

FAQs for ITS Technical Qualification

1. Where can I find projects that require ITS technically qualified bidders?

If the project proposal includes special provision 002-007, then the project requires ITS technically qualified bidders.

2. Will the contractor be required to furnish equipment from the same supplier who was referenced in the Vendor reference statements?

No, the contractor will not be required to furnish equipment from the same supplier who was referenced in the qualification documentation.

3. Is ITS technical qualification the only requirement for bidding TxDOT construction jobs?

No. This technical qualification is in addition to all other bidder qualification requirements set forth by the Construction Division. Please refer to [contractor prequalification](#) for more details.

4. Will the contractor be required to be qualified under all ITS categories of work in order to bid on a particular project?

The contractor will be required to be qualified under the categories of work that apply to the particular project. The applicable categories of work are listed in the “Important Notice to Contractors” Special Provision in the contract.

5. Who is eligible to provide project references?

The project references should be the owner or end user of the system (e.g., a governmental agency).
