

How did you hear about this meeting?

What are reasons that people cross the border?

Visit family

Hauling freight

To get to the other side

Work

Culture, Goods, Services

Work, study, visit family

Family, jobs, economic,
medical

Family visits

To work, to shop, to visit
family,

What are reasons that people cross the border?

Business

To work, education, family, shopping, medical needs.

School, a lot of the students of the high school i went to lived in Nuevo Laredo and would cross in the morning to come get an affordable education

Businesses and families

To move cargo

Leisure/Daily commute/To run errands

Business, Study, Family, Commerce

Many reasons...to work, visiting family, vacations, shopping

Hauling freight, work, family,

What are reasons that people cross the border?

Commerce and trade

Work Shopping Tourist

Commerce

work, trade, citizenship, to sell
or transport drugs and human
trafficking

Visit family Work Business
Many reasons

Shop

Shopping

Commerce and trade

Dine

What are reasons that people cross the border?

Commerce

Visit family

Trade

For work, shopping, travel into the states to visit family

Turism

International trade

Living both sides

i never go to Mexico

Laredo, TX - Bridge (Puente) 1 & 2

What are reasons that people cross the border?

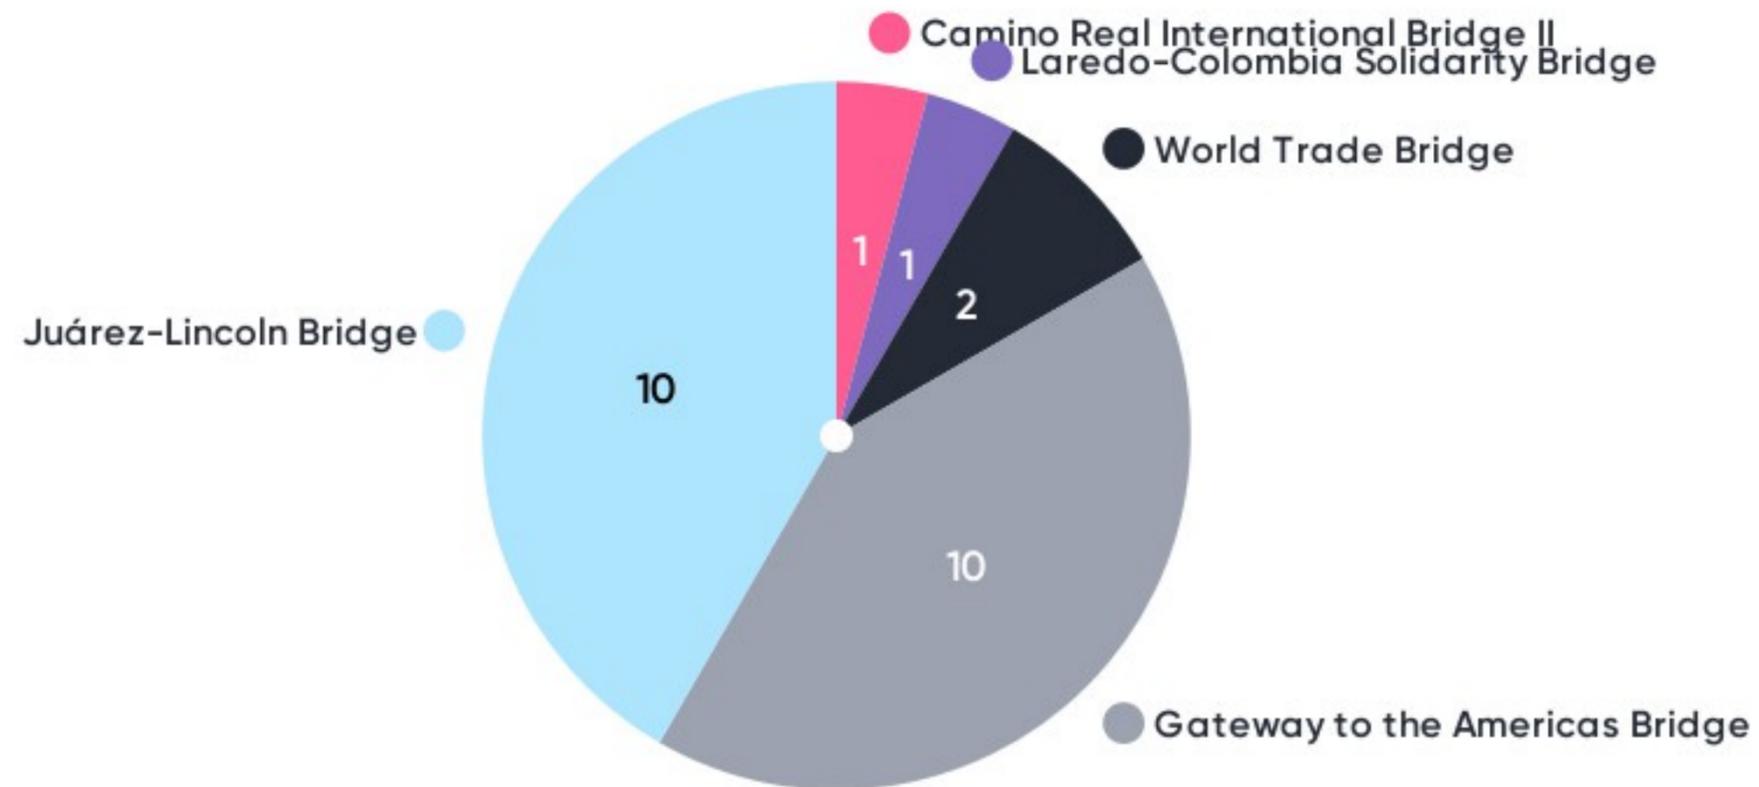

Laredo, Tx Juarez-Lincoln
Bridge

trade, work, shopping, sell
drugs or human trafficking

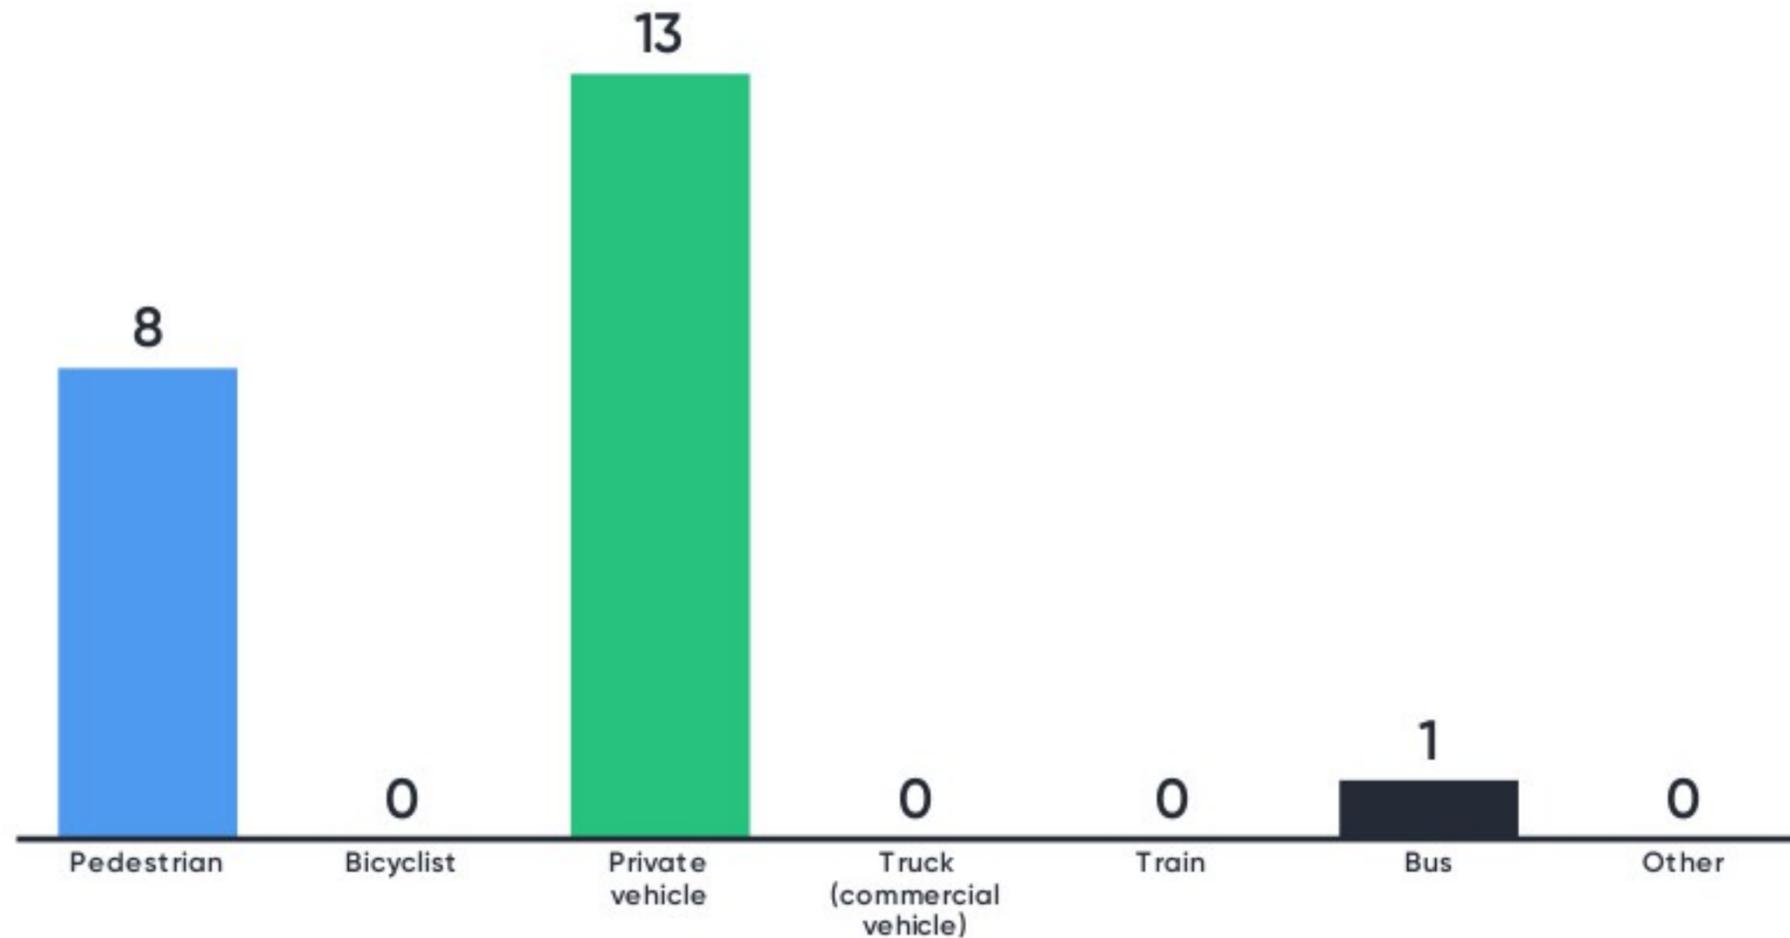

a process to account for every driver person,
package and truck from their point of origin to
their destination

Which border crossing do you normally use when you cross the border?

When you cross the border, how do you do it? (transportation mode)

What are the greatest challenges and/or needs at the border crossings?

CBP waiting times/New bridge in this area.

Traffic congestion.

Long lines and aggressive cbp

Balancing efficiency and security

Very full, hard to cross on time, the cameras are very delayed or sometimes do not work so it's hard to tell how many people are at the border and how much time one will have

Traffic; Taking Heavy Equipment through security checkpoints

Proper staffing at customs

Congestion, safety, politics, economic vitality of the larger region

Modernization

What are the greatest challenges and/or needs at the border crossings?

Capacity

Inspectors are needed

Grow

Reduce hazmat loads through the heavy populated areas (train). Reduce congestion in times of high volume. Ensure safe passage for cargo in and out of Mexico

Moving Oversize/Over weight

Secure Truck Parking Capacity, Traffic Management Systems, Communication Redundancy.

