

## SPECIAL SPECIFICATION

### 5522

#### Retrofit Detectable Warning Surface

1. **Description.** Furnish and install detectable warning surface on existing otherwise compliant curb ramps or flush landings as shown on the plans or as directed.
2. **Materials.** Provide only detectable warning surface material that is on the approved material producer list published in “Detectable Warning Material” available on the TxDOT website.
3. **Construction Methods.** Follow manufacturer’ recommendations for installing detectable warning surface material. Install detectable warning surface the full width of the ramp or flush landing with a minimum distance of 24 in. in the direction of pedestrian travel.
4. **Measurement.** This Item will be measured by square foot of surface area or by the each detectable warning surface installed on existing curb ramp.
5. **Payment.** The work performed and materials furnished in accordance with this Item and measured as provided under “Measurement” will be paid for at the unit price bid for “Retrofit Detectable Warning Surface” of the type specified. This price is full compensation for all materials, surface preparation, manipulations, labor, tools, equipment and incidentals.
