

# Clack St Right Turn Only Project

Clack Street is among the busiest in the City of Abilene. The frequent turns and speed variations coupled with acceleration from side streets and driveways have created a highly stressful situation for drivers going to and from the many destinations adjacent to the road and city streets.

Persuading thru traffic to use the left two lanes of this stretch of frontage road should permit exiting and entering traffic to do so in a less-stressful environment. Reducing speed variation and weaving while increasing driver expectation and overall safety in this locale are the end goals.

This plan is seen as a cost effective (paint and sign only), interim step to improving the driving experience for the traveling public along this stretch of frontage road. Improving the safety of the thru-road users and the patrons of the many retail stores, restaurants and other businesses in this vicinity can be a win-win for all involved.
