

US 77 Existing Typical Section – North of FM 446

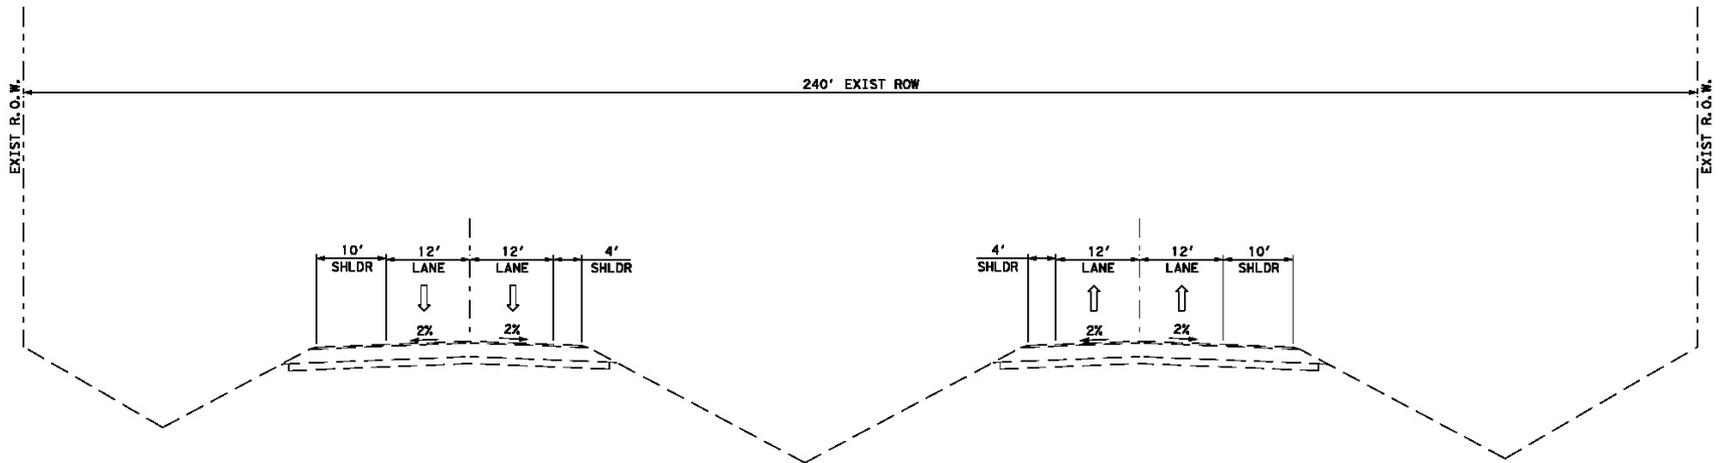

- US 77 North of FM 446 is an undivided section with two lanes, one in each direction and 10-foot-wide outside shoulders
- The existing right of way varies anywhere from 220 feet to over 1,200 feet wide along this corridor

US 77 Existing Typical Section – South of FM 446

- US 77 South of FM 446 is divided with four 12-foot-wide travel lanes, two in each direction and 10-foot-wide outside shoulders
- An existing grade separation exists at US 59 and BU 59

- Widening to the west between FM 236 and BU 59
- Existing mainlanes converted to the northbound frontage road
- Between BU 59 and US 77, the roadway would be straightened out to improve safety
