

APPENDIX D3: PM #1 KGS MEETING REPORT

Documentation of Open House

Project Location

Kendall County, Texas

Kendall Gateway Study

Project Limits

City of Boerne and Kendall County, Texas

Meeting Location

Boerne Middle School South, 10 Cascade Cavern, Boerne, TX, 78015

Meeting Date and Time

January 17, 2017 from 6:00 to 8:00 p.m.

Translation Services

Spanish

Presenters

N/A (open house format)

Elected Officials in Attendance

Charlie Boyd, Councilman, City of Boerne

Ron Cisneros, Councilman, City of Boerne

Roy Elizondo, Alderman, City of Fair Oaks Ranch

Garry Manitzas, Mayor, City of Fair Oaks Ranch

Richard Elkins, Commissioner, Kendall County

Darrel L. Lux, Judge, Kendall County

Michael Koerner, Regional Director, U.S. Senator Ted Cruz

Total Number of Attendees (approx.)

255 (excluding project team members)

Total Number of Commenters

33

Contents

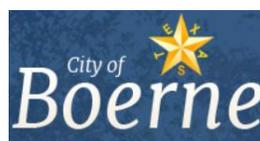

- A. Comment/response matrix
- B. Notices
- C. Sign-in sheets
- D. Comments received
- E. Figures
- F. Description of project modifications resulting from public meeting (if applicable)
- G. Open House Summary and Analysis Report

APPENDIX A
COMMENT/RESPONSE MATRIX

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
1	Dan R. Banks	1/12/2017	Email	I am providing a copy of the Final "Thoroughfare Planning Citizens Committee Report" for Kendall County of which I was a principle architect. I think you will find it interesting and comprehensive.	Thank you for the copy of the report. It will be a valuable planning tool.
2	Dan R. Banks	1/17/2017	Comment Form	Please see the TPCC Report prepared in 2007-2008 timeframe. Has good ideas!	Thank you for the copy of the report. It will be a valuable planning tool.
3	Karen Bearss	1/17/2017	Comment Form	We need to have all the development people help to pay for the road development.	No future projects have currently been determined. The feasibility study will provide valuable information on the transportation needs and priorities in the area.
				When they build - they tear up the roads - yet just repair what they tear up. They need to improve the road.	Kendall County is dedicated to the safety and welfare of all property owners. The Development and Floodplain Management Division for Kendall County is acutely aware of challenges.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				Are just real estate agents in charge of Boerne?	Since 1909, when the City of Boerne was incorporated, growth management has been a complex issue. The Planning and Community Development Department works with individuals, developers, and City staff to implement City policy while facilitating community objectives.
4	George Blatt	1/19/2017	Email	Are the maps and text of the study posted on either the city/county or TxDOT websites?	Yes. Project information can be accessed at www.txdot.gov and use keyword: <i>Kendall Gateway Study</i> .
5	Leon Brimhall	1/17/2017	Comment Form	Make schools (high schools) parking better.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area potentially including areas around schools, if applicable.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
6	James Cannizzo	1/17/2017	Comment Form	As a representative of the Army (Camp Stanley and Camp Bullis), the commenter's main priority is improving I-10 in northern Bexar County. "I-10 is rapidly becoming congested to the point that peak traffic times have lengthy delays...Expediting adding the 4 lanes to I-10 and finishing the frontage road work is #1 for us." See James Cannizzo comment form in Attachment D, page D-4 of the Documentation of Open House.	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p> <p>TxDOT is currently improving I-10 as suggested by the commenter.</p>
				The commenter is concerned with improvements to FM 3351 (Ralph Fair Rd). "[Our] #2 [priority] would be adding two lanes to FM 3351 (Ralph Fair Rd)." See James Cannizzo comment form in Attachment D, page D-4 of the Documentation of Open House.	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p> <p>TxDOT is currently studying FM 3351 under a separate effort from the Kendall Gateway Study.</p>

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
7	Jonna Clark	2/1/2017	Email	It is critical that mobility be a priority. But mobility also means keeping traffic moving.	Agreed.
				The commenter suggests installing smart traffic lights, specifically at the Old San Antonio Rd and Herff Rd intersection. "Install smart traffic lights so that traffic doesn't sit at a red light for nobody." See Jonna Clark email in Attachment D, pages D-41 thru D-42 of the Documentation of Open House.	Comment noted. A traffic study will be conducted for the Kendall Gateway Study project.
				The commenter suggests converting traffic lights to allow for a left turn on yield, specifically at the following intersections (1) Hwy 46 westbound at Herff Ranch Blvd. and (2) Hwy 46 East and westbound at Charger Blvd/Woods of Boerne Blvd. "On all lights with a protected left turn signal, make these left turn lights allow for left turn on yield." See Jonna Clark email in Attachment D, pages D-41 thru D-42 of the Documentation of Open House.	Comment noted. A traffic study will be conducted for the Kendall Gateway Study project.
				Coordinate construction zones, specifically speed limits.	Comment noted. A traffic study will be conducted for the Kendall Gateway Study project.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				The commenter suggests converting traffic lights at the following intersections to flashing after a designated hour (10 pm): (1) Hwy 46 and Herff Ranch Blvd, (2) Hwy 46 and Charger Blvd/Woods of Boerne Blvd, (3) Herff Rd and Oak Park Dr, and (4) Old San Antonio Rd and Herff Rd. See Jonna Clark email in Attachment D, pages D-41 thru D-42 of the Documentation of Open House.	Comment noted. A traffic study will be conducted for the Kendall Gateway Study project.
				The commenter suggests installing a right turn lane at the following two intersections: (1) South Main (northbound) onto Herff Rd (the extension) and (2) Old San Antonio Rd (northbound) onto Herff Rd. See Jonna Clark email in Attachment D, pages D-41 thru D-42 of the Documentation of Open House.	Comment noted.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
8	Barry Denton	1/2/2017	Email	The commenter mentioned the number of San Antonio commuters who travel to the SH 46/FM 3351 (Ralph Fair Rd) area. "I am amazed at the number of people from the San Antonio area who venture out this way and still think that traveling through Boerne is the only route." See Barry Denton email in Attachment D, page D-43 of the Documentation of Open House.	Comment noted.
				I've spoken with many who live east of Boerne and would be open to a alternative route (FM 3351 and Ammann Road) vs. having to drive through Boerne and congested areas related to schools and increased congestion from Esperanza and other developments.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				An extension of Bentwood over to Esperanza will be important to mitigate traffic on Hwy 46.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
				Improvements to Ammann Road (Comal County participation would ultimately be necessary east of FM 3351) could alleviate traffic on Hwy 46 as the only other east/west arterial north of Cibolo Creek.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth. Please note; however, that areas suggested by the commenter are beyond the limits of this current study.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				If possible, Ammann Road re-routed to extend west along the north side of Fair Oaks Ranch from where it currently makes a 90 degree turn to the north, and continuing west to an approximate intersection at Boerne Stage Rd and IH10 (intersection currently under construction) would make for a nice alternative.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
				If 3351 is improved (widened, additional lane(s) added, intersection at IH10 improved to handle more cars expeditiously), many would use that alternative to reach areas east of Boerne.	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p> <p>TxDOT is currently studying FM 3351 under a separate effort from the Kendall Gateway Study.</p>

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				Widening Ammann and eliminating the rises and dips in that road, and the re-routing as described above, would seem to provide increased traffic there as well and alleviate congestion on Hwy 46.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
9	Eugene A. Gibbs, Jr.	1/17/2017	Transcript of Verbal Comment	The commenter is concerned with the current construction to widen the underpass at Scenic Loop Drive and I-10. "In my opinion, that is just a patch. It is way under-engineered for the traffic." See Eugene Gibbs verbal comment in Attachment D, pages D-28 thru D-29 of the Documentation of Open House.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				<p>The commenter is concerned with the amount of traffic that a new subdivision at the corner of Cascade Caverns and Ranch Drive will bring to the Scenic Loop Drive and I-10 intersection. "...when they finish the development, that's just going to be unbelievable traffic on Cascade Caverns to get to the intersection..."</p> <p>See Eugene Gibbs verbal comment in Attachment D, pages D-28 thru D-29 of the Documentation of Open House.</p>	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p>
				<p>I think what TxDOT is doing is wonderful. It's great, but it's not enough. It is not going to handle the traffic.</p>	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p>

10	Mike and Cindy Hagan	1/17/2017	Comment Form	Divert traffic around the city so traffic in the city is from people who want to be in the city.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
11	Burt Hickman	1/17/2017	Comment Form	The commenter is concerned with the impact developments could have on the potential plan to turn Hwy 46 into an outer loop for San Antonio to accommodate traffic from I-35 to I-10 West. "If you are strongly considering this approach, you should start widening Hwy 46 now, rather than later, while you still have less development because [the traffic] is growing." See Burt Hickman comment form in Attachment D, page D-6 of the Documentation of Open House.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				Include a bypass in the City of Boerne.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
12	Scott D. Hoiberg	1/17/2017	Comment Form	Study done for more and safe bike [non motor] routes throughout the city and surrounding communities.	Concern for inclusion of bicycle routes and safety noted.
				Study done for widening [SH] 46 from county line into Boerne to make it an effective road for moving in and out of Boerne at peak traffic times.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
13	Debby S. Hudson	1/17/2017	Comment Form	Thank you for the forum to voice our concerns.	Thank you for attending the open house and participating in the feasibility study process.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				It would be great for 46 to be a 4 lane highway between Boerne and Bulverde.	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p> <p>TxDOT is currently studying SH 46 for expansion as suggested by the commenter in an effort separate from the Kendall Gateway Study.</p>
				The flooding at Herff Rd and 46 should be addressed.	<p>Drainage is an important consideration for any transportation-related project. Drainage considerations will be featured as a key discussion item and study component for the Kendall Gateway Study.</p>

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				A direct road connecting 474 and 3351 would be most helpful.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
14	Christine Jacobs	1/17/2017	Comment Form	The commenter is concerned with planning for safety, traffic control, and quality of life due to increases in growth and revenue in Boerne. "Rapid growth has impacted safety, flooding, green space, traffic congestion. A well thought out [and thorough] plan would be much appreciated." See Christine Jacobs comment form in Attachment D, page D-9 of the Documentation of Open House.	We agree, all of these elements are important considerations for the Kendall Gateway Study feasibility process.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
15	Theodora Kaufmann	1/17/2017	Comment Form	The commenter is against any changes to access from Ammann Rd to SH 46 and requests a traffic light at this intersection. "We are very concerned about rumors that Ammann Rd would go through another subdivision (Dana Green's subdivision) to be able to access onto 46."	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p> <p>TxDOT is currently studying SH 46 for expansion as suggested by the commenter in an effort separate from the Kendall Gateway Study.</p>
16	Theodora Kaufmann	1/17/2017	Transcript of Verbal Comment	The commenter is against any changes to access from Ammann Rd to SH 46 and requests a traffic light at this intersection. "We live on Ammann Road, and there is rumors that they're trying to get Ammann Road to go into another subdivision and come out Dana Green subdivision, and we don't want that. We just need a light. We don't have a light, so it is kind of dangerous right now with the traffic." See Theodora Kaufmann verbal comment in Attachment D, page D-28 of the Documentation of Open House.	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p>