Processing people and vehicles faster

More POE

Border security

What are the greatest challenges and/or needs at the border crossings?

Safety

Lack of truck parking

Traffic challenges - CBP checkpoints

Traffic problems downtown

Poor roadways connections to and from the border crossings

Tractor trailers get inspected many times as they cross the border

Safety

Mechanical Problems during traffic

Connectivity

What are the greatest challenges and/or needs at the border crossings?

Media Awareness

Properly staff with personal is needed.

New connections to industrial parks from I-35. Hachar Parkway

I-69 needed upgrades to link to the Port of CC. Hwy 359 improvement- connection to the valley.

Add more crossings

Large amtd of traffic congestion due to warehouses.

Increased technology for inspection and streamlined crossings. Autonomous drayage Intelligent Traffic Systems (ITS) Informational Parking Message

What are the greatest challenges and/or needs for the transportation network linking to the border crossings?

Better Infrastructure

Congestion

Connectivity

CBP

Complete corredor Mex- USA

Congested roadways at the local level; keeping Texas roadways in good condition

Cogestión and difficulty crossing checkpoints

Reducing congestion in mines road area and industrial parks through additional roads between mines road and I35

Infraestructure

What are the greatest challenges and/or needs for the transportation network linking to the border crossings?

HWY

Expedite traffic

Movement through population areas ...
congestion moving goods and people north ...
lack of alternatives

Loop 20 unsafe conditions with
lots of congestion and very
tight and unsafe lanes

More inspectors, long wait
times at crossings and more
customer friendly attitude

Better infrastructure, friendly
CBP, better promotion of the
city

Poor design projects

Added capacity, Alternate
routes, Mitigate congestion

Poot design

What are the greatest challenges and/or needs for the transportation network linking to the border crossings?

Media Awareness - Google Maps queue times, etc

Outdated design for border crossings and corridors

Congestion and difficulty crossing checkpoints

One corridor - north / south - Mex/US/Canada

Need for truck only lanes on I-35

Real time collaboration needed to allow for smoother transportation system

Additional crossing

Widening bridge to accommodate more traffic

Share monthly counters or sensor data regularly with public to reduce queue time

What are the greatest challenges and/or needs for the transportation network linking to the border crossings?

lack of industry knowledge in product COGS, scheduling for on time delivery and technology to connect the exporter, importer and retailer or manufacturer on both sides

What ideas do you have for improvements at the border crossing?

Additional bridges

Build an additional bridge for the efficiency of the border crossing.

Need another bridge to alleviate corridor of mines road

(Temporary) Guest passes to allow local citizens (with ID) to travel back & forth with ease

status updates for bridge with new cameras that help to see the bridge better, maybe an app that can help this, we can become more modern

Google Maps collaboration with real time traffic reports (including construction, preferred pathways, etc.)

Ensure infrastructures are sufficient for need and continuous growth. Additional bridges may be needed for future.

existing border crossings must be adequately staffed to facilitate better cross-border movement of goods and people

Relocate the rail;

What ideas do you have for improvements at the border crossing?

Technology

Expedient, efficient faster processing

Loop connectivity

What ideas do you have for improvements for the transportation network linking to the border crossings?

Synchronized Mobile Networks

Outer loops very necessary

A 4th lane for I-35, finishing the loop 20 and mines road area

Connections between mines road and 35

More funding to improve roadways

I would say the same thing I said on last question, it will be better the infrastructure to have a an efficient way of to relieve the traffic.

Look for long term alternatives ... Freight Mobility Plan identified the extension of I-27 between Laredo and Lubbock as a Strategic Project

Google Maps integration

Proper technology implemented on full corridor

What ideas do you have for improvements for the transportation network linking to the border crossings?

Move trains to colombia or to a new crossing away from the city

Relocate the rail bridge;
Alternate routes; Increase capacity

Increase number of lanes on i35 to San Antonio on i35, increase lanes on hwy 59 as well.

Connectivity

Infraestructure

Safe transportation of people & goods

i will bring a plan to tomorrows meeting.

Economic competitiveness

What is the most important goal for the BTMP?
