

SPECIAL SPECIFICATION**5050****Portable Concrete Traffic Barrier Connection Hardware**

1. **Description.** Furnish portable concrete traffic barrier connection hardware in accordance with the plans details for the traffic barrier sections to be furnished by the Department.
2. **Materials.** Use materials in the construction of connection hardware for portable concrete traffic barrier conforming to the requirements of Item 442, "Metal for Structures". After use, haul the connection hardware to the Department warehouse nearest the project, unless otherwise shown on the plans.
3. **Damage and Loss.** Repair or replace, as directed, hardware damaged or lost in the process of handling or placing, at no cost to the Department.
4. **Measurement.** This Item will be measured as each hardware assembly. An assembly is defined as being sufficient hardware for one complete connection between two traffic-barrier sections, including the required bolts, nuts, washers, structural-steel shapes and dowels.
5. **Payment.** The work performed and materials furnished in accordance with this Item and measured as provided under "Measurement" will be paid for at the unit price bid for "Concrete Traffic Barrier Connection Hardware (Portable)". This price is full compensation for furnishing the hardware, including the materials, and for manipulation, labor, tools, equipment, and incidentals necessary to complete the work.