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				The commenter would like the speed limit on SH 46 at Ammann Road to be 45 mph, rather than 55 mph. "...move the speed limit back--further back on 46 so people can start entering there at 45 [mph] instead of 55 [mph]." See Theodora Kaufmann verbal comment in Attachment D, page D-28 of the Documentation of Open House.	A speed study to evaluate safety and traffic optimization will be prepared for the Kendall Gateway Study.
17	Thomas Kaufmann	1/17/2017	Comment Form	Please put a 4-way traffic light at Ammann Rd and Hwy 46.	TxDOT is currently studying SH 46 for expansion as suggested by the commenter in an effort separate from the Kendall Gateway Study.
				Reduce speed on Hwy 46 prior to Ammann Rd.	A speed study to evaluate safety and traffic optimization will be prepared for the Kendall Gateway Study.
				Make a turn lane on Old San Antonio Rd at new intersection onto Herff.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
18	John Kight	1/22/2017	Email	Many of the attendees...were expecting to see some sort of preliminary recommendations suggesting alignment proposals addressing future traffic demands. That left the public with little to comment on except for vague or generality type comments about future needs.	A feasibility study defines a problem, gathers data and recommends solutions that will best meet challenges. The process considers the benefits and costs of each solution, effectiveness of implementation, alternatives considered, environmental impacts, public opinions and input as well as other factors. Engineers and planners summarize these issues and analyze the reasons for selecting a preferred alternative in their implementation plan.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				The commenter provided background information on a Thoroughfare Planning Citizens Committee and Report that was created, but not adopted, in 2005 and 2006 to identify future mobility needs within Kendall County. "Now here we are a little over a decade [later] facing real traffic congestion problems with most of the previously identified transportation corridors blocked by developments. It's going to be extremely difficult, controversial and expensive to find realistically acceptable routes to fulfill future traffic demands, both north and south of Boerne." See John Kight email in Attachment D, pages D-44 thru D-45 of the Documentation of Open House.	Thank you for the report. This information will be a valuable tool for the study team.
				S.H. 46 to the east is really building up and is getting to be a real problem, particularly before and after school hours. Due to the subdivisions in that area there needs to be five lanes out to past Ammann Road.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				From Boerne to New Braunfels, S.H. 46 needs to be widened to four lanes with center turn lanes in some places. With no funds for that, then and intermittent three lane section should be provided to allow for passing at certain spacing intervals.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
				On S.H. 46 west of Boerne there needs to be provisions for a right and left turn lane at the road to the Deep Hollow and Tapatio Springs subdivisions.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
				The section of S.H. 46 from Boerne west to S.H. 16 has some very bad horizontal alignments in places that need corrections for safety.	Thank you for the information on the safety area of concern.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				Due to recent industrial growth and Love's Truck stop in Comfort, Texas the interchange and frontage roads at I.H. 10 and U.S. 87 need to be reconfigured for safety as soon as possible.	Thank you for the information on the safety area of concern.
				The proposed I.H. 10 project between S.H. 46 and the current Scenic Loop project needs to be let as soon as possible, consistent with funding restraints.	Comment noted.
				The commenter mentioned a proposal to extend the new Herff Road across Main Street to the west and north to intercept Christus Parkway to allow Herff Road traffic to access westbound IH 10 without going through the City of Boerne. "It might stave off, for a while, the need for a loop around the north side of Boerne since that route is going to be very difficult and [expensive] to obtain." See John Kight email in Attachment D, pages D-44 thru D-45 of the Documentation of Open House.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
19	John Kight	1/23/2017	Email	The commenter mentioned the approval by the Kendall County Commissioner's Court to add an approximate 1,100-acre subdivision along SH 46 east of Boerne near Brandt Road. "There could be 700 to 900 new homes in this subdivision with commensurate future traffic volumes on S.H. 46 for this one way in and one way out gated subdivision. More reasons to do something to S.H. 46 sooner." See John Kight email in Attachment D, page D-46 of the Documentation of Open House.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
20	Carol Kovaes	1/17/2017	Comment Form	The commenter supports the idea of a mass transit/train station located in an uncongested area to reduce congestion on roadways. "Those choosing to use mass transit would no longer be part of the traffic causing the most congestion." See Carol Kovaes comment form in Attachment D, page D-12 of the Documentation of Open House.	Support of mass transit options noted.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
21	Stephanie Lau	1/17/2017	Comment Form	Boerne residents need a second way to access LP 1604.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
				Any improvements to Hwy 46 or I10 should include wildlife crossings and attention to trees and native wildlife and plants and avoid Cascade Caverns.	Comment noted. An Environmental Constraints Analysis Technical Report will be completed to analyze and address environmental resources throughout all stages of project development.
				Large roads should outlive new subdivisions so they don't slow speed of traffic and still give residents a new route to the highway.	Comment noted. An Environmental Constraints Analysis Technical Report will be completed to analyze and address environmental resources throughout all stages of project development.

Comment/Response Matrix

Commenter #	Commenter Name	Date Received	Source	Comment Topic	Response
				The commenter suggests using the existing Old No. 9 railroad right-of-way that connects Boerne to Van Raub to build a loop. "Use that existing route for a loop." See Stephanie Lau comment form in Attachment D, page D-13 of the Documentation of Open House.	No future projects nor their alignment, if any, have currently been determined. The commenters recommendation for using the Old No. 9 right-of-way is noted.
22	George H. Lewis	1/18/2017	Email	What I did not see [at the Open House was] any future plans in place for the next five years of [TxDOT] or county road improvements. This was a total waste of my time.	Thank you for the comment. Although the public often expects to see alignments early on, as a feasibility study project, it would be inappropriate to show solutions before gathering input from the public to define the problem first.
23	Gary McWilliams, MD	1/17/2017	Comment Form	Please engineer and build for 20 years in the future.	Comment noted.
				The commenter is concerned with impacts to traffic caused by breaking up projects over years, rather than building the ultimate configuration initially. "Don't piecemeal the projects so that you disrupt traffic repeatedly." See Gary McWilliams comment form in Attachment D, page D-14 of the Documentation of Open House.	Comment noted. Projects are often let to construction as funding is identified or becomes available.

24	James C. Payne Jr.	1/17/2017	Comment Form	Loop around Boerne!	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
				Seems like little planning before more building.	Comment noted.
25	Steve Rapp	1/17/2017	Transcript of Verbal Comment	The commenter is concerned with safety issues on SH 46 due to cars passing in no passing zones. "So many cars pass me in no passing zones in the morning...I don't know if...they're...trying to widen some of these areas where people tend to do that...But something needs to help 46 to be safer and people not passing four and five cars at a time." See Steve Rapp verbal comment in Attachment D, page D-33 of the Documentation of Open House.	Comment regarding area of safety concern noted.

26	Edward L. Rogers	1/23/2017	Comment Form	Needs to be a four-way stop on both the northbound access road and southbound access roads at IH 10 and Johns Road on the north side of Boerne.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
27	Carol Swartz	1/17/2017	Transcript of Verbal Comment	I would just suggest the possibility of looking into public transportation, starting it now instead of waiting until we need it.	Support of mass transit options noted.
28	Lloyd M. Swartz	1/17/2017	Comment Form	The commenter is concerned with the impact of FM 3351 (Ralph Fair Rd) traffic on wildlife, particularly deer. "Residents along 3351 including Silver Hills subdivision are working to preserve green space and encourage wildlife especially deer...Need to find way to reduce traffic on 3351!" See Lloyd Swartz comment form in Attachment D, page D-18 of the Documentation of Open House.	Comment noted. An Environmental Constraints Analysis Technical Report will be completed to analyze and address environmental resources throughout all stages of project development.

				The commenter is concerned with the amount of time it takes to travel on I-10 to Silver Hills. "On way home from work traffic only moving 40 mph from I10 to Silver Hills and you could not see anything but a solid line of cars." See Lloyd Swartz comment form in Attachment D, page D-18 of Documentation of the Open House.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
29	Lloyd Swartz	1/17/2017	Transcript of Verbal Comment	The commenter is concerned with turning FM 3351 (Ralph Fair Rd) into a highway due to preservation of nature, a large deer population in the area, and many driveways. "...this is not exactly compatible with the people that live along there, because most of them are staunch lovers of nature, and our biggest problem is that you're driving down 3351, and you may have to wait for a herd of 20 deer or more to cross the road...there are a lot of driveways that come out, and you're talking about turning it into a highway". See Lloyd Swartz verbal comment in Attachment D, pages D-29 thru D-32 of the Documentation of Open House.	Comment noted. An Environmental Constraints Analysis Technical Report will be completed to analyze and address environmental resources throughout all stages of project development.

				<p>The commenter is concerned with the amount of time required and safety of exiting the Silver Hills subdivision.</p> <p>"Right now coming out of Silver Hills it can take a half hour to get out of there because of the traffic, and you have zero visibility for all practical purposes in either direction because usually the cars are going faster than the speed limit, and you can't see them coming in either direction." See Lloyd Swartz verbal comment in Attachment D, pages D-29 thru D-32 of the Documentation of Open House.</p>	<p>Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.</p>
				<p>The commenter is concerned with the visibility of FM 3351 (Ralph Fair Rd) when traveling from Bergheim to Silver Hills subdivision. "it is a very windy road going up the hillside...And the visibility is unacceptable at Silver Hills now. What's it going to be, or are we talking about putting more lights in?" See Lloyd Swartz verbal comment in Attachment D, pages D-29 thru D-32 of the Documentation of Open House.</p>	<p>Comment regarding area of safety concern noted.</p>

				The commenter is concerned with the backlog for FM 3351 (Ralph Fair Rd) travelers at the FM 3351 (Ralph Fair Rd) and I-10 intersection. "...the cars coming off there are so heavy that I need to go up 3351, but the cars are backed up at the ramp trying to...go north along I-10, so the end result is I have to wait for all of these other cars to even get on 3351..." See Lloyd Swartz verbal comment in Attachment D, pages D-29 thru D-32 of the Documentation of Open House.	Comment noted. The Kendall Gateway Study traffic analysis will objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.
30	Kevin Thompson	1/17/2017	Email	I register my support for a comprehensive study of our present and future traffic flows that will lead to actionable recommendations from the engineers involved.	Support for comprehensive study noted.
				Along with water, mobility should be at the top of our priority list.	Comment noted.

31	David Thornally	1/17/2017	Transcript of Verbal Comment	Need to improve the low water crossing at Old Fredericksburg Road, which is just north of Dietz Elkhorn, because as I-10 construction continues in and around Fair Oaks and Boerne, that route into Boerne will become heavily traveled, and the low water crossing needs a bridge there where every time it rains you [can] get through.	Drainage is an important consideration for any transportation-related project. Drainage considerations will be featured as a key discussion item and study component for the Kendall Gateway Study.
32	John T. Wall, P.E.	2/1/2017	Comment Form	The commenter is concerned with the amount of time TxDOT projects take to complete and feels they are undermanned. "I do not understand why TxDOT projects take some long to complete...There should be some contractual way to force the contractors to man the job and work on multiple areas at one time..." See John T. Wall comment form in Attachment D, pages D-19 thru D-20 of the Documentation of Open House.	Comment noted.
33	Carol Bass Westermeier	1/17/2017	Comment Form	The design of the meeting made it easy to give input and facilitated moving along the stations. Suggestions and concerns were encouraged.	Thank you for your comment.

Open House Notice Kendall Gateway Study

Texas Department of Transportation (TxDOT), in partnership with Kendall County and the City of Boerne, will conduct an Open House to discuss the Kendall Gateway Study, a feasibility study that has been undertaken to identify potential alternatives to relieve traffic congestion in Kendall County and Boerne. The Open House will be held on Tuesday, January 17, 2017 at the Boerne Middle School South cafeteria located at 10 Cascade Caverns, Boerne, TX 78015. The Open House will be held from 6:00 p.m. to 8:00 p.m. and no formal presentation will be given. Study Team members, as well as staff from TxDOT, Kendall County, and the City of Boerne, will be on hand to discuss the feasibility study and answer questions.

