

Roadway Inventory Annual Reports

2018

Data Management, Transportation Planning & Programming

THIS PAGE INTENTIONALLY LEFT BLANK

Table of Contents

[Definitions and Data Notes](#)

[Comparison with Previous Annual Reports](#)

[Lane Mileage Added to On-System Roadways in 2018](#)

1-On System Reports: This series of reports contains statistics for roadways under the jurisdiction of the Texas Department of Transportation only.

[Section 1.1](#) - Mileage by Highway System

[Section 1.2.A](#) - Mileage by Highway System by Functional System by Roadbed

[Section 1.2.B](#) - Mileage by Highway System by Functional System by Outside / Inside a City

[Section 1.3](#) - Mileage by County by Highway System Inside a City

[Section 1.4](#) - Mileage by County by Highway System Outside a City

[Section 1.5](#) - Acreage by District by Right of Way Surface

2-All Public Roadways Reports: This series of reports contains statistics for all roadways open to public travel, regardless of jurisdiction, and includes all federal, state, city, county, and toll roads.

[Section 2.1](#) - Mileage by District by Highway System

[Section 2.2](#) - Mileage by County by Highway System

[Section 2.3](#) - Mileage by District by Functional System by Population Classification

[Section 2.4](#) - Mileage by County by Functional System by Population Classification

[Section 2.5](#) - Mileage by Highway System by Surface Type

[Section 2.6.A](#) - Mileage for National Highway System by Functional System by Roadbed

[Section 2.6.B](#) - Mileage for National Highway System by Functional System by Outside / Inside a City

3-Toll Roads: This series of reports contains statistics for all roadways that require a toll.

[Section 3.1](#) - Tollway Mileage by District by County by Highway System

[Section 3.2](#) - Tollway Mileage by District by County by Population Classification

4-Historical Trends: This report contains the historical trends in centerline miles, lane miles, daily vehicle miles, and truck vehicle miles. Additional data are given for estimated daily fuel consumption and estimated daily carbon dioxide emissions.

[Section 4.1](#) - Historical Trends-Charts

[Section 4.2](#) - Historical Trends-Tables

Definitions and Data Notes

On-System: Under the jurisdiction of TxDOT.

Off-System: Not under the jurisdiction of TxDOT.

On-System and Off-System data: Unless specified otherwise, all Sections contain both On-System and Off-System data. Only Sections 1.1 through 1.5 contain exclusively On-System data.

Centerline Mileage: Mileage of a segment of roadway, regardless of the number of lanes. Unless otherwise specified, “mileage” in this document is by default centerline mileage. Centerline mileage for mainlanes is calculated separately from centerline mileage for frontage roads, which are considered distinct roadways. For instance, a 1 mile segment of highway with left and right roadbeds, each with four lanes, would be represented as 1 centerline mile. If that segment contained right and left frontage roads, the mainlanes and frontage roads would be represented in the data as 3 unique roadways, 1 centerline mile each, for a total of 3 miles.

Lane Mileage: Mileage of all lanes of a segment of roadway. For instance, a 1 mile segment of highway with left and right roadbeds, each with four lanes, would be represented as 8 lane miles. As with centerline mileage, frontage road lane mileage is calculated separately from the lane mileage of mainlanes.

Daily Vehicle Miles of Travel (DVMT): Daily number of miles traveled by all vehicles. Inclusive of Truck DVMT.

Truck Daily Vehicle Miles of Travel (Truck DVMT): Daily number of miles traveled by trucks only. Unlike other data types, Truck DVMT values are not rounded before aggregation. Therefore, aggregating Truck DVMT by different combinations of subtotal values may result in a negligible discrepancy from the Statewide Total, especially with regard to Rural / Urban subtotals.

