texas bicycle tourism trails
• Has potential to be affected by bicycle tourism routing
Potential project stakeholders

Texas Parks & Wildlife
  • Knowledge of recreational trails and other long-distance cyclist destinations throughout Texas
  • Received almost $4 million (about 5%) of TA Set-Aside funding for recreational trails

Texas Historical Commission - *Community Heritage Development Division*
  • Knowledge of long-distance cyclist destinations: Texas Main Street program and the Texas Heritage Trails program

Texas Economic Development and Tourism Office
  • Knowledge of previous and current tourism efforts or economic development incentives

BikeTexas
  • Knowledge of previously considered bicycle tourism trail routes
  • Valuable partner for future support and promotion of BTTS Routes

Regional Planning Organizations
  *Metropolitan Planning Organizations (MPOs) and Councils of Governments (COGs)*
  • Knowledge of local planning efforts, bicycle project development, and valuable local GIS data

Texas Department of State Health Services
  • Knowledge of public health issues and future partner during future promotion phases

Users
  • Knowledge of bicycling needs
Example bicycle tourism routes done by others

National/ Regional Routes

• East Coast Greenway
• Mississippi River Trail
• Great Allegheny Passage (Pennsylvania and Maryland)
• Katy Trail (Missouri)

State Networks

• North Carolina
• Oregon
• Minnesota
East Coast Greenway

Overview:

• 3,000 mile long spine that links urban areas together from Maine to Key West, FL

• Accompanied by 2,000 miles of complementary routes

• Currently, 30% of entire length is shared use path (“on trail”), while remaining portions use low-volume roadways (“interim routing”)

Ultimate design accommodation:

• Build bicycle/pedestrian accommodations for all ages and abilities

• Off-road shared use paths
  - Where shared use paths are not feasible, shared roadways, bike lanes, and sidewalks will be used

For more info: [http://www.greenway.org/](http://www.greenway.org/)
Mississippi River Trail / USBR 45

Overview:

- Generally parallels the Mississippi River, from the river’s headwaters in Minnesota to the its mouth at the Gulf of Mexico, through MN, WI, IA, IL, MO, KY, TN, AR, MS, and LA.
- No current leadership, multi-state coalition fell apart

Accommodation description:

- Minnesota portion is designated as USBR 45
- For adventure touring cyclists (advanced users)
- Bikeways include low-volume roadways with shared lanes, shoulders, and off-road shared use paths
Great Allegheny Passage (Pittsburgh to DC)

Two trails with historic/regional significance for skill levels ranging from average to road warrior cyclists

**Great Allegheny Passage**
150 miles- between Pittsburgh, PA and Cumberland, MD

- Abandoned railroad conversion
- Flat terrain, scenic, off-road shared use path with a crushed limestone surface

**C&O Canal Towpath**
185 miles- between Cumberland and Washington DC

- Parallels historic C&O canal tow path
- Hilly terrain, off-road shared use path with crushed limestone or natural surface
- Designated as USBR 50

For more info: [https://gaptrail.org/](https://gaptrail.org/)

Slides intended for discussion purposes only
Katy Trail - Missouri

Overview:

- 237 mile route across Missouri generally paralleling the Missouri River on an abandoned railroad corridor
- Included in two of Adventure Cycling’s cross-country routes: *Lewis & Clark* and the *American Discovery Trail*

Accommodation description:

- Flat terrain, scenic, off-road shared use path with a crushed limestone surface
- For recreational and adventurous cyclists alike

For more info: [http://www.bikekatytrail.com/](http://www.bikekatytrail.com/)
State approaches to bicycle tourism

Three bicycle tourism approaches were identified in reviewing efforts in other states

• Long-distance bicycle tourist approach
  o Focus on long distance bicycle travelers with minimal accommodations

• Short distance bicycle tourist approach
  o Focus on weekend and short-distance travelers

• General approach
  o No specific focus, but generally led by tourism department. Different agencies providing different levels of leadership/resources/accommodations/etc.
North Carolina - DOT

State approach:

- Cross-state system of recommended bike routes covering 3,000 miles (nine identified routes)
- Routes cyclists on lower-volume roads, generally parallels highways.
- Limited bikeway accommodations (shared lanes and wide shoulders) with limited signage

Promotion:

- DOT interactive online trip planner map with elevation, turn-by-turn instructions, difficulty, roadside bike amenities, etc.

For more info: [https://www.ncdot.gov/bikeped/ncbikeways/](https://www.ncdot.gov/bikeped/ncbikeways/)
Oregon – Tourism Department

State approach:

• Focus on short, weekend, or daily rides
• Inclusive of different types of bicycle trails:
  - Mountain biking, gravel rides, paved roads, and scenic bikeways

Promotion:

• Printed and interactive online maps with photos, text descriptions, turn-by-turn instructions, ride difficulty, planned bicycle events, etc.
• Highlights businesses along routes (economic development focus)
  - Roadside attractions
  - Food, bicycle retail & repair, and lodging

Oregon

For more info: http://rideoregonride.com

For GPS, detailed cue sheets, maps and trip planning information visit: RideOregonRide.com/Bikeways

Slides intended for discussion purposes only
Minnesota – Multiple agencies

State approach:

• Focused on creating a few key routes with minimal accommodations on low-volume roads (USBR 41 and 45)

• State parks feature trails/ off-road shared use paths for locals and tourists

Promotion:

• Tourism department: provides interactive maps with amenity information and ride-finding tools

• MNDOT and each county: provides static (pdf) bicycle map with roadway ADT and shoulders

• Dept. of Natural Resources: provides static maps of off-road trails and shared use paths within state and national parks

• Non-profit partners: provides interactive and printed ride maps

*Information based on introductory research*
This afternoon’s working group meeting

Topics

• Mapping exercise:
  o Routes identified by the working group
  o Previously proposed Texas tourism trails
  o Potential bicycle tourism destinations

• Discussion on criteria for route selection
Action items

TxDOT-PTN & CH2M:

• Continue outreach and data collection process with identified stakeholders

• Report back on the results of this afternoon’s meeting

BAC:

• Email information/ data related to previously proposed bicycle tourism trails in your area
Questions
Thank You!!

Bicycle Advisory Committee
