## What is this Project About?

The Texas Department of Transportation Beaumont District is proposing to reconstruct and expand Interstate Highway 10 (I-10) and US Highway 69 (US 69) where they converge in Beaumont, Jefferson County, Texas, as part of the 10/69 Interchanges Project. The proposed project is anticipated to improve mobility, reduce congestion and also improve emergency evacuation.

The approximately five-mile project would include:

- Widening I-10 from Walden Road (County Road 131) to 7th Street and widening US 69 from Fannett Road (State Highway 124) to 11th Street.
- Between the Cardinal Drive and Eastex Freeway interchanges, the roadway would be widened in each direction from four lanes to five lanes. The roadway approaches to the Cardinal Drive and Eastex Freeway interchanges on I-10 and US 69 would be widened in each direction from two lanes to three lanes.
- New frontage roads for continuity throughout the project limits, relocating I-10 ramps, and constructing two-lane direct connectors in each direction where I-10 and US 69 converge.
- In addition, the project includes removing the Maury Meyers Bridge (Liberty/Laurel Overpass) to address a height constraint for freight and upgrading drainage to meet current design standards.

The project area includes existing right-of-way (ROW) of I-10 and US 69. Existing ROW at the Eastex Freeway interchange varies from approximately 250 feet to 350 feet. Existing ROW at the Cardinal interchange varies from approximately 290 feet to 450 feet. Approximately 11 acres of additional right of-way are anticipated as part of the proposed project, including potential easements or right-of-way for drainage. This project is addressing an existing roadway facility; no new location or new alignment is anticipated.

## How Do I Provide Feedback and Ask Questions?

- **Submit your comments tonight:**