Roadway Data Tables: The data for many of these reports are also available in tabular format in the Multi-Year Roadway Data Tables. This document also contains extensive annotations regarding data criteria and calculations, and is intended as a companion to these Annual Reports. The Roadway Data Tables can be found at the following URL:

<https://www.txdot.gov/inside-txdot/division/transportation-planning/roadway-inventory.html>

Comparison with Previous Annual Reports

Population Classification: Beginning with the YE2017 Annual Reports, the names for two of the urban population classifications changed to conform to current federal reporting standards. The name for the classification of Population 50,000 - 199,999 changed from *Large Urban* to *Urbanized*. The name for the classification of Population 200,000+ changed from *Urbanized* to *Large Urbanized*. The population ranges themselves did not change.

Surface Type: Beginning with the YE2017 Annual Reports, the surface type categories changed to conform to current federal reporting standards. A direct correlation cannot be drawn between categories used in the YE2017 and YE2018 Annual Reports and those used in previous years.

Highway Status: Beginning with the YE2018 Annual Reports, Highway Status was removed from Section 1.1 of the Annual Reports for consistency. All sections of the Annual Reports present statistics only for those roadways which were open to traffic in a given year.

Lane Mileage Columns Added: Beginning with the YE2018 Annual Reports, Lane Mileage was added to the following Sections which had formerly reported only Centerline Mileage: Sections 1.2.A; 1.2.B; 2.5; 2.6.A; 2.6.B.

Tollway Mileage: Tollway mileage includes fully tolled facilities, tolled international border crossings, and toll lanes on otherwise non-tolled facilities (including HOT lanes and other types of managed lanes with a toll component). Where toll lanes are present on an otherwise non-tolled facility, the Centerline and Lane Mileage reflect only the toll lanes. However, the DVMT and Truck DVMT will include all mainlanes for the segment, including the non-tolled mainlanes. Prior to YE2018, Tollway Lane Mileage in these reports also reflected all mainlanes for the segment, including the non-tolled mainlanes. Beginning in YE2018, Lane Mileage is available which is specific to the toll lanes.

Lane Mileage Added to On-System Roadways in 2018

All statistics in this series of reports are based upon Year End 2018 certified datasets. A limitation of such statistics is that they cannot be used to reliably determine total capacity added. For example, a simple year-to-year comparison of lane mileage is inadequate for determining how much lane mileage was added to the system in a given year through capacity-adding construction projects. This is because lane mileage increases on some routes may be offset in part by decreases on others, such as those caused by realignments or by On-System roadways being transferred to cities and counties. Furthermore, linework edits and certified dataset updates may not always be made in real time upon completion of a construction project.

If total lane mileage added to the system (aka "built") within a given calendar year is desired, the preferred methodology is to aggregate the added lane mileage from TxDOT Project Tracker. Criteria for this aggregation include construction projects which add capacity and which were completed within that year. Based on that methodology, the following figure may be used:

Approximate On-System Lane Mileage Built in Calendar Year 2018: 268 miles

		District Total	57.821	220.453	4,239,343.687	295,915.938

Tollway mileage includes fully tolled facilities, tolled international border crossings, and toll lanes on otherwise non-tolled facilities (including HOT lanes and other types of managed lanes with a toll component). Where toll lanes are present on an otherwise non-tolled facility, the Centerline and Lane Mileage reflect only the toll lanes. However, the DVMT and Truck DVMT will include all mainlanes for the segment, including the non-tolled mainlanes. Refer to the section "Comparison with Previous Annual Reports" for more information.

		County Subtotal	1.326	2.652	2,640.066	103.428
Harris (102)						
		Urban (>= 5,000)				
		On-System	139.425	319.027	21,759,414.497	1,496,022.027
		Off-System	109.031	638.176	7,874,656.496	695,087.591

Tollway mileage includes fully tolled facilities, tolled international border crossings, and toll lanes on otherwise non-tolled facilities (including HOT lanes and other types of managed lanes with a toll component). Where toll lanes are present on an otherwise non-tolled facility, the Centerline and Lane Mileage reflect only the toll lanes. However, the DVMT and Truck DVMT will include all mainlanes for the segment, including the non-tolled mainlanes. Refer to the section "Comparison with Previous Annual Reports" for more information.

