
Special Specification 5037

Floating Silt Barrier (Turbidity Curtain)

1. DESCRIPTION

Furnish Type 2 Turbidity Curtain at a location to be determined by the Engineer.

2. MATERIALS

Furnish floating silt barrier of the type indicated in the project plans. The barrier shall be 6", 8", or 12" marine grade flotation (depending on skirt depth), with 22 oz. Reinforced Impermeable PVC Fabric, universal bulk connectors with grommets, 5/16" bottom ballast chain, and accessories (tow bridles, anchor kits, floating marker lights, and reefing lines). Provide to the Engineer all documentation necessary to allow for approval of the style and type of curtain prior to installation.

3. MEASUREMENT

This item will be measured by the linear foot, complete in place in the locations determined by the Engineer.

4. PAYMENT

The work performed, materials and supplies furnished in accordance with this item and measured as provided under "Measurement" will be paid at the unit price bid for "Floating Silt Barrier (Turbidity Curtain) DOT, TYPE II or Equal." This price is full compensation for ordering, transporting, unloading, erecting, placement, resetting, removal and for all equipment, labor, tools, and incidentals.
