
Special Specification 8024

Prepackaged Concrete (Materials Only)

1. DESCRIPTION

Furnish bagged concrete materials typically used for foundations for mailboxes and sign posts.

2. MATERIALS

Bagged concrete materials shall only require the addition of water.

Provide a concrete mix with a minimum 28 day compressive strength of 2,000 psi. Allow no aggregate to exceed 1-1/2" in size. Working time must be a minimum of 30 minutes. Bags must weigh 40 lbs. per bag.

3. MEASUREMENT AND PAYMENT

Material will be measured by the bag of dry mix. This price is full compensation for furnishing materials, loading, hauling, delivery of materials, furnishing scales and labor for weighing and measuring if needed, and equipment, labor, tools, and incidentals.