2014	313,596
2015	313,596
2016	313,656
2017	314,319
2018	314,648

2000-2006 Mileage includes open to traffic and under construction. Beginning in 2007, mileage includes open to traffic only.

2014 Traffic-related data was the result of a new data system. Based on this information, statewide Daily Vehicle Miles of Travel (DVMT) decreased 0.6% when compared to the 2013 data, contrary to an expected increase based on other economic indicators which suggest traffic growth in Texas.

Total public roadway mileage was held constant from 2014 to 2015 due to the transition to a new roadway inventory database system (GRID). This transition continued in 2016, when mileage updates were limited to select on-system routes. In 2017, the transition from the legacy system to GRID was completed. Mileage and traffic data were reported for the first time using GRID, and the routine work of roadway edits and additions was resumed.

2015	12,964,669
2016	13,194,793
2017	13,095,044
2018	13,721,538

Gasoline	
Year	Daily Consumption (Gallons)
2015	28,726,776
2016	30,210,254
2017	30,483,234
2018	31,380,365

Daily Total (Diesel & Gasoline)	
Year	Daily Consumption (Gallons)
2015	41,691,446
2016	43,405,047
2017	43,578,278
2018	45,101,903

Annual Total (Diesel & Gasoline)	
Year	Annual Consumption (Gallons)
2015	15,227,800,481
2016	15,853,693,383
2017	15,916,966,038
2018	16,473,470,169