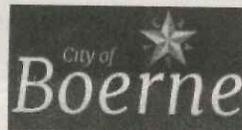

The purpose of the Open House is to introduce the feasibility study to the public and gather public input regarding the transportation-related vision and goals to relieve congestion on SH 46 and other major arterials in Boerne and Kendall County. Maps showing the study area will be available for viewing at the Open House.

All interested citizens are invited to attend this Open House. Written comments from the public regarding this feasibility study are requested and may be presented for a period of 15 calendar days following the meeting. Written comments may be submitted in person, by mail, or email to TxDOT San Antonio District, Richard De La Cruz, P.E., San Antonio TxDOT Project Manager, 4615 NW Loop 410, San Antonio, TX 78229-5126 or kendallgatewaystudy@pozcam.com. Written comments must be postmarked by February 1, 2017 to be included in the official open house record.

The Open House will be conducted in English. Persons interested in attending the meeting who have special communication or accommodation needs, or need an interpreter, are encouraged to contact Elena Camarillo at (210) 349-3273. Requests should be made at least five days prior to the Open House. Every reasonable effort will be made to accommodate these needs.

If you have any general questions or concerns regarding the study or the Open House, please contact Richard De La Cruz, P.E. at (210) 615-6434 or Richard.DeLaCruz@txdot.gov.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

Notificación de Junta Abierta al Público Kendall Gateway Study

El Departamento de Transporte de Texas (TxDOT) en conjunto con el Condado de Kendall y la Ciudad de Boerne, conducirá una Junta Abierta al Público para discutir el Kendall Gateway Study, un estudio de factibilidad que se ha emprendido para estudiar alternativas potenciales para aliviar la congestión del tráfico en el Condado de Kendall y la Ciudad de Boerne, Texas. La Junta Abierta al Público se llevara a cabo el Martes 17 de Enero del 2017 en la cafetería de la escuela Boerne Middle School South localizada en el 10 Cascade Cavern, Boerne, Texas 78015. La junta se llevara a cabo de las 6:00 p.m. a las 8:00 p.m. y no habrá presentación formal. Miembros del Equipo del Estudio, así como los representantes de TxDOT, el Condado de Kendall, y la Ciudad de Boerne estarán disponibles para discutir el estudio y contestar sus preguntas.

El propósito de esta junta es para presentar el estudio de factibilidad al público y recibir comentarios con respecto a la visión y metas relacionadas al transporte para aliviar la congestión del tráfico en la carretera SH 46 y otras arterias principales en Boerne y el Condado de Kendall. Mapas indicando la localización del estudio estarán disponibles para su observación en la Junta Abierta al Público.

Todo ciudadano con interés esta cordialmente invitado a la Junta Abierta al Público. Se solicitan comentarios por escrito del público sobre este estudio y pueden ser remitidos durante un periodo de 15 días después de la reunión. Comentarios por escrito pueden ser remitidos en persona, por correo, o por correo electrónico a TxDOT San Antonio District, Richard de la Cruz, P.E., Gerente de Proyecto, 4615 NW Loop 410, San Antonio, TX 78229-5126 o a kendallgatewaystudy@pozcam.com. Sus comentarios deberán ser recibidos en o antes del día 1 de Febrero del 2017 y con sello postal del mismo día para ser incluidos en el registro oficial de la Junta Abierta al Público.

La Junta será conducida en Ingles. Personas interesadas en atender la audiencia que tienen necesidades de comunicación o de alojamientos especiales, o necesitan un intérprete, se les solicita que se pongan en contacto con Elena Camarillo al tel. (210) 615-6434. Las solicitudes deben hacerse al menos cinco días antes de la Junta. Todo esfuerzo razonable se hará para satisfacer sus necesidades.

Si usted tiene preguntas generales o preocupaciones sobre este estudio o sobre la Junta Abierta al Público, por favor comunicarse con Richard De La Cruz al tel. (210) 615-6434 y Richard.DeLaCruz@txdot.gov.

La revisión ambiental, consultas y otras acciones requeridas por las leyes ambientales federales aplicables para este proyecto están siendo o se han llevado a cabo por TxDOT – "pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT."

Open House - Kendall Gateway Study

[Home](#) > [Inside TxDOT](#) > [Get Involved](#) > [Hearings & Meetings](#) > [Schedule](#)

Where:	Boerne Middle School South 10 Cascade Caverns Boerne, TX 78015 (Map)	When:	Tuesday, Jan. 17, 2017 6 p.m. - 8 p.m.
Purpose:	The purpose of the open house is to introduce the feasibility study to the public and gather public input regarding the transportation-related vision and goals to relieve congestion on SH 46 and other major arterials in Boerne and Kendall County.		
Description:	<p>TxDOT, in partnership with Kendall County and the City of Boerne, will conduct an open house to discuss the Kendall Gateway Study, a feasibility study that has been undertaken to identify potential alternatives to relieve traffic congestion in Kendall County and Boerne.</p> <p>The open house will be conducted in English. Persons interested in attending the meeting who have special communication or accommodation needs, or need an interpreter, please contact (210) 349-3273. Requests should be made at least five days prior to the open house. Every reasonable effort will be made to accommodate these needs.</p> <p>The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.</p>

Kendall Gateway Study Open House

Share:

Name: Kendall Gateway Study Open House

[To Current Calendar](#)

Date: January 17, 2017

Location:
Boerne Middle School South Cafeteria
10 Cascade Caverns Road, Boerne, TX 78015

Time: 6:00 PM – 8:00 PM CST

Date/Time Information:
Tuesday, January 17, 2017
6 to 8 p.m.

Event Description:
Texas Department of Transportation (TxDOT), in partnership with Kendall County and the City of Boerne, will conduct an Open House to discuss the Kendall Gateway Study, a feasibility study that has been undertaken to identify potential alternatives to relieve traffic congestion in Kendall County and Boerne. The Open House will be held on Tuesday, January 17, 2017 at the Boerne Middle School South cafeteria located at 10 Cascade Caverns, Boerne, TX 78015. The Open House will be held from 6:00 p.m. to 8:00 p.m. and no formal presentation will be given. Study Team members, as well as staff from TxDOT, Kendall County, and the City of Boerne, will be on hand to discuss the feasibility study and answer questions.

Contact Information:
Richard De La Cruz
[Send an Email](#)

Fees/Admission:
Free to the public

The purpose of the Open House is to introduce the feasibility study to the public and gather public input regarding the transportation-related vision and goals to relieve congestion on SH 46 and other major arterials in Boerne and Kendall County. Maps showing the study area will be available for viewing at the Open House.

Set a Reminder:

Enter your email address below to receive a reminder message.

All interested citizens are invited to attend this Open House. Written comments from the public regarding this feasibility study are requested and may be presented for a period of 15 calendar days following the meeting. Written comments may be submitted in person, by mail, or [email](#) to TxDOT San Antonio District, Richard De La Cruz, P.E., San Antonio TxDOT Project Manager, 4615 NW Loop 410, San Antonio, TX 78229-5126. Written comments must be postmarked by February 1, 2017 to be included in the official open house record.

[To Current Calendar](#)

The Open House will be conducted in English. Persons interested in attending the meeting who have special communication or accommodation needs, or need an interpreter, are encouraged to contact Elena Camarillo at (210) 349-3273. Requests should be made at least five days prior to the Open House. Every reasonable effort will be made to accommodate these needs.

If you have any general questions or concerns regarding the study or the Open House, please contact [Richard De La Cruz, P.E.](#) at (210) 615-6434. The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

TxDOT is introducing a new plan to ease congestion in Boerne.

Laura Lopez talked to us about the Kendall gateway Study.

She says it's a feasibility study to look for alternatives to relieve congestion in Boerne and Kendall County.

At the Boerne Middle School South Cafeteria tonight, TxDOT will give you the chance to see the plan and give you an opportunity to offer your input.

The open house is from 6 until 8 tonight.

COMMENTS:

we need to have all the development people help to pay for the road development.

When they build - they tear up the roads - yet just repair what they tear up. They need to improve the road.

are just real estate agents in charge of Boerne

COMMENTS:

I am Jim Cannizzo, an attorney representing the Army at Camp Stanley and Camp Bullis. Our main input on priorities would be I-10 in northern Bexar County. I-10 is rapidly becoming congested to the point that peak traffic times have lengthy delays. This backlog impacts our worker commute hours and sometimes military duty traffic. Expediting adding the 4 lanes to I-10 and finishing the frontage road work is #1 for us. #2 would be adding two lanes to FM 3351 (Ralph Fair Rd)

COMMENTS: I live off east Hwy 46 and see
A big increase of traffic due to developments.
I've been told by some that Hwy 46 will
eventually become the outer loop to
San Antonio to allow traffic from I-35
to I-10 west. If you are strongly considering
this approach, you should start widening Hwy 46
now, rather than later, while you still have
less development because it (the traffic) is growing.
Also, include a bypass to the city of Boerne.

COMMENTS: Thank you for the forum to voice our concerns.
It would be great for 46 to be a 4 lane highway
between Boerne + Bulverde. Also the flooding at
Herff Rd. + 46 should be addressed. A direct rd.
connecting 474 + 3351 would be most helpful.

COMMENTS: we moved to Boerne/Kendall Co. 35 years ago.

Population 2000+/~~1000~~ lots of changes some good, some not so good. It appears that over the years growth + the revenue it brings has taken precedence over planning for traffic control and quality of life. Bigger is not always better.

OF course it would be nice to keep Boerne, small, quaint and quiet, but that is not the case.

Rapid growth has impacted safety, flooding, green space, traffic congestion. A well thought out through plan would be much appreciated

COMMENTS:

We reside on Ammann Rd. We are very concerned about rumors that Ammann Rd would go through another subdivision (Dana Green's subdivision) to be able to access onto 46. We do not want to go into any subdivision to get to 46. We are happy the way it is. Just need a light.

COMMENTS:

While at the open house I saw an idea I had not thought of & thought it was a good option. Mass transit / train, etc. If the station to such a place was located in an area that was of the least amount of traffic it would relieve congested areas. Those choosing to use mass transit would no longer be part of the traffic causing the most congestion.

COMMENTS:

① Boerne Residents need a second way to access 1604.
② Any improvements to Hwy 46 or I10 should include wildlife crossings and attention to trees and native wildlife and plants. avoid Cascade Caverns.
③ large Roads should outline new subdivisions so they don't ~~slow~~ ^{slow} speed of traffic and still give residents a new route to the highway.

COMMENTS: Needs to be a four-way stop on both the northbound access road and southbound access roads at IH and Johns Road on the north side of Boerne. The increasing traffic there, due in part to a new elementary school down the street, has exacerbated the problem. Aggressive driving in both directions on John's Road over a two lane bridge & its east-west approaches has become very hazardous. Thank you

COMMENTS:

Residents along 3351 including Silver Hills subdivision are working to preserve green space and encourage wild life especially deer. Almost every week there is a dead deer hit by a vehicle. Too much traffic. Need to find way to reduce traffic on 3351. Took us a long time to get out of Silver Hills at 5:30 pm. On way home from work traffic only moving 40 mph from I10 to Silver Hills and you could not see anything but a solid line of cars

COMMENTS: I AM AN ENGINEER & HAVE BEEN INVOLVED IN CONSTRUCTION
IN SAN ANTONIO FOR OVER 45 YRS. MY WORK HAS BEEN MOSTLY COMM-
ERCIAL, INSTITUTIONAL, & OFFICE BLDGS, BUT I HAVE DONE SEVERAL
BRIDGES FOR THE CSA, TXDOT & OTHERS. WITH THIS EXPERIENCE I
DO NOT UNDERSTAND WHY TXDOT PROJECTS TAKE SO LONG TO
COMPLETE. MANY OF THE PROJECTS I WAS INVOLVED WITH WERE
VERY LARGE. (20-30 MILL WITH A COUPLE OVER 100 MILL)

WHAT I WOULD LIKE IS THAT TXDOT PROJECTS ARE SAFELY (BADLY) UNDER-
MANAGED. ANY PROJECT HAS A FINITE NUMBER OF MAN HOURS TO
(OVER)

Complete. I see very small crews on TxDot jobs. There should be some contractual way to force the Contractors to man the job and work on multiple Areas at one time instead of a little here a little there. They should be pouring concrete or laying Asphalt everyday. It has been painful to watch the project from Dominion to Boerne Stage Rd. Projected completion was June of 2016 - they will be lucky to complete by June 2017. The Contractor has continually worked in one Area for a few days & then disappear to another Area with the first incomplete. Paving is another issue. I noticed today they are laying out the Third Exit Ramp to Ralph Fair REALLY - A Third Ramp.

