

I-10/US 69 Interchange Improvement Project

What is this Project About?

The Texas Department of Transportation Beaumont District is proposing to reconstruct and expand I-10 and US 69 where they converge in Beaumont, Jefferson County, Texas, as part of the I-10/US 69 Interchange Improvement Project. The proposed project is anticipated to improve mobility, reduce congestion and also improve emergency evacuation.

The approximately five-mile project includes:

- Widening the existing I-10 roadway from Walden Road (County Road 131) east to US 90 (College Street), and then also from Hollywood Overpass to 7th Street in each direction from four to six lanes
- Widening the existing US 69 roadway from Walden Road (County Road 131) east to US 90 (College Street), and then also from Hollywood Overpass to 7th Street in each direction from two to three lanes
- Constructing two-lane direct connectors, or elevated flyover ramps, where I-10 and US 69 converge
- Relocating some I-10 ramp locations, which may include Delaware Street; Gladys Avenue; Calder Avenue; College Street; and Washington Boulevard - TxDOT encourages the public to provide feedback about ramp location preferences
- Possible changes to Maury Meyers Bridge (Liberty/Laurel Overpass) may be necessary to meet freight standards

How do I Provide Feedback and Ask Questions?
