The Texas Department of Transportation (TxDOT) is conducting a Planning and Environmental Linkages (PEL) study on I-10 East from I-69/US 59 in Harris County to SH 99 (Grand Parkway) in Chambers County.

What is a PEL Study?
• An early planning study that links planning and the National Environmental Policy Act (NEPA) environmental studies.
• Initiates coordination with oversight agencies, stakeholders, and members of the public.
• Streamlines the overall project development process and minimizes duplication.

Why is TxDOT Preparing a PEL?
• I-10 East is a heavily congested freight corridor.
• PEL allows TxDOT to explore improvements for a variety of transportation modes, such as high-occupancy vehicle lanes, truck lanes, bus rapid transit, rail, bicycle, and pedestrian.
• The PEL process will identify projects for future implementation based on needs within the study area.
