Special Provision to Item 3
Award and Execution Contract

Item 3, Award and Execution of Contract," of the Standard Specifications is amended with respect to the clauses cited below. No other clauses or requirements of this Item are waived or changed.

Section 3.4.3., "Insurance." The first two paragraphs are voided and replaced by the following:

For construction and building Contracts, submit a certificate of insurance showing coverages in accordance with Contract requirements. For routine maintenance Contracts, refer to Article 3.8., "Beginning of Work."

Insurances must cover the work for the duration of the Contract and must remain in effect until final acceptance. Provide project-specific insurance, not listed in Table 2 (for example, but not limited to, railroad protective liability, pollution liability, builder's risk, maritime) until work is complete and the need to perform work covered by the project-specific insurance is no longer necessary, as approved. The Engineer retains the right to re-require project specific insurance if it is subsequently determined that project specific insurance work is needed. Failure to obtain and maintain insurance for the contracted work may result in suspension of work or default of the Contract. If the insurance expires and coverage lapses for any reason, stop all work until the Department receives an acceptable certificate of insurance.

Article 3.8., "Beginning of Work." The first sentence is supplemented by the following:

In addition, for a routine maintenance Contract, do not begin work until a certificate of insurance showing coverages in conformance with the Contract requirements is provided and accepted.
