GENERAL NOTES:

Constant thickness bearings may be used for moderate beam slopes up to 0.035%.
For skewed supports, Bearings located for beam skew not to exceed 30 degrees.
However, predicted contact is considered within allowable tolerances.
Sheets drawn for approval are required.

Cost of furnishing and installing elastomeric bearings is to be included in unit price bid for "Prestressed Concrete Decked Slab Beams".
Details are shown working right forward skew.
See Bridge Layout for actual direction.

For skewed supports, Bearings beveled for beam slope may provide uniform contact.
For skewed supports, Bearings beveled for beam slope may provide uniform contact.
