SPECIAL PROVISION AND/OR SPECIFICATION CHANGE MEMORANDUM 18-18

MEMO

Date: July 5, 2018

To: District Engineers

From: Gina E. Gallegos, P.E.
Director, Construction Division

Subject: Statewide Special Specification 6292, "Radar Vehicle Detection System for Signalized Intersection Control"

DS
GG

The above-referenced special specification has been approved for statewide use and is optional for all projects using Radar Vehicle Detection System for Signalized Intersection Control beginning with the September 2018 letting. However, use of this special provision prior to the September 2018 letting is at the district's option.

This special specification replaces DW-SS 6025 - Radar Presence Detection Device and SW-SS 6057 Radar Advance Detection Device. The specification now allows for the use of multiple brands of traffic signal radar vehicle detection devices. Previous specifications limited the brands that would meet specifications.

Please disseminate this information to your Transportation Planning & Development, Design, Construction, Laboratory, Maintenance, and Traffic Operations Engineers.
