MEMORANDUM

SPECIAL PROVISION AND/OR SPECIFICATION CHANGE MEMORANDUM 17-09

TO: District Engineers **Date:** April 2, 2009
FROM: Thomas R. Bohuslav, P.E. *MB*
SUBJECT: Statewide Special Specification 3178, "Hot In-Place Recycling of Asphalt Concrete Surface (HIR)"

The above-referenced special specification has been approved for statewide use. This special specification is optional on projects using Hot In-Place Recycling of Asphalt Concrete Surface (HIR) beginning with the July 2009 letting, but is available for district use immediately.

This special specification removes scarifying and pulverizing from the original specification. In addition, it addresses material sampling, mix design, Hamburg requirements and QC/QA.

My guidance memorandum dated April 1, 2009, provides additional information on the requirements of this special specification.

Please disseminate this information to your Transportation Planning & Development, Design, Construction, Maintenance, and Traffic Operations Engineers.