Tuesday, January 17, 2017

6:00 p.m. to 8:00 p.m.

10 Cascade Cavern, Boerne, TX 78015

COMMENT FORM

Thank you for attending tonight's Open House. Please use the space below to submit written comments, attach additional pages if necessary. Please drop the completed form in the comment box or give to one of the project representatives at the meeting tonight. You may also fax to (210) 349-4395, email to kendallgateway@pozcam.com, or mail to the address provided below. All written comments must be postmarked by Wednesday, February 1, 2017 to be included in the official open house record. Thank you for your comments.

(PLEASE PRINT)

COMMENTS:

The design of the meeting made it easy to give input and facilitated moving along the stations. Suggestions and concerns were encouraged.

I am concerned about the overall effects on land and people and this needs to continue to be open process with opportunity for input. A major concern is drainage to be considered in the overall plan.

COMMENTS:

A good start getting the Community involved. Increased traffic is inevitable. It's how well we handle it that matters. Building a rural loop TX46 around Boerne would help greatly with "thru" traffic. Cleaning up (modernizing) difficult intersections such as N. Main St./ Sisterdale Rd/ Adler St. would help internal city traffic. Conduct a comprehensive County/City drainage study - then live by it - to eliminate future road and housing flooding. County areas will develop, so let's plan for it. Repair/modernize existing City + County roads to improve "locals" traffic flow.

TEXAS DEPARTMENT OF TRANSPORTATION
PUBLIC MEETING
KENDALL GATEWAY STUDY

Boerne Middle School South
10 Cascade Caverns Road
Boerne, Texas 78015

JANUARY 17, 2017
6:00 P.M. - 8:00 P.M.

1 THEODORA KAUFMANN: We live on Ammann Road,
2 and there is rumors that they're trying to get Ammann Road
3 to go into another subdivision and come out Dana Green
4 subdivision, and we don't want that. We want to stay where
5 we can actually access 46 directly. It's a big factor for
6 us to be able to stay. We just need a light. We don't have
7 a light, so it is kind of dangerous right now with the
8 traffic.

9 And possibly what we feel would be good, if
10 constructed, is to move the speed limit back -- further back
11 on 46 so people can start entering there at 45 instead of
12 55. I think that would be great, and then have a light
13 there for us. But we do not want to have to go through
14 another subdivision and come out. So that's just basically
15 my thoughts.

16 EUGENE A. GIBBS, JR.: My name is Eugene A.
17 Gibbs, Jr. I live at 145 Ranch Drive in Boerne, Texas.
18 It's just outside of the city limits. It is in the county.
19 I'd like to comment on the area of Scenic Loop Drive and
20 I-10. There is construction going on there now. It will
21 widen the underpass there to four lanes. In my opinion,
22 that is just a patch. It is way under-engineered for the
23 traffic.

24 We are sitting at a middle school some several
25 hundred yards from that intersection. If you've been

1 through that intersection between 4:00 -- 3:30 -- actually
2 starting at 3:00 -- from 3:00, 3:30, 4:00, 5:00, until
3 almost 6:00, you are going to wait through two or three
4 lights -- long lights, traffic backed up all four ways. I
5 mean on the -- on the frontage roads and the Scenic Loop --
6 just all four ways you're blocked. And, again, my opinion
7 is that the four-lane underpass that you're under
8 construction right now from two to four is not nearly
9 enough. We're talking about the area that's being affected
10 down Old San Antonio Road, all the way on the frontage road,
11 down toward town and Scenic Loop Drive both ways, Cascade
12 Caverns both ways. The area is a mess.

13 We have a subdivision going in at the corner
14 of Cascade Caverns and Ranch Drive that they're going to
15 build a hundred houses within at least a year or about a
16 year, and it will go to 250 to 300 houses in there. And
17 when they finish the development, that's just going to be
18 unbelievable traffic on Cascade Caverns to get to the
19 intersection that I'm talking about.

20 I think what TxDOT is doing is wonderful.
21 It's great, but it's not enough. It is not going to handle
22 the traffic. It's going to be ass to hand.

23 LLOYD SWARTZ: I'm Lloyd Swartz. I live in
24 the Silver Hills subdivision on 3351. And the reason I'm
25 here tonight is because at an earlier meeting there was all

1 sorts of talk about, oh, it will solve the whole problem by
2 making 3351 into a highway. Well, this is not exactly
3 compatible with the people that live along there, because
4 most of them are staunch lovers of nature, and in -- our
5 biggest problem is that you're driving down 3351, and you
6 may have to wait for a herd of 20 deer or more to cross the
7 road. Typically that -- I don't think there is a week that
8 goes by that I don't see a dead deer that some car hit on
9 3351.

10 In the Silver Hills subdivision, they're
11 trying to make the parks sanctuaries for birds and different
12 other things, so you're going into an area where there are a
13 lot of homes that flood out onto this farm road, which is
14 not unusual for a farm road, so there are a lot of driveways
15 that come out, and you're talking about turning it into a
16 highway.

17 Right now coming out of Silver Hills it can
18 take a half hour to get out of there because of the traffic,
19 and you have zero visibility for all practical purposes in
20 either direction because usually the cars are going faster
21 than the speed limit, and you can't see them coming in
22 either direction. So if you're lucky, you get out and don't
23 get hit. It's a very dangerous situation.

24 From an engineering standpoint if you look at
25 going from Bergheim down to Silver Hills, which was at one

1 time a one-way road not that long ago, it is a very windy
2 road going up the hillside. Without taking chunks of
3 people's property and homes and things, I don't know how you
4 can straighten that out. And the visibility is unacceptable
5 at Silver Hills now. What's it going to be, or are we
6 talking about putting more lights in? Well, I know Fair
7 Oaks is putting in another subdivision and others are
8 building out from Fair Oaks going north on 3351, so I
9 suspect there are going to be even more lights. If that
10 becomes a 40 mile an hour road, it's going to take an awful
11 long time to get down to I-10.

12 Right now down at I-10 it is such a mess. It
13 cannot handle the traffic that's there, and no work has
14 begun yet in that area to really fix it. They work that
15 they did in there -- all it did is it helps the people at
16 3351 and I-10 that live along I-10, and the cars coming off
17 there are so heavy that I need to go up 3351, but the cars
18 are backed up at the ramp trying to get -- go north along
19 I-10, so the end result is I have to wait for all of these
20 other cars to even get on 3351, and this is with the
21 improvements that were just opened less than a year ago. So
22 there are major traffic problems down at the other end. I
23 know that may not concern Boerne, but we live out there. So
24 this is a concern.

25 I am going to bring up what's going on here at

1 our property owner's association meeting on Thursday so that
2 all the residents are aware of what's going on.

3 We do have a traffic problem out there. We
4 probably -- the three-lane road, as long as there's no more
5 cars, would help. The problem is if you already have a
6 solid line of cars coming up and you can't get out of your
7 home or your subdivision, any more cars is just going to
8 make it even more impossible now. So are you going to put a
9 light in everybody's -- every hundred feet down the road?
10 This is a rural road, and I strongly believe it was properly
11 designated as a farm road, and it needs to stay that way and
12 not become a major artery. I think there is going to be
13 more problems than people can deal with. So I think that's
14 the wrong idea.

15 I know there were also talks of coming down
16 Ammann Road. There was everything from cutting across and
17 putting a light at Silver Hills. There was another one of
18 bringing Ammann Road down below. A lot of different things
19 I heard. None of these make any sense to people that live
20 out there and can't get around now because they aren't going
21 to help. A three-lane road would be minor help for the
22 residents that are there now, but any additional traffic
23 would defeat the whole purpose. I think it needs to be --
24 remain a farm road.

25 CAROL SWARTZ: I would just suggest the

1 possibility of looking into public transportation, starting
2 it now instead of waiting until we need it.

3 DAVID THORNALLY: Need to improve the low
4 water crossing at Old Fredericksburg Road, which is just
5 north of Dietz Elkhorn; because as I-10 construction
6 continues in and around Fair Oaks and Boerne, that -- that
7 route into Boerne will become heavily traveled, and the low
8 water crossing needs a bridge there where every time it
9 rains you can't get through. It's going to become a
10 thoroughfare whether they like it or not. That's it.

11 STEVE RAPP: My situation is I've got two
12 options. One is to come 46, which during school pretty much
13 has to happen, because I can't get -- 1604 to 10 is my
14 fastest way; but in school times, that's too congested, so I
15 have to come 46 through Bulverde.

16 So many cars pass me in no passing zones in
17 the morning. I know eventually I'm going to see a head-on
18 wreck. You see school kids; you see mothers with kids in
19 car seats just zooming by you, passing through you four cars
20 at a time. At minimum I don't know if that is what they're
21 doing now is trying to widen some of these areas where
22 people tend to do that, because there is construction
23 barriers there now. But something needs to help 46 to be
24 safer and people not passing four and five cars at a time.

Subject: Kendall Gateway Study - TPCC Final Report of May, 2007

Richard,

Thanks for your note in the mail about the new Kendall Gateway Study Meeting. I plan to attend.

For your information, I am providing a copy of the Final "Thoroughfare Planning Citizens Committee Report" for Kendall County of which I was a principle architect. I think you will find it interesting and comprehensive. The intent was to have it adopted by Kendall County Commissioners Court as a Thoroughfare Plan but that never happened.

Please let me know if you have any questions.

Sincerely,
Dan

Richard –

We were unable to attend the open house last evening but are interested in the effect on a lot we are going to build on in Boerne. Are the maps and text of the study posted on either the city/county or txdot websites?

Thank you,

George Blatt

Kendall Gateway Study Comments

Jonna Clark [REDACTED]

Wed 2/1/2017 1:41 PM

To: KendallGateway Study <KendallGateway@pozcam.com>;
[REDACTED]

Dear Mr. De La Cruz,

I very much appreciate the opportunity to comment on thoughts about Kendall Country & Boerne growth as it relates to roads & transportation. It is critical that MOBILITY be a priority. But mobility also means keeping traffic moving. There are currently several "road blocks" to that concept that changing these would make an immediate impact.

I have divided my comments up into GENERAL & SPECIFIC requests for Boerne area roads & signals.

General Comments:

1. INSTALL SMART TRAFFIC LIGHTS so that traffic doesn't sit at a red light for nobody.
2. On ALL lights with a protected left turn signal, make these left turn lights allow for left turn on yield. It's so frustrating to either sit a red left turn signal when no one is coming and I could safely turn, or to be stopped in order for someone to turn left when there was ample and safe opportunity for that person to turn left.
3. Coordinate construction zones, specifically speed limits. There are currently 3-4 construction zones on I-10 between Hwy 46 and Boerne Stage Rd. The speed zones are horribly confusing and conflicting, and potentially dangerous. There is one place where there is a 70 mph sign coming out of a 56, but I can see the 65 mph sign less than ¼ mile ahead for the next construction zone.

