## Special Provision to Item 7

### Legal Relations and Responsibilities

---

Item 7, "Legal Relations and Responsibilities," of the Standard Specifications is amended with respect to the clauses cited below. No other clauses or requirements of this Item are waived or changed.

**Section 7.2.4., "Public Safety and Convenience."** The first paragraph is deleted and replaced by the following.

Ensure the safety and convenience of the public and property as provided in the Contract and as directed. Keep existing roadways open to traffic or construct and maintain detours and temporary structures for safe public travel. Manage construction to minimize disruption to traffic. Maintain the roadway in a good and passable condition, including proper drainage, and provide for ingress and egress to adjacent property.

If the construction of the project requires the closing of a highway, as directed, communicate and coordinate the closure with the Engineer, the city of Grapevine and all affected municipalities regarding events that are significant traffic generators and work with them to ensure all lanes and ramps are available during peak traffic periods before, during, and after significant traffic generator events to avoid any adverse economic impact on the city of Grapevine or municipalities during:

- dates or events as shown on the plans, and
- other dates as directed.

**Section 7.2.4.1., "Construction Directly Affecting the city of Grapevine,"** is added:

If the city of Grapevine notifies the Department or the Contractor at least 180 days before an event is scheduled to be held, temporary closures, including temporary relocations or changes to entrance or exit ramps, are prohibited on specified dates. If major items of work are impacted by the inability to close lanes or ramps, time will be suspended, as approved.
