TRAFFIC OPERATIONS ENGINEERS**

**SPECIAL PROVISION AND/OR SPECIFICATION CHANGE MEMORANDUM 13-21**

# MEMO

Date: September 23, 2021

**To:** District Engineers 

**From:** Ryan C. Barborak, P.E.  
Director, Materials and Tests Division

**Subject:** Statewide Special Provision SP 4004-001 (14), "Screw-In Type Anchor Foundations"

---

The above-referenced Special Provision has been approved for statewide use and is required for all projects using Screw-In Type Anchor Foundations beginning with the January 2022 letting. However, use of this Special Provision prior to the January 2022 letting is at the District's option.

This Special Provision provides for adjusting the allowable amount of space between the base and the ground from 2 inches to 1/2 inch. This change corrects discrepancy with the Department's standard sheet for Roadside Flashing Beacons which specifies this measurement to be 1/2 inch.

Please disseminate this information to your Transportation Planning & Development, Design, Construction, Laboratory, Maintenance, and Traffic Operations Engineers.