Specific requests/comments:

1. Convert the left turn signal on Hwy 46 westbound at Herff Ranch Blvd to allow for left turn on yield.
Comment: It's practical to have a protected left when the 46 E & W bound light turns red to allow for Herff Ranch traffic to turn out onto 46. But as a resident who lives slightly east of the Boerne city limits, and travels through it daily, I can't tell you how many times I've been stopped to allow a single vehicle to turn into Herff Ranch when there was AMPLE opportunity either in front or behind me for the vehicle to turn safely.
(Note that this light is a "smart" light, in that it monitors Hwy 46 traffic & as much as possible, only turns red for Herff Ranch Blvd. traffic when that traffic has been waiting for a period of time and there is a break in Hwy. 46 traffic. This is VERY MUCH APPRECIATED!)
2. Convert the left turn signals on Hwy 46 East & Westbound at Charger Blvd/Woods of Boerne Blvd to allow for left turn on yield.
Comment: It's practical to have a protected left when the 46 E & W bound light turns red to allow for Charger Blvd &/or Woods of Boerne traffic to turn out onto 46. But as a resident who lives slightly east of the Boerne city limits, and travels through it daily, I can't tell you how many times I've been stopped to allow a single vehicle to turn left in either direction when there was AMPLE opportunity either in front or behind me for the vehicle to turn safely.
(Note that this light is a "smart" light, in that it monitors Hwy 46 traffic & as much as possible, only turns red for Charger Blvd/Woods of B traffic when that traffic has been waiting for a period of time and there is a break in

Hwy. 46 traffic. This is VERY MUCH APPRECIATED!)

3. Make the signals at Hwy 46 & Herff Ranch Blvd and Hwy 46 & Charger Blvd/Woods of Boerne Blvd. FLASHING after a designated hour – such as 10 pm. Flashing YELLOW for 46 traffic, RED for the cross traffic.
4. Make the signal at Herff Rd. & Oak Park Dr. FLASHING after a designated hour – such as 10 pm. YELLOW for Herff Rd. traffic, RED for Oak Park traffic.
5. Install/create a RIGHT TURN LANE from South Main (northbound) onto Herff Rd (the extension). Why on earth was this not planned originally?
6. Old San Antonio Rd. & Herff:
 - a) Install/create a RIGHT TURN LANE from Old San Antonio (northbound) onto Herff Rd (Why on earth was this not planned originally?).
 - b) Make this light a SMART light!!! The Herff Rd. signal has a protected/left turn yield signal. It does not need to turn immediately upon approach by left turn traffic (as it does). Example: I witnessed this happen in the middle of the day when there was ample opportunity for the left turning traffic to clear before the approaching traffic. Which in fact, all 4 left turning cars turned before the approaching traffic reached the intersection, forcing them to stop “for nothing” since the left turning cars had already turned.
 - c) FLASHING red for all directions of travel after a designated hour – such as 10 pm. Example: I was traveling eastbound on Herff one night about 11 pm. A vehicle traveling westbound approached the left turn lane to Old San Antonio southbound. I was stopped because the light turned red, even though the other vehicle had already cleared the left turn in front of me SAFELY.

Again, thank you for the opportunity to comment.

Jonna Clark

Date: Mon, Jan 2, 2017 at 10:11 AM
Subject: Hwy 46 Congestion
To: kendallgatewaystudy@pozcam.com, richard.elkins@co.kendall.tx.us

Mr. De La Cruz,

Thank you for your ongoing efforts. I live/work in the Hwy 46/FM 3351 intersection area. I'm amazed at the number of people from the San Antonio area who venture out this way and still think that traveling through Boerne is the only route. In addition, I've spoken with many who live east of Boerne who would be open to a alternative route (FM 3351 and Ammann Road) vs. having to drive through Boerne and congested areas related to schools and increased congestion from Esperanza and other developments. An extension of Bentwood over to Esperanza will be important to mitigate traffic on Hwy 46 as well.

In addition, improvements to Ammann Road (Comal County participation would ultimately be necessary east of FM3351) could alleviate traffic on Hwy 46 as the only other east/west arterial north of Cibolo Creek. If possible, Ammann Road re-routed to extend west along the north side of Fair Oaks Ranch from where it currently makes a 90 degree turn to the north, and continuing west to an approximate intersection at Boerne Stage Rd and IH10 (intersection currently under construction) would make for a nice alternative.

I'd like to understand what the plans are for improving FM 3351 Road and possibilities for improving Ammann Road. If 3351 is improved (widened; additional lane(s) added; intersection at IH10 improved to handle more cars expeditiously), many would use that alternative to reach areas east Boerne. Widening Ammann and eliminating the rises and dips in that road, and the re-routing as described above, would seem to provide increased traffic there as well and alleviate congestion on Hwy 46.

Respectfully,

Barry Denton

Subject: Kendall Gateway Study

The TxDOT “ Kendall Gateway Study “ open house on Tuesday , January 17, 2017 was well attended . Many of the attendees , however , were expecting to see some sort of preliminary recommendations

suggesting alignment proposals addressing future traffic demands . That left the public with little to comment on except for vague or generality type comments about future needs .

On November 28, 2005 the Kendall County Commissioners Court created a Thoroughfare Planning Citizens Committee to identify future mobility needs within Kendall County . The planning committee undertook a very detailed look at anticipated future growth , conducted traffic counts , considered environmental issues and engaged professional assistance ,where necessary ,to determine what future traffic facilities would be required to meet future anticipated traffic volumes . The final report was presented to the Commissioners Court on February 27, 2006 . The intent of the report was to identify future transportation corridors in the Thoroughfare Plan to meet the future mobility needs of Kendall County and the City of Boerne and to adopt the Planning Committees recommendations to protect the identified corridors . These identified mobility corridors would then be incorporated into future developments such that when the various developments were completed there would be facilities in place

to meet the needs of the traveling public . There was no action taken by the Commissioners Court at that time to adopt The Thoroughfare Plan to protect future transportation corridors . Big mistake .

Now here we are a little over a decade latter facing real traffic congestion problems with most of the previously identified transportation corridors blocked by developments . It's going to be extremely difficult , controversial and expensive to find realistically acceptable routes to fulfill future traffic demands , both north and south of Boerne . Been there – done that .

S.H. 46 to the east is really building up and is getting to be a real problem , particulary before and after school hours . Due to the subdivision's in that area there needs to be five lanes out to past Ammann Road . From Boerne to New Braunfels S.H. 46 needs to be widened to four lanes with center turn lanes in some places . With no funds for that , then and intermittent three lane section should be provided to allow for passing at certain spacing intervals . I think that is already in you plans .

On S.H. 46 west of Boerne there needs to be provisions for a right and left turn lane at the road to the Deep Hollow and Tapatio Springs subdivision's . The section of S.H. 46 from Boerne west to S.H. 16 has some very bad horizontal alignments in places that need corrections for safety . I know it needs to be done for safety but the right of way and construction cost probably makes it not cost effective .

Due to recent industrial growth and Love's Truck stop in Comfort , Texas the interchange and frontage roads at I.H. 10 and U.S. 87 need to be reconfigured for safety as soon as possible .

I think County funds and local funds are available to help move this much needed project forward .

The proposed I.H. 10 project between S.H. 46 and the current Scenic Loop project needs to be let as soon as possible , consistent with funding restraints . Much of Boerne's future economy rest on this . I think there is a proposal to extend the new Herff Road across Main Street to the west and curve it north to intercept Christus Parkway . This would allow Herff Road traffic to access westbound I.H. 10 without going through Boerne . It might stave off , for a while , the need for a loop around the north side of Boerne since that route is going to be very difficult and expense to obtain . There are very few practical routes for that alignment due to topography and developments .

Thank you for allowing me to comment on important transportation issues critical to the future health and wellbeing of Kendall County and the City of Boerne .

Subject: Kendall Gateway Study

Today in the Kendall County Commissioner's Court they approved an 1,100 +/- acre subdivision along S.H. 46 east of Boerne near Brandt Road .

These will be One acre lots with a 1.5 acre average density . There could be 700 to 900 new homes in this subdivision with commensurate future traffic volumes on S.H. 46 for this one way in and one way out gated subdivision . More reasons to do something to S.H. 46 sooner .

Please add these comments to those e-mailed to you yesterday .

Thanks ,
John Kight

I attended the "Gateway" study last night. I saw many charts with push pins and strings and many large maps of Kendall County. What I did not see is any future plans in place for the next five years of TEXDOT or county road improvements. This was a total waste of my time. I will not go again to any more of these useless "study" meetings which just waste the tax payers money.

Subject: RE: Open House Notice- Kendall Gateway Study

I regret to inform you that I will be unable to attend the open house tonight. I do register my support for a comprehensive study of our present and future traffic flows that will lead to actionable recommendations from the engineers involved. The time for action was yesterday and we simply can't afford to wait more months, years or decades before addressing our increasing congestion. Along with water, mobility should be at the top of our priority list.

Kendall Gateway Study Open House

Tuesday, January 17, 2017

**Boerne Middle School South
10 Cascade Caverns
Boerne, TX 78015**

6:00 p.m. to 8:00 p.m.

The purpose of the Open House is to introduce the feasibility study to the public and gather public input regarding the transportation-related vision and goals to relieve congestion on SH 46 and other major arterials in Boerne and Kendall County.

Visit txdot.gov, keyword "Kendall Gateway Study" for more information.

SEEKING A SOLUTION TO TRAFFIC CONGESTION IN KENDALL COUNTY AND BOERNE

Kendall County had a population of 23,743 in the year 2000. That number grew by about 70 percent, to an estimated 40,384, by 2015. It was recently recognized by the US Census Bureau as the 12th fastest growing county in the United States.ⁱ

The impact of the growing population has been dramatic. Boerne ISD expects an increase of about 2,000 students over the next five years, and three new schools are planned. Another 441 new homes are projected to be built this year in Boerne; Boerne ISD reports that number is expected to trend at an average of 438 new homes per year between 2017 and 2026.ⁱⁱ

Kendall County Judge Darrel Lux and City of Boerne Mayor Mike Schultz recognized the traffic challenges this kind of growth creates and submitted a joint resolution to TxDOT asking for help finding solutions.

TxDOT, partnering with Kendall County and the city of Boerne, responded to the resolution by launching a feasibility study in September 2016. The Kendall Gateway Study is expected to conclude in early 2018. The process includes continuous outreach through public meetings, working groups and open commenting periods to collect input from the public, from stakeholders and from agencies on the study area. Data showing where drivers currently move and where growth is projected will also be gathered during the study.

ⁱ "American FactFinder - Community Facts." Web. U.S. Census Bureau. Accessed December 2016.

ⁱⁱ "Demographic Summary, Fall 2015." Presentation. Boerne Independent School District. Prepared by Templeton Demographics.

"The feasibility study and recommendations will be data-driven. We'll use new data that will be collected by the consulting engineers during the study, data from the county's and the city's geographic information system departments, and most importantly, public input at meetings."

— Darrel Lux
Kendall County Judge

"Along with prosperity come mobility challenges. We need to use every tool we have available to identify potential solutions now rather than later. This study will give us the information we need to develop effective strategies and take appropriate actions that will move traffic while preserving the unique character of Boerne and Kendall County."

— Mike Schultz
Mayor of Boerne

Frequently Asked Questions

What is a feasibility study?

A feasibility study defines a problem, gathers data and recommends solutions that will best meet challenges. The process considers the benefits and costs of each solution, effectiveness of implementation, alternatives considered, environmental impacts, public opinions and input as well as other factors. Engineers and planners summarize these issues and analyze the reasons for selecting a preferred alternative in their implementation plan.

