MEMORANDUM

SPECIAL PROVISION AND/OR SPECIFICATION CHANGE MEMORANDUM 16-09

TO: District Engineers **Date:** March 17, 2009
FROM: Thomas R. Bohuslav, P.E. *Thomas R. Bohuslav*
SUBJECT: Statewide Special Specification 4429, "Multiple-Layer Polymer Concrete Overlay"

The above-referenced special specification has been approved for statewide use. This special specification is required on all projects using Multiple-Layer Polymer Concrete Overlay beginning with the July 2009 letting, but is available for district use immediately.

This special specification removes the requirement for positive displacement pumps and addresses previous inconsistencies in cure time for concrete prior to placement of the overlay. In addition, we have revised the nominal depth definition to require a 3/8" nominal depth measured from the top of the concrete deck surface to the peaks of the aggregate.

Please disseminate this information to your Transportation Planning & Development, Design, Construction, Maintenance, and Traffic Operations Engineers.