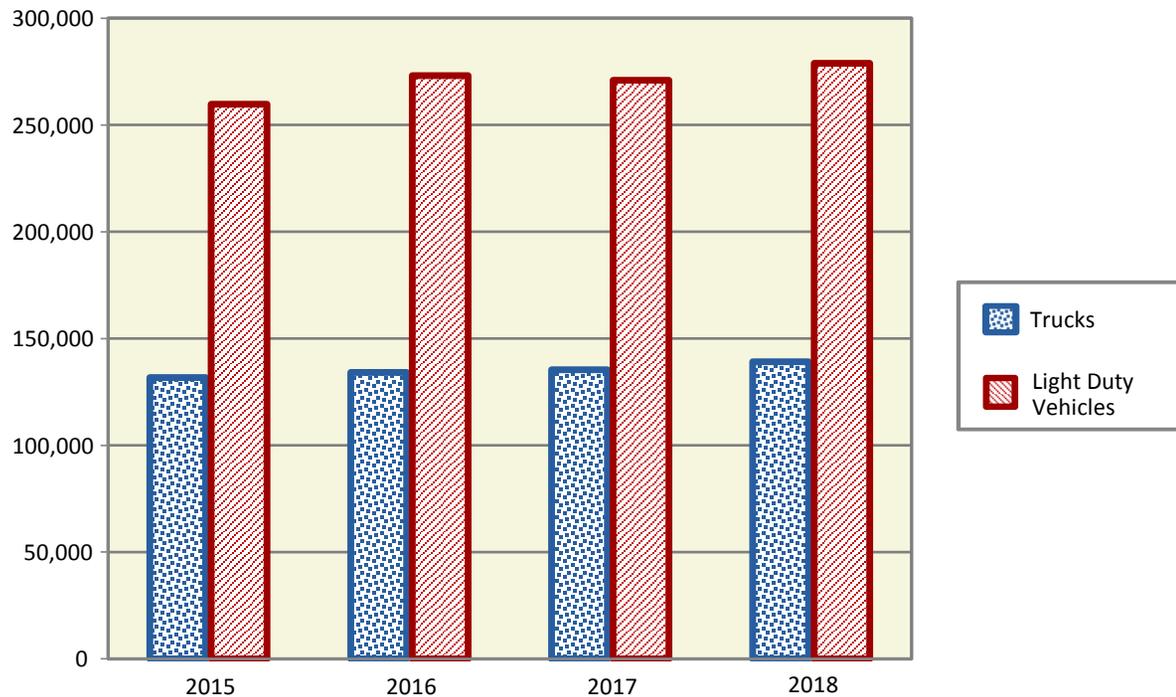

These data are estimates based on the predominant fuel source by vehicle type. Diesel consumption is calculated from Truck DVMT. Gasoline consumption is calculated from Light Duty Vehicle DVMT. Light Duty Vehicle DVMT is derived by subtracting Truck DVMT from Total DVMT. Light Duty Vehicles include cars, pickup trucks, vans, motorcycles, etc. Estimated diesel consumption is based upon an estimated fuel efficiency for trucks of 5.8 MPG (2015-2016) / 5.9 MPG (2017) / 6.0 MPG (2018). (Source: U.S. Dept. of Energy) Estimated gasoline consumption is based upon an estimated fuel efficiency for light duty vehicles of 22.0 MPG (2015-2018). (Source: U.S. Dept. of Transportation) For more detailed source information, please refer to the TxDOT publication "Multi-Year Roadway Data Tables." Other methods of estimating fuel consumption are utilized by other entities but are not reflected here.

Historical Trends-Charts

On-System and Off-System

Estimated Daily On-Road Carbon Dioxide Emissions (Metric Tons)

Trucks	
Year	Daily CO2 (Metric Tons)
2015	131,725
2016	134,063
2017	135,343
2018	139,066

Light Duty Vehicles	
Year	Daily CO2 (Metric Tons)
2015	259,748
2016	273,161
2017	270,935
2018	278,912

Daily Total (All Vehicles)	
Year	Daily CO2 (Metric Tons)
2015	391,472
2016	407,224
2017	406,278
2018	417,977

Annual Total (All Vehicles)	
Year	Annual CO2 (Metric Tons)
2015	142,985,239
2016	148,738,552
2017	148,393,194
2018	152,666,210

Truck DVMT and Light Duty Vehicle DVMT are used as the basis for estimating CO2 emissions. Light Duty Vehicle DVMT is derived by subtracting Truck DVMT from Total DVMT. Light Duty Vehicles include cars, pickup trucks, vans, motorcycles, etc.

Estimated CO2 emissions for trucks are based upon an estimated 3.862 (2015-2017) / 3.733 (2018) pounds of CO2 emitted per VMT. (Source: U.S. Energy Information Admin.)

Estimated CO2 emissions for light duty vehicles are based upon an estimated 0.9061 (2015-2016) / 0.890668 (2017-2018) pounds of CO2 emitted per VMT. (Source: U.S. Environmental Protection Agency). For more detailed source information, please refer to the TxDOT publication "Multi-Year Roadway Data Tables"