Who is heading the Kendall Gateway Study?

At the request of Kendall County and the city of Boerne, TxDOT is providing funding and oversight for the engineering consultant team conducting the study.

Why is this study being done?

Kendall County and the city of Boerne have experienced growth and an associated increase in traffic congestion. Through a joint resolution, both municipalities requested TxDOT's help identifying potential alternatives that could alleviate traffic congestion.

What is the study area?

The study area includes Kendall County and the city of Boerne.

Will the study result in a future project?

No future projects have currently been determined. The feasibility study will provide valuable information on the transportation needs and priorities in the area. The study and recommendations will be data-driven. No pre-selected routes or pre-defined areas direct the study. The goal is to identify potential alternatives to provide improved mobility as the area continues growing.

What kind of community outreach will be done?

The study includes up to three public meetings; a stakeholder working group made up of environmental, community and civic leaders; a technical work group made up of municipal and transportation professionals with a direct relationship to Kendall County and the city of Boerne; and presentations and information booths at local events.

How will traffic study information be used?

Traffic data is collected to help objectively analyze the amount of traffic and the typical traffic patterns on the busiest vehicular routes in the study area. Future projections will be combined with this data to help identify and prioritize congested areas, including offering potential alternatives to alleviate current traffic congestion and accommodate anticipated growth.

- Ask questions.

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

La revisión ambiental, consultas y otras acciones requeridas por las leyes ambientales federales aplicables para este proyecto están siendo o han sido, llevado a cabo por TxDOT - en virtud de 23 USC 327 y un Memorando de Entendimiento fechado el 16 de diciembre del 2014, y ejecutado por la FHWA y el TxDOT.

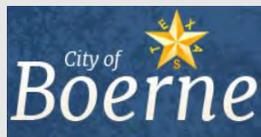

Next Steps

- Compile and consider input from this Open House.
- Develop, evaluate, and refine potential solutions.
- Conduct additional Technical and Stakeholder Working Group Meetings.
- Hold Open House #2.
- Decide how to advance project.

THANK YOU

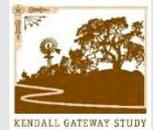

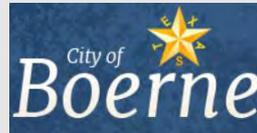

WE WANT YOUR FEEDBACK!

Commenting Options:

1. Fill out a comment card at the comment table.
2. Give verbal comments to the Court Reporter tonight.
3. Fax comments to (210) 349-4395.
4. Email comments to: KendallGateway@pozcam.com.
5. Mail comments to: Richard De La Cruz, P.E., Project Manager, Texas Department of Transportation, 4615 NW Loop 410, San Antonio, TX 78229.

Deadline for Comments: Wednesday, February 1, 2017

JOINT RESOLUTION

“The feasibility study and recommendations will be data-driven. We’ll use new data that will be collected by the consulting engineers during the study, data from the county’s and the city’s geographic information system departments, and most importantly, public input.”

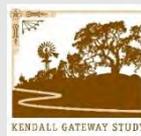

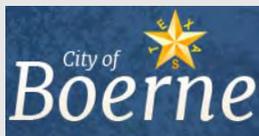

Darrel Lux
Kendall County Judge

“Along with prosperity come mobility challenges. We need to use every tool we have available to identify potential solutions now rather than later. This study will give us the information we need to develop effective strategies and take appropriate actions that will move traffic while preserving the unique character of Boerne and Kendall County.”

Mike Schultz
Mayor of Boerne

RESOLUTION NO. 09-28-2015-A

**A JOINT RESOLUTION
BETWEEN THE CITY OF BOERNE AND THE COUNTY OF KENDALL
REQUESTING THAT THE TEXAS DEPARTMENT OF TRANSPORTATION RESUME ITS
PLANNING FOR VIABLE TRANSPORTATION CORRIDORS**

WHEREAS, on May 21, 2015, the County of Kendall, the City of Boerne and the Texas Department of Transportation held a joint meeting to discuss roadway projects in the area; and
WHEREAS, during this Joint Meeting, the Parties determined that the conversation needs to start focusing on projects for the future; and
WHEREAS, the Parties determined that the region is experiencing great growth and the mobility issues are not going to improve unless discussions concerning long-term projects begin; and
WHEREAS, the Texas Department of Transportation began initial studies identifying potential routes to address the increasing traffic and associated congestion; and
WHEREAS, the County of Kendall and the City of Boerne desire, at this time, to partner with the Texas Department of Transportation to complete the studies previously begun.
NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF BOERNE AND THE COMMISSIONERS COURT OF KENDALL COUNTY agree to work in collaboration with the Texas Department of Transportation to resume efforts to plan for future growth and to determine potential future transportation corridors needed to accommodate the anticipated growth in the region.

APPROVED on this the 28th day of September 2015.

Darrel L. Lux
County Judge

Mike Fincke
Commissioner Precinct 1

Richard W. Elkins
Commissioner Precinct 2

Tommy Pfeiffer
Commissioner Precinct 3

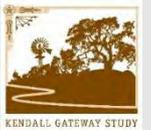

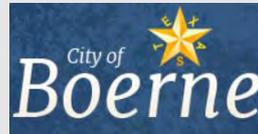

Royce Steubing
Commissioner Precinct 4

Attest:
Darlene Herrin, County Clerk

JOINT RESOLUTION:

“The City Council of the City of Boerne and the Commissioners Court of Kendall County agree to work in collaboration with the Texas Department of Transportation to resume efforts to plan for future growth and to determine potential future transportation corridors needed to accommodate the anticipated growth in the region.”

TECHNICAL WORK GROUP MEETING OCTOBER 20, 2016

Quotes from our Technical Work Group

Top 3 Goals

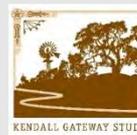

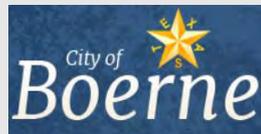

- “Long-term planning”
- “Alleviate congestion”
- “Define the need”

Top 3 Concerns

- “Funding”
- “Public perception”
- “Environmental impacts”

Technical Work Group Invitees:

- Alamo Area Council of Governments
- Alamo Area MPO
- City of Boerne
- City of Fair Oaks Ranch
- Comal County
- Kendall County
- Kendall County EDC
- Kendall West Utility, LP
- Matkin-Hoover Engineering & Surveying
- TxDOT

STAKEHOLDER WORKING GROUP MEETING DECEMBER 6, 2016

Quotes from our Stakeholder Working Group

Goals

- “Long-term and scalable”
- “Forecast future”
- “Long-term affordability”
- “Accessibility”
- “Ecological integrity”
- “Relieve traffic congestion”
- “Mutually beneficial”
- “Transparent communication”

Top 3 Concerns

- “Fostering growth”
- “Integrity of scope”
- “Natural resources and environment”
- “Develop sensibly”
- “Paralysis by analysis”
- “Not creative enough”
- “Reluctance to adapt to change”
- “Finding common ground”

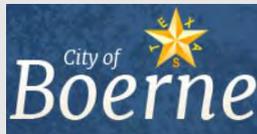

Stakeholder Working Group Invitees:

- Ammann Ranch Estates POA
- Boerne Area Historical Preservation Society
- Boerne Business Alliance
- Boerne Chamber of Commerce
- Boerne Convention & Visitors' Bureau
- Boerne Heights HOA
- Boerne ISD
- Boerne Rotary
- Boerne Stage Airfield
- Boerne Star
- Boerne Sunrise Rotary
- Cascade Caverns
- Centennial Bank
- Cibolo Conservancy
- Cibolo Nature Center
- City of Boerne
- Cordillera Ranch POA
- Cow Creek Groundwater Conservation District
- Edwards Aquifer Authority
- Estancia at Thunder Hill HOA
- Fair Oaks Ranch HOA
- Fair Oaks Ranch Rotary
- Geneva School of Boerne
- Greater Edwards Aquifer Alliance
- Kendall County Historical Commission
- Kronkosky Charitable Foundation
- Ranger Creek HOA
- River Mountain Ranch HOA
- River Trail POA
- Rotary Club of Boerne
- Saddlehorn HOA
- Sierra Club – Alamo Group
- Texas Parks and Wildlife Department
- Trails of Herff Ranch HOA
- U.S. Army Corps of Engineers
- U.S. Department of Agriculture
- U.S. Environmental Protection Agency
- U.S. Fish and Wildlife Service
- Villas at Hampton Place HOA
- Woods of Frederick Creek HOA

WHAT ARE YOUR GOALS AND THOUGHTS FOR THE COMMUNITY?

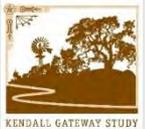

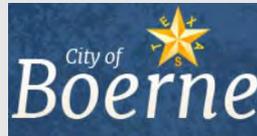

ISSUES AND OPPORTUNITIES

We Need Your Feedback:

Place sticky notes and/or written notes on the maps to let us know:

1. What are important community resources the study team should be aware of?
2. What are important environmental resources the study team should be aware of?
3. Where do you experience transportation issues?
4. What solutions should we consider?

1. Introduction

On Tuesday, January 17, 2017, the Texas Department of Transportation (TxDOT), in cooperation with Kendall County and the City of Boerne, held an open house for the Kendall Gateway Study at the Boerne Middle School South located at 10 Cascade Cavern, Boerne, Texas, 78015 from 6:00 p.m. to 8:00 p.m.

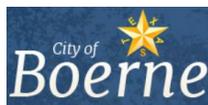

This event was the first in a series of public engagement opportunities regarding the Kendall Gateway Study feasibility process. The purpose of the open house was to introduce the feasibility study to the public and gather public input regarding the transportation-related vision and goals to relieve congestion on State Highway (SH) 46 and other major arterials in Boerne and Kendall County. Project exhibits were available for public viewing and the Project Team (TxDOT staff, Kendall County staff, City of Boerne staff, and project consultants (BGE, Inc. and Poznecki-Camarillo, Inc. [PCI])) were available to provide information and answer questions. A total of 255 stakeholders attended the open house.

2. Outreach

Official public notices (display advertisements) were published in English and Spanish in the Boerne Star and La Prensa de San Antonio, respectively. The public notice was published in the Boerne Star on December 30, 2016, and in La Prensa on December 28, 2016. In addition to the newspaper notices, the following notification methods were utilized:

- **Invitation Emails** – An invitation email was sent to members of the Technical Work Group (TWG) and Stakeholder Working Group (TWG), as well as to elected officials on December 27, 2016.
- **Mailouts** – A bilingual open house notice was mailed to 287 stakeholders on January 3, 2017.
- **Changeable Message Signs** – Four changeable message signs announcing the open house were placed at strategic locations within Kendall County; the signs were posted from January 10 to 17, 2017.
- **Website Postings** – A notice of the open house was published on TxDOT's, the City of Boerne's, and the Greater Boerne Chamber of Commerce's websites.
- **Media Coverage** – KTSA Radio provided media coverage of the open house on the day of the meeting, January 17, 2017.

Copies of the various notices are provided in the **Documentation of Open House, Appendix B.**

3. Attendance

Approximately 255 project stakeholders signed in at the registration table, in addition to members of the Project Team. The breakdown is as follows:

- 245 citizens;
- 7 elected officials;
- 3 members of the media; and
- 26 Project Team members.

The elected officials in attendance included Councilman Charlie Boyd and Councilman Ron Cisneros with the City of Boerne; Alderman Roy Elizondo and Mayor Garry Manitzas with the City of Fair Oaks Ranch; Commissioner Richard Elkins and Judge Darrel L. Lux with Kendall County; and Regional Director Michael Koerner representing U.S. Senator Ted Cruz.

