
Special Provision to Item 440

Reinforcement for Concrete

Item 440, "Reinforcement for Concrete" of the Standard Specifications is amended with respect to the clauses cited below. No other clauses or requirements of this Item are waived or changed.

Article 440.2., "Materials" is supplemented with the following:

2.14 Headed Reinforcing Bars. Provide headed reinforcement for specific reinforcing bars identified in the plans. Provide headed reinforcement conforming to the requirements of ASTM A970 "Headed Steel Bars for Concrete Reinforcement". Unless otherwise stated in the plans, attach heads at the ends of full length bars without intermediate splices in the designated bars. Use any of the head attachment methods noted in ASTM A970. Observe the restrictions of ASTM A970 for reinforcing steel type based on the type of head attachment. Provide Class HA headed bars, unless indicated otherwise in the plans.