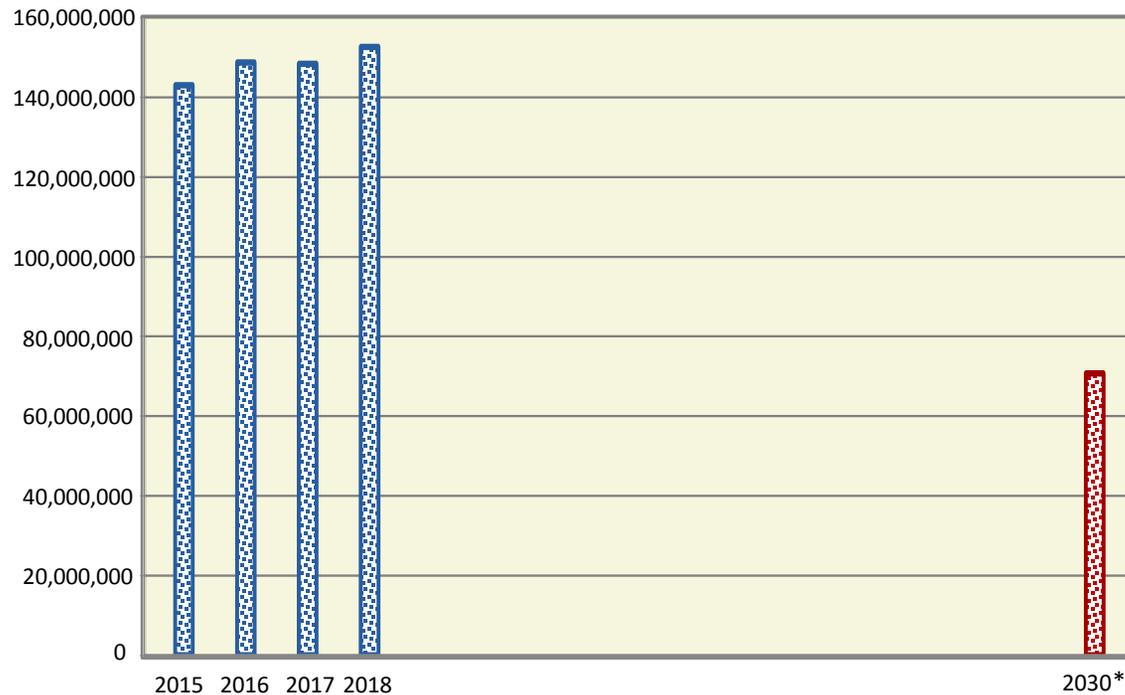

Other methods of estimating CO2 emissions are utilized by other entities but are not reflected here.

Historical Trends-Charts

On-System and Off-System

Estimated Annual On-Road Carbon Dioxide Emissions (Metric Tons)

-  Estimated Annual On-Road CO2 Emissions
-  2030 Estimated On-Road CO2 Emissions Target as set by IPCC*

Year	Annual CO2 (Metric Tons)
2015	142,985,239
2016	148,738,552
2017	148,393,194
2018	152,666,210
2030*	70,768,439

Truck DVMT and Light Duty Vehicle DVMT are used as the basis for estimating CO2 emissions. Light Duty Vehicle DVMT is derived by subtracting Truck DVMT from Total DVMT. Light Duty Vehicles include cars, pickup trucks, vans, motorcycles, etc. Other methods of estimating CO2 emissions are utilized by other entities but are not reflected here.

For detailed source information regarding figures used to derive these estimates, including CO2 emissions per VMT, please refer to the TxDOT publication "Multi-Year Roadway Data Tables."

*Basis for CO2 emissions target: *Special Report on Global Warming of 1.5°C*, published 2018 by the Intergovernmental Panel on Climate Change (IPCC) - "Global net human-caused emissions of carbon dioxide (CO2) would need to fall by about 45 percent from 2010 levels by 2030, reaching 'net zero' around 2050."

Total columns are aggregated using source data which are not rounded. As a result, the rounded Total value may not always equal the aggregation of the rounded values in the corresponding columns.

1970-2006 Mileage includes open to traffic and under construction. Beginning in 2007, mileage includes open to traffic only.

For the years of 1985-1996, "Total Daily Vehicle Miles of Travel" was updated in 2014 with the corrected calculated sum of the values of "Daily Vehicle Miles of Travel (On-System)" and "Daily Vehicle Miles of Travel (Off-System)". 2014 Traffic-related data was the result of a new data system. Based on this information, statewide Daily Vehicle Miles of Travel (DVMT) decreased 0.6% when compared to the 2013 data, contrary to an expected increase based on other economic indicators which suggest traffic growth in Texas.

Total public roadway mileage was held constant from 2014 to 2015 due to the transition to a new roadway inventory database system (GRID). This transition continued in 2016, when mileage updates were limited to select on-system routes. In 2017, the transition from the legacy system to GRID was completed. Mileage and traffic data were reported for the first time using GRID, and the routine work of roadway edits and additions was resumed. 2018 population figure is from U.S. Census Bureau; Annual Estimates of the Resident Population: April 1, 2010 to July 1, 2018 (NST-EST2017-01). Population figures for previous years are from U.S. Census Bureau publications which were current at that time. Population figures for previous years are not updated based upon new census publications.
