- GENERAL NOTES:**
1. See PSL standard sheet for dimensions and details not shown.
 2. Lids are manufactured with the opening in one corner only, as shown.
 3. Lids can be installed in the field in any orientation.
 4. Square and round grates can be rotated 90 degrees when installed in field, to achieve desired orientation with respect to the roadway.
 5. The rectangular 3'x5' grate cannot be rotated. Attention should be paid to the orientation of the lid when the 3'x5' grate is used.
 6. The combination of lid orientation and grate orientation allows for numerous installation options.

① SFG is the only available in these configurations.
