SPECIAL PROVISION AND/OR SPECIFICATION CHANGE MEMORANDUM 22-18

MEMO

Date: July 10, 2018

To: District Engineers

From: Gina E. Gallegos, P.E.
Director, Construction Division

DS
GG

Subject: Statewide Special Specification 3063 (14), "Full-Depth Reclamation Using Foamed Asphalt (Road-Mixed)"

The above-referenced special specification has been approved for statewide use and is required for all projects using full-depth reclamation using foamed asphalt (road-mixed) beginning with the October 2018 letting. However, use of this special specification prior to the October 2018 letting is at the district's option.

This special specification is for performing full depth reclamation (FDR) using an in-place mixing process to obtain a homogenous mixture of the existing surface and the underlying base material (with or without new material and additive added) using a foamed asphalt.

Please disseminate this information to your Transportation Planning & Development, Design, Construction, Laboratory, Maintenance, and Traffic Operations Engineers.
