| 1. | **DESCRIPTION**
This Item will consist of the removal of the existing hub building(s), and must include all excavation and backfilling necessary to complete the removal. Work at designated location(s) as noted on the plans must be done in accordance with this specification or as directed by the Engineer. |
| 2. | **CONSTRUCTION METHODS**
The hub building will remain in place until a new hub building or hub cabinet has been installed and fully integrated and the Engineer directs its removal.

Removal of the hub building and all other accessories and equipment must be performed in such manner that they will not be marred or damaged. Any damage to the building or equipment scarred, battered or broken by the Contractor must be replaced by the Contractor at the Contractor's expense.

Immediately upon removal, the hub building will be transported to the storage area at:

TXDOT Signal Shop  
13301 Gateway West Blvd  
El Paso, TX 79928

Unless otherwise shown on the plans, existing concrete foundations that are to be abandoned must be removed to 2 ft. below finish grade. Reinforcement must be cut off flush with the surface. The remaining hole must be backfilled with material equal in composition and density to the surrounding area, and by replacing any surfacing, such as asphalt pavement or concrete riprap, with like material to equivalent condition. |
| 3. | **MEASUREMENT**
This Item will be measured as each individual structure to be removed where salvage is authorized. |
| 4. | **PAYMENT**
The work performed in accordance with this Item, and measured as provided under "Measurement", will be paid for at the unit price bid for "Remove Hub Building". This price will be full compensation for all labor, tools, equipment, hauling, removal and disposal of concrete foundations, and incidentals. |
