
Special Specification 5030

Tree Grate

1. DESCRIPTION

Furnish and install tree grates.

2. MATERIALS / PRODUCTS

- 2.1. **Tree grate.** Galvanized steel paver grate as manufactured by the following:
- 2.2. **Style.** Custom size grate as shown on the plans. Concentric ring style trim ring, cast grey iron, using ½ ring per tree and of the size to fit the opening in tree grate as shown on the plans.

3. EQUIPMENT

Furnish tools and equipment recommended by the manufacturer.

4. CONSTRUCTION

Install items in accordance with approved Shop Drawings and manufacturer's instructions in locations approved by the Engineer. Install plumb and level, anchored rigid and secure, and in true alignment with related and adjoining work. Provide anchoring devices and fasteners as required for property installing items. Upon completion, re-examine the work and insure that installation is firm and tightly anchored in true alignment.

5. MEASUREMENT

Tree Grates will be measured by each unit furnished and installed. This is a plans quantity measurement item. The quantity to be paid is the quantity shown in the proposal. Additional measurements or calculations will be made if adjustments of quantities are required.

6. PAYMENT

The work performed and supplies furnished in accordance with this Item and measured as provided under "Measurement" will be paid for at the unit price bid for "Tree Grates." This price is full compensation for furnishing equipment, supplies, and labor for installation of the tree grates and trim ring and incidentals necessary to complete the work as provided under "Work Methods."
