TxDOT is proposing the construction of US 287 frontage roads (northbound and southbound) within existing right of way, from north of Heritage Parkway to south of the Union Pacific Railroad and from south of Heritage Parkway to north of Lone Star Road. U-Turn lanes would be provided at the north and south ends of the project. Continuous sidewalks would be added to accommodate pedestrians as well as curb-and-gutter and drainage structures. Auxiliary lanes would be added to the US 287 mainlanes in both directions between Heritage Parkway and Lone Star Road. The existing southbound exit ramp and northbound entrance ramp between Heritage Parkway and Lone Star Road would be relocated to the north to meet current design criteria. Lone Star Road would be widened from two lanes to six lanes. A new eastbound Lone Star Road bridge would be added over the US 287 mainlanes for eastbound traffic and a new bridge would be added to accommodate the U-Turn lane.