Copies of the sign-in sheets are provided in the **Documentation of Open House, Appendix C**.

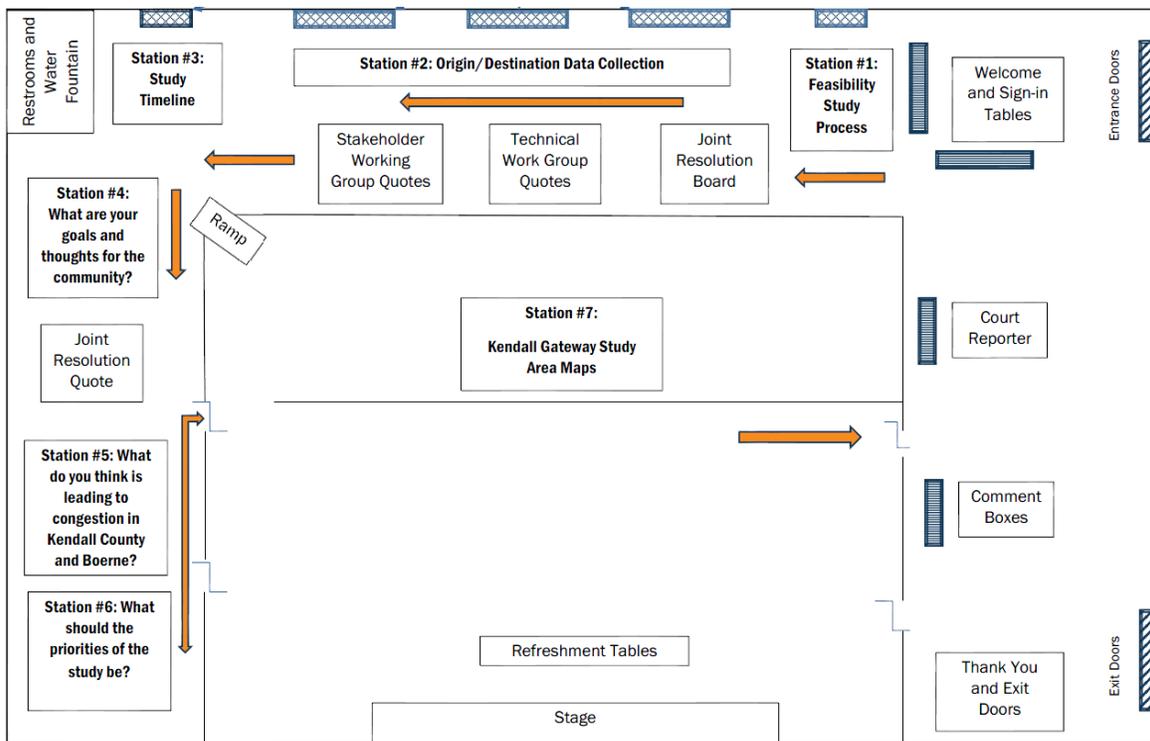

4. Meeting Layout

The meeting was conducted in an open house format, allowing attendees to come and go during the established time. Tables with sign-in sheets were set up at the entrance to the meeting. English and Spanish handouts were provided at this table, including a Room Layout, Kendall Gateway Study Newsletter, and Comment Form (**Documentation of Open House, Appendix E**). The Comment Form included instructions for submitting comments.

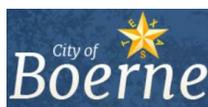

Welcome and Sign-In Tables

Upon entering the room, multiple display boards and stations were set up to engage the public. Below is the room layout.

Room Layout of the Open House

Attendees were given the opportunity to view the display boards, engage in the various stations, ask questions regarding the feasibility study, and encouraged to provide verbal and written comments.

Multiple bilingual English/Spanish interpreters were onsite to provide Spanish translation, although no requests were received for translation services. These individuals were identified with the following notation on their name tags: “Yo hablo español.”

A Comment Table was set up where attendees could fill out and leave completed Comment Forms. In addition, a court reporter was present at the meeting for those choosing to give verbal comments.

Comment Table

Court Reporter Table

Commenting options included:

- 1) Filling out a comment card at the comment table.
- 2) Giving verbal comments to the court reporter.
- 3) Faxing comments to (210) 349-4395.
- 4) Emailing comments to: KendallGateway@pozcam.com.
- 5) Mailing comments to: Richard De La Cruz, P.E., Project Manager, TxDOT, 4615 NW Loop 410, San Antonio, TX 78229.
- 6) Visiting txdot.gov, keyword “Kendall Gateway Study”.

A refreshment table was set up at the back of the room with coffee, water, cookies, and pastries.

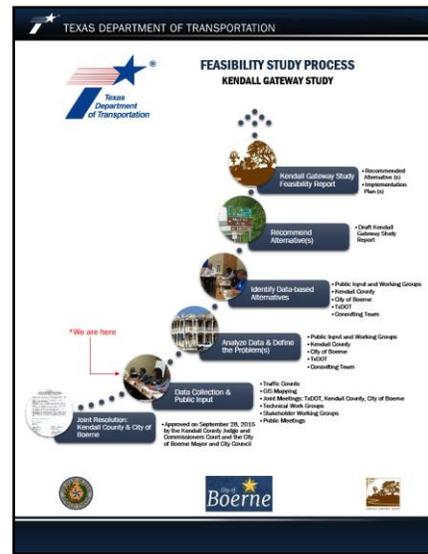

A representative sample of photographs taken at the Open House is provided in the **Documentation of Open House, Appendix E**.

5. Open House Stations

5.1 Station #1 – Feasibility Study Process

Station #1 included a display board outlining the feasibility study process. The board explained the project was initiated with a Joint Resolution that was approved on September 28, 2015 by the Kendall County Judge and Commissioners Court and the City of Boerne Mayor and City Council.

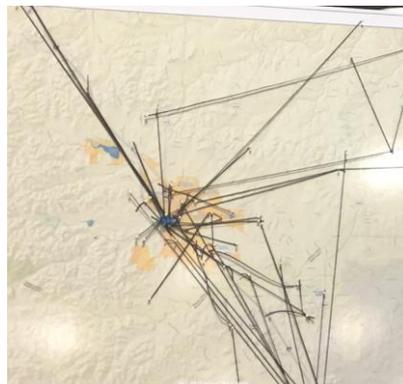

The result of the study will be the Kendall Gateway Study Feasibility Report, which will include a recommended alternative(s) and an implementation plan(s). Currently, the study is in the data collection and public input phase.

5.2 Station #2 – Origin/Destination Data Collection

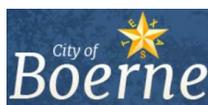

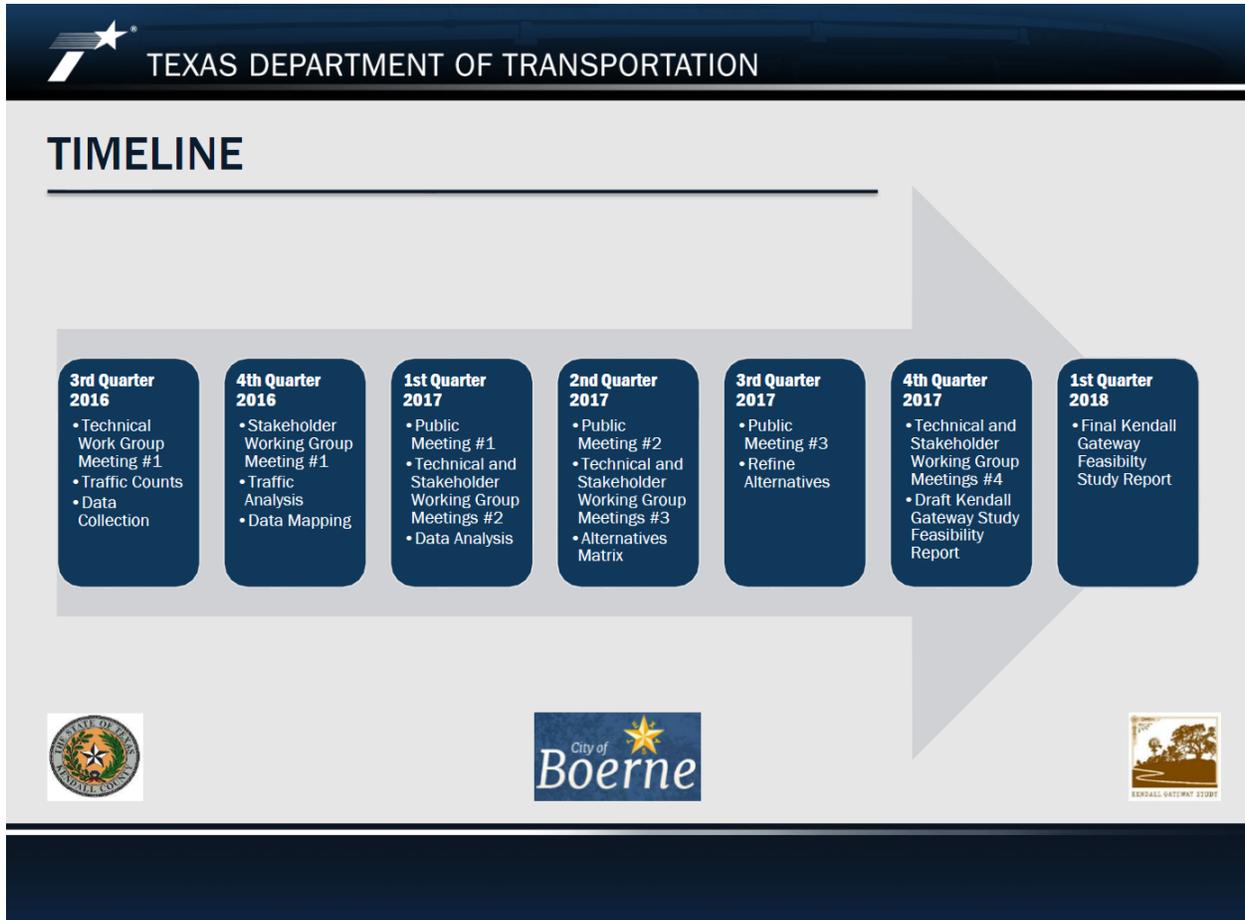

Station #2 involved origin/destination data collection. The purpose of this exercise was to gather origin/destination data of where people live, work, go to school, and shop and how they travel during their daily trip around the city. Data gathered from these maps will be analysed by traffic engineers.

The results showed white pins representing participants' homes, red pins representing employment, yellow pins representing educational facilities, and blue pins representing shopping facilities. Three maps were provided for this exercise. The final versions of each are shown in the photographs below.

5.3 Station #3 – Study Timeline

Station #3 consisted of an exhibit board showing the timeline of the Kendall Gateway Study, as shown below.

5.4 Station #4 - Goals and Thoughts

At Station #4, attendees were asked: "What are your goals and thoughts for the community?" Flipcharts and markers were provided for attendees to write their answers. The answers provided by attendees at this exercise are shown in the photographs below.

GOAL:

- KEEP BOERNE, BOERNE
- URBAN SCALE IS NOT BOERNE SCALE!
- FOUR LANES ON MAIN ST IS COUNTER PRODUCTIVE TO COMMUNITY SHOPPING AND EDGE OF PARKING DOWN TOWN.
- STOP LIGHTS DO NOT A SMOOTHER CIRCULATION MAKE.
- GO AROUND (ROUNDABOUTS) SLOW TRAFFIC, BUT, KEEP IT MOVING. - Yes!
- IMPROVE BOERNE'S VILLAGES SCALE BY KEEPING BOERNE RURAL & HEART.
- INCREASE CIRCULATION ROUTE ALTERNATIVES BY REDUCING KEY HOLE DEVELOPMENT DEAD ENDS.
- REQUIRE NEW DEVELOPMENT TO FIT INTO A REGIONAL MASTER DEVELOPMENT PLAN.
- REDUCE POST DEVELOPMENT WORKAROUNDS BY LEADING WITH BETTER CITY/COUNTY RURAL PLANNING.

