TxDOT is planning improvements for the widening of IH-35 from FM 3002 in Cooke County, Texas to Rogers Road/Mile Marker 3 in Love County, Oklahoma to update the roadway to current design standards and provide congestion relief for expected future traffic increases. These improvements will require the relocation of a portion of the BNSF rail line within the City of Valley View, Texas.

As part of the planning process, TxDOT is conducting an environmental assessment (EA) for the proposed widening and realignment of IH-35 from the south Cooke County line to Rogers Road/Mile Marker 3 in Love County, Oklahoma. An EA is a report that documents the existing

social, economic and environmental conditions, assesses effects of the proposed alternative and identifies potential mitigation. The EA will also evaluate the effects of a no-build alternative.

Comments on the I-35 Improvement Project, which are postmarked by Friday, October 13, 2017, will become part of the official file of record for the I-35 EA.
