
Special Provision to Item 9 Measurement and Payment

For this project, Item 9, "Measurement and Payment," of the Standard Specifications, is hereby amended with respect to the clauses cited below, and no other clauses or requirements of this Item are waived or changed hereby.

Article 9.7., "Payment for Extra Work and Force Account Method," is supplemented with the following:

A unique, Force Account line item is established, in the contract, to pay for invoiced expenses associated with compliance with the Soil and Groundwater Management Plan (SGMP) detailed in a Special Provision to Item 6, "Control of Materials." The invoices for the SGMP expenses are to show each particular expense type as a line item with its cost. Multiple expense types may be included on the same invoice with their individual costs and a combined invoice total shown. Subcontractor invoices are to be included with the invoice submission package. The SGMP invoiced expenses are to be submitted by the estimate cutoff date each month to be included in the estimate payment for the month.

The prime Contractor will be paid for administrative costs only when the extra work, ordered by the Engineer, is performed by a Subcontractor or a collection of Subcontractors. The payment for the administrative costs will not exceed 5% of the total invoiced subcontracted, extra work.

Expenses to be included in these Force Account payment invoices are soil, groundwater disposal, items directly related to the SGMP, and expenses not covered by any contract bid items.