NO use of eminent domain!!!
Fix I10 first!

3351 is ~~not~~ is not straight and has way too much traffic. Subdivisions + Individuals can not get out. Traffic was moving at 40mph at 3pm. Developments going in Fair Oaks along 3351. Suspect more lights.

RAISE BRIDGE OVER CIBOLA CREEK @ HERFF RD so it is also LODGER LOWER THAN INTERSECTION so it doesn't flood AND PREVENT PEOPLE FROM DRIVING DURING HIGH WATER TIMES.

Traffic on Adler St. is extremely high @ elementary + high school. Speed bumps / sidewalks for school children. Someone is going to get hurt.

o Flooding @ North Adler.

No impact to Kreutzberg Road
DO NOT DESTROY ENTRANCE TO BOERNE by Bulldozing + BUCKETS!!

Traffic on 46 into Boerne is becoming impossible (Ditto!)
It is becoming very difficult to exit Silver Hills subdivision on to 3351 or to make a left turn into the development

Public Transportation
Too much traffic on 3351!!!
Need lights + 1

Make 4 lane road between Boerne + Bulverde
Work on school traffic coming out of Champion - other inlets + outlets
Try to connect a few subdivisions
Repair Sistorale Rd.
Connect Kreutzberg Rd to 3351
Connect 474 to Sistorale Rd by way of Smith Smiser + Seewald

Consider Roundabouts
BAD IDEA GOOD idea
↓'s accidents by large % in Europe.
And keeps traffic moving

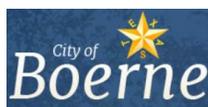

Traffic lights - Use "smart" lights; Allow for left turn yield instead of "hard" red light at left turn signals; FIX HERFF
Duck Park light per above or return to 3-way stop
→ Unnecessarily stops traffic & slows mobility - agree

I have become a convert in favor of traffic circles - use them where appropriate

Complete one of The Texdot Projects That Have Been Started on I-10
Widen John's Rd Bridge, Stop signs all directions, longer acceleration lanes
Safer ramps off I-10
Slow down traffic on Main Street/German speed bumps/20 mph all the way
RE: Roadside Mobility - Pedestrian crosswalk signals in mid-block along "The Mile"
- Public Safety/Emergency Response Access (for example Child Drive at 3351)
- Integrity of Residential Neighborhoods
- Traffic Flow
- Noise
- Ambience

• KEEP Boerne like it is.
- By Pass from 46 to IH-10 south of town moving traffic that's "pass thru"
• Meaningful Drainage Study
- ADDRESS SPEED LIMITS FROM MAIN ST TO DAM. PERHAPS SPEED BUMPS IN SPITE OF IT BEING A STATE HIGHWAY
- Address traffic on 46 @ HERFF - from main to I-10
- Address infrastructure (like 46) before allowing continuing development
- Traffic on Cosrde Govers Rd upon subdivision will be horrible!
- I would agree with this - pace of development is outpacing how fast improvements are being made / Also, develop infrastructure while working massive property tax increases - can approach development be required to help along roads?

- Limit Left hand turns ON MAIN
- Bike (non motor) routes Through The City and surrounding Communities
- Crosswalks on Main St.
- Stoplights on Main (more congested) CMS STREET
- Sidewalks in Boerne

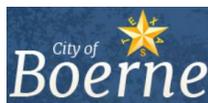

5.5 Station #5 – Causes of Congestion

At Station #5, attendees were asked: “What do you think is leading to congestion in Kendall County and Boerne?” Postcards and markers were provided for attendees to write their answers. The answers provided by attendees at this exercise are shown below.

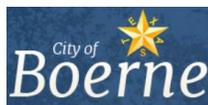

Causes of Congestion

- Route traffic around downtown Boerne that does not have downtown as destination.
- Improve low water crossing at Old Fred Road because this roadway will become busy with future construction.
- Our schools (BISD, Geneva) have too good of a reputation. Actually wonderful, but this one reason is cause for family growth.
- Failure to hold developers accountable for design and cost off infrastructure.
- Failure of urban planning – infrastructure does not support density.
- New housing developments without understanding existing road infrastructure.
- People are attracted to high quality of life in Boerne and schools.
- More people!
- Fast growth. Need to plan road work faster.
- Reduce 46 and Boerne traffic by expanding Blanco south to 1604.
- People are moving out of SA: (1) to leave the crowded city, (2) to acquire a little property, and (3) to find a safer place to live.
- Allowing growth too quickly instead of incrementally. strongtowns.org
- It’s a wonderful place to live, don’t change it; weather.
- Development outpacing infrastructure. Need better planning and execution of development aligned to existing and reasonably planned infrastructure.
- Build infrastructure before new development.
- Approving subdivisions and building before the roadways are fixed to handle the traffic.
- Build it and they will come. Going after revenue without consideration of quality of life.
- Boerne residents access to I-10.
- Bergheim and Bulverde residents access to I-10.
- Buccee’s.
- Development that isn’t based on live/work mixed use (such as the last Master Plan suggested). Less reasons to use cars.
- Closure of FM 3351 during high flow events causing road to be closed.
- City too interested in tax dollars. Not interested in curbing growth.
- Need harder restrictions on planning and zoning which would slow so much development. Development is causing most congestion and nothing is planned correctly.
- Population growth.

Causes of Congestion (cont.)

- Too much residential development without adequate roads in place. The developers seem to be driving the congestion.
- Population growth; new people on old roads; confusing intersections.
- Old ranches selling and turning into new developments.
- Poor planning. Should try to stick to Master Plan until a new plan is in place.
- Too many new developments without a plan for traffic.
- Everyone lives in Boerne but works in San Antonio.
- Poor long term planning and vision.
- Too much residential development without infrastructure. Too much \$\$ grab without consideration of quality of life.
- Speed too high.
- Way too many developments being built before infrastructure is in place! Slow down building.
- Much more need for citizen input. Terrible planning.
- Too much focus on growth at expense of culture, history, and nature.
- Only 1 east-west route; lack of feeder roads into town.
- Development before infrastructure. Too much development in a town too fast.
- Rapid growth.
- Lack of planning as Kendall grows.
- Will only get worse around Buccees.
- Residential building doesn't include thru streets adding to the load on existing thoroughfares. Too many residential subdivisions have 1-2 access roads for hundreds of families.
- Insufficient capacity on Hwy 46 between Boerne and Bergheim.
- Improper access to Hwy 46 from subdivisions.
- New building on River Road 46 in Boerne eliminates any expansion of River Rd. Terrible planning.
- Roads are too small/narrow for all the new growth. Traffic on 46 when Champion gets out both directions.

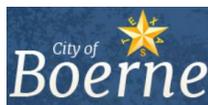

5.6 Station #6

At Station #6, attendees were asked: “What should the priorities of the study be?” Postcards and markers were provided for attendees to write their answers. The answers provided by attendees at this exercise are shown below.

Priorities

- Traffic control.
- Re-route traffic without affecting established communities (like River Mountain Ranch).
- Go for everything at once instead of piecemealing it – “disrupt me once and be done with it”.
- Need good 46 bypass route that is well outside city limits.
- Mass transit or possible rail system into San Antonio.
- Road infrastructure that allows traffic to flow freely into and out of Kendall County via I-10 and Hwy 46.
- Effective roadways through and around the city.
- Traffic congestion/flow should be addressed and planned for before permits are given for new construction, especially residential.
- Defining traffic flow and planning for multiple routes – not leaving 46 or I-10 to be the only routes around Boerne or into San Antonio.
- Start using roundabouts instead of lights.
- Like what they do in Europe. All striping in the construction are safety orange. This reminds the driver to keep his speed down.
- Maintain quality of life issues in city. Sidewalks, crosswalks, bike lanes, golf carts on roads.
- Keep Boerne “rural”.
- Widening I-10.
- With dramatic population growth, need more police, fire, EMS, city/county personnel before more developments are allowed.
- Present, and more importantly, future growth.
- Highway safety, traffic flow, and green space.
- Parking for tourists.
- Loops to divert traffic out of congested areas.
- Public safety, plan that includes new and future growth without impacting “small town” feel, and do not transfer one traffic problem to another area.
- Improve low water crossing at Old Fred Road.
- Bridge over Cibolo Creek at Hwy 46 and Herff Rd was constructed so it sits below the intersection height. In a 1-year period, the creek crested the bridge 3 times causing the intersection to be impassible. Anyone living/working east of that intersection have no access to emergency services until water recedes since 351 floods where it crosses Cibolo Creek. Very dangerous!
- Mass transit (train/shuttle) to San Antonio from Boerne with station located at north end of Boerne/I-10 for parking and traffic management.
- Low-impact development.
- Low-impact, environmentally responsible context-sensitive solutions.

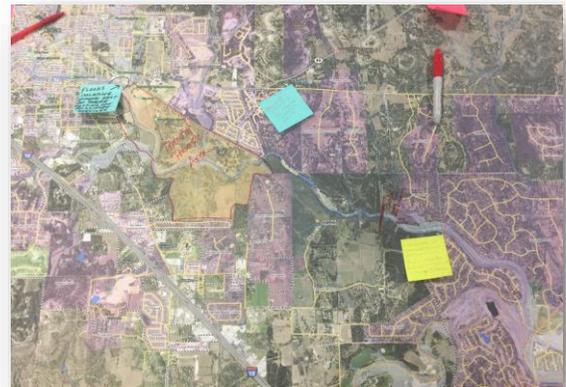

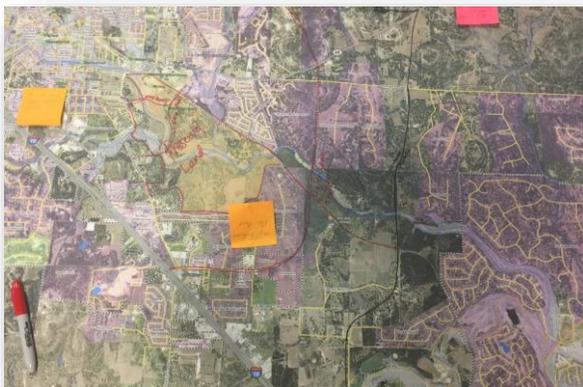

5.7 Station #7

At Station #7, four identical sets of study area quadrant maps were laid out on tables. Attendees were asked to place sticky notes and/or written comments on the maps to provide feedback on the following issues:

- What are important community resources the study team should be aware of?
- What are important environmental resources the study team should be aware of?
- Where do you experience transportation issues?
- What solutions should be considered?

All of the comments received during this exercise were reviewed by the Project Team and will be considered in the feasibility study. Representative photographs from this exercise are provided below.

6. Summary of Public Comments

A total of 37 comments were received during the public comment period that concluded on February 1, 2017. The Comment/Response Matrix is provided in the **Documentation of Open House, Appendix A**. Copies of the comments received are included in the **Documentation of Open House, Appendix D** and should be referred to for the actual comments.

7. Summary

In January of 2017, TxDOT, in cooperation with Kendall County and the City of Boerne, conducted an Open House for the Kendall Gateway Study. The meeting was publicized prior to the meeting through various outlets in English and Spanish, and was well-attended.

TxDOT, in cooperation with Kendall County and the City of Boerne, has reviewed and responded to the comments received. Comments received during the official Open House comment period will be taken into consideration and incorporated into the project record.
